The Scale and Causes of Urban Change in Pakistan
Arif Hasan 2006

Civilian Jihad M. Stephan 2009-12-07 This book examines the role of nonviolent civil resistance in challenging tyranny and promoting democratic-self rule in the greater Middle East using case studies and analyses of how religion, youth, women, technology and external actors have influenced the outcome of civil resistance in the region.

Islamic Finance in Europe Valentino Cattelan 2013-01-01 Highlighting the impact of current globalization on financial markets, this topical book challenges the universality of Western property rights and interprets Islamic finance in Europe as part of a plural financial system, where different conceptions of economic justice(s) co-exist and influence each other. The contributing authors analyse key economic development and social integration issues from an Islamic perspective and outline the European approach to accommodating Islamic finance, with particular regard to the peculiarities of individual nation-states. Set in this context, the book presents financial pluralism as a device to enhance a level playing field in the global marketplace, as well as to foster a plural open society. Providing a comprehensive and methodological guide to Islamic finance in Europe, this book will prove an illuminating and informative read for academics, students and

policymakers with an interest in the impact on financial regulation of an increasingly globalized world.

Financial and Accounting Principles in Islamic Finance Samir Alamad 2019-05-10 This book provides an original account detailing the origins and components of a faith-based accounting system that was founded around 629 CE. By examining the historical development that the accounting systems underwent within the context of faith-based rules and values, the book explains what is meant by the term “faith-based accounting”, together with a discussion of its characteristics in relation to various product structures and the underlying Islamic finance principles. It provides important theoretical and practical contributions by explaining accounting as a value-based science rather than a value-free object or abstract. This book explores the way in which religious rules act as a directive for accounting and auditing practices in IFIs. Through which the concept of money and digital currency

within the theory of money and how it is enacted in a faith-based context, amid differences of opinions among its actors, is examined. This is an important foundation to explain Islamic accounting and includes how this outcome would shape the faith-based view regarding the new phenomenon of digital currency (DC). Also featured is the concept of paper money within the theory of money and how it is enacted in a faith-based legal framework by identifying two core concepts of today's Fiat money as being a single genus or multi-genera money. This book is not merely an academic work, nor is it a pure practitioner guide; rather, it is a robust work that combines both. It marries rigorous academic research and theories with practical industry experiences. The book provides a clear and concise guide to accounting in Islamic economics and finance and how Islamic financial institutions could meet the applicable faith-based rules in their accounting practices.

Arabs and Young Turks Hasan Kayali 1997-09-03 A study of Arab politics in the late Ottoman Empire as viewed from the imperial capital in Istanbul. This analytical narrative of the young Turk period (1908-1918), discusses both Arab concerns and the policies of the Ottoman government toward the Arabs

Arabia and the Arabs Robert G. Hoyland 2002-09-11 Long before Muhammed preached the religion of Islam, the inhabitants of his native Arabia had played an important role in world history as both merchants and warriors Arabia and the Arabs provides the only up-to-date, one-volume survey of the region and its peoples, from prehistory to the coming of Islam Using a wide range of sources - inscriptions, poetry, histories, and archaeological evidence - Robert Hoyland explores the main cultural areas of Arabia, from ancient Sheba in the south, to the deserts and oases of the north. He then examines the major themes of *the economy *society *religion *art, architecture and artefacts *language and literature *Arabhood and Arabisation The volume is illustrated with more than 50

photographs, drawings and maps.

Religions and Development Emma Tomalin 2013-07-03 Religion has been excluded from development studies for decades. Religious traditions have contributed greatly towards development work, yet major international players have tended to ignore its role. Recent years have shown a noticeable shift in development policy, practice and research to recognize religion as a relevant factor. This text provides a comprehensive insight into different approaches towards the understanding the relationships between religions and development studies, policy and practice. It guides readers through current debates, presenting, explaining and critically evaluating a broad range of literature and locating it within a theoretical context. The text explores the role of religion within development, from positive contributions, such as the important role that many 'faith-based organizations' play in education or health care, to more complicated and contested notions of impact, such as religiously inspired violence or gender inequality. The book begins with three background chapters, outlining the relevance of religions for development studies, policy and practice, and introducing the reader to the study of 'development' and of 'religions'. Following these, the focus then shifts to examine a number of thematic areas, including religion, gender and development, and the implications of the 'rise of religion' for mainstream development studies, policy and practice in the 21st century. Each chapter contains a range of features to assist undergraduate learning, including learning objectives for each chapter, discussion of key concepts, summaries, discussion questions, further reading and websites. The book also contains over sixty boxed case studies to provide further definition, explanation, and examples of the interactions between religions and development globally. This innovative text presents religions as something that can both obstruct and aid development, encouraging readers to engage

critically with the multiple ways that religion impacts on both the conceptualization of development as well the resulting project interventions. This will be of interest to undergraduate, postgraduate students and scholars interested in religious studies, development studies, and the broader study of societies and cultures.

Kashmir in Conflict Victoria Schofield 2020 "Why has the valley of Kashmir, famed for its beauty and tranquillity, become a major flashpoint, threatening the stability of a region of great strategic importance and challenging the integrity of the Indian state? This book examines the Kashmir conflict in its historical context, from the period when the valley was an independent kingdom right up to the struggles of the present day. Located on the borders of China, Central Asia and the Sub-Continent, the insurgency in the valley has also created serious tensions between India and Pakistan. Drawing upon research in India and Pakistan, as well as historical sources, this book traces the origins of the state in the 19th century and the controversial "sale" by the British of the predominantly Muslim valley to a Hindu Maharaja in 1846. Through an exploration of the implications for Kashmir of independence in 1947, it gives a critical account of why, for Kashmir, self-determination may seem a more attractive option than affiliation to a larger multi-racial whole."--

Turkey Erik J. Zürcher 2017-12-21 This revised edition builds upon and updates its twin themes of Turkey's continuing incorporation into the capitalist world and the modernization of state and society. It begins with the forging of closer links with Europe after the French Revolution, and the changing face of the Ottoman Empire in the 19th century.

Zurcher argues that Turkey's history between 1908 and 1950 should be seen as a unity, and offers a strongly revisionist interpretation of Turkey's founding father, Kemal Ataturk. In his account of the period since 1950, Zurcher focuses on the growth of mass politics; the three military coups; the thorny issue of Turkey's human right's record; the alliance with the West and relations with the European Community; Turkey's ambivalent relations with the Middle East; the increasingly explosive Kurdish question; and the continuing political instability and growth of Islam.

Struggling for the Umma Endang Turmudi 2007-10-01 Focuses on the heartland of the Nahdlatul Ulama (NU), the largest Islamic organization in Indonesia, and on the role of ulama (religious leaders), or kiai as they are known in Java, within NU. Based on substantial fieldwork, this study provides an informed glimpse into the intimate relationships among kiai, their role in local and national politics and their leadership of the Islamic community. Argues that the charismatic authority exerted through the leadership of the kiai in Java has limitations in terms of its legitimacy. At the very least it has boundaries that determine areas or circumstances for its legitimate expression. It also argues that the kiai's influence in politics is not as strong as in other domains.

Land Policy and Urban Growth Haim Darin-Drabkin 2013-10-22 Land Policy and Urban Growth explores the relationships between urban growth patterns, land prices, and land policies in countries with market economies. The effects of the peculiar

character of the private land market on land prices are discussed, along with the link between market mechanisms and government intervention in the urban-growth process. Comprised of 18 chapters, this book begins with a brief survey of patterns of urban growth, with emphasis on the high rate of urban expansion and what future land needs might be in urban areas. The next section is concerned with urban land prices in industrialized and developing countries and highlights the dramatic increases in urban land prices arising from urban development. Various theories of urban land-price formation are examined, together with public policies on urban land and their impact not only on the land market but also on land supply and allocation. Finally, some alternative urban land policies are outlined. This monograph will be of interest to policymakers involved in land use and urban planning.

The Bride and the Dowry Avi Raz 2012-01-01 Israel's victory in the June 1967 Six Day War provided a unique opportunity for resolving the decades-old Arab-Zionist conflict. Having seized the West Bank, the Gaza Strip, the Sinai Peninsula, and the Golan Heights, Israel for the first time in its history had something concrete to offer its Arab neighbors: it could trade land for peace. Yet the political deadlock persisted after the guns fell silent. This book sets out to find out why. Avi Raz places Israel's conduct under an uncompromising lens. He meticulously examines the critical two years following the June war and substantially revises our understanding of how and why Israeli-Arab secret contacts came to naught. Mining newly declassified records in Israeli, American, British, and UN archives, as well as private papers of individual participants, Raz dispels the myth of overall Arab intransigence and arrives at new and unexpected conclusions. In short, he concludes that Israel's postwar diplomacy was deliberately ineffective because its leaders preferred land over peace with its neighbors. The book throws a great deal of light not only on the post-1967 period but also on the

problems and pitfalls of peacemaking in the Middle East today.

Refugee Cities Sanaa Alimia 2022-09-13 Situated between the 1970s Soviet Union's invasion of Afghanistan and the post-2001 War on Terror, *Refugee Cities* tells the story of how global wars affect everyday life for Afghans who have been living as refugees in Pakistan. This book provides a necessary glimpse of what ordinary life looks like for a long-term refugee population, beyond the headlines of war, terror, or helpless suffering. It also increases our understanding of how cities—rather than the nation—are important sites of identity-making for people of migrant origins. In *Refugee Cities*, Sanaa Alimia reconstructs local microhistories to chronicle the lives of ordinary people living in low-income neighborhoods in Peshawar and Karachi and the ways in which they have transformed the cities of which they are a part. In Pakistan, formal citizenship is almost impossible for Afghans to access; despite this, Afghans have made new neighborhoods, expanded city boundaries, built cities through their labor in construction projects, and created new urban identities—and often they have done so alongside Pakistanis. Their struggles are a crucial, neglected dimension of Pakistan's urban history. Yet given that the Afghan experience in Pakistan is profoundly shaped by geopolitics, the book also documents how, in the War-on-Terror era, many Afghans have been forced to leave Pakistan. This book, then, is also a documentation of the multiple displacements migrants are subject to and the increased normalization of deportation as a part of "refugee management."

Pakistan's Democratic Transition Ishtiaq Ahmad 2016-11-03 Politics in Pakistan has traditionally been understood in the context of civil-military relationship. In May 2013, for the first time in history, Pakistan saw an elected government complete a full term in office and transfer power through the ballot box to another civilian government. In view of such an important

development, this book offers critical perspectives on Pakistan's current democratic transition and its implications for national politics, security and foreign policy. It critically analyses the emerging political trends in the country, including their underlying sources, attributes, constraints, and prospects of sustainability. Drawing on history, diverse theoretical perspectives, and empirical evidence, it explains the dynamics of the democratic process, contested borders and spaces, and regionalism. Contributions are from 13 prominent scholars in the field, who provide a wide-ranging analysis of Pakistan's contemporary national and regional challenges, as well as the opportunities they entail for its viability as a democratic state. Taking the debate on Pakistan beyond the outmoded notions of praetorian politics and security, the book explores the future prospects of civilian supremacy in the country. It will be of interest to students and scholars of South Asian Politics, Political Sociology and Security Studies, as well as policy-makers, diplomats, security experts and military professionals.

The Islamic State Yoram Schweitzer 2016-03-16 The Islamic State burst onto the Middle East scene as an entity whose conduct and very essence challenge the existing regional order. With its military conquests in Iraq and Syria, its establishment of branches elsewhere in the Middle East and beyond, its state-like governance in the areas under its control, and the cruelty it typically exhibits, the Islamic State has become the focus of regional and international interest and concern. The articles compiled in *The Islamic State: How Viable Is It?* examine ways of dealing with one of the most salient military, sociopolitical, cultural, and intellectual challenges on today's global agenda. There are numerous question marks surrounding the future of the Islamic State. Relating to historical, religious, military, economic, social, cultural, and geopolitical aspects, the articles in this volume address many of the questions prompted by the dramatic emergence of the Islamic State and

examine ideas on how to grapple with this phenomenon. Taken together, they paint a portrait of the complex reality that has evolved in the Middle East in recent years, and attempt to outline future trends. In addition to this multidisciplinary interpretation of the Islamic State and its related challenges, the collection presents insights that can assist in formulating policies to cope with this challenging situation.

State-Building in Kazakhstan Dina Sharipova

2018-07-05 This study examines informal institutions of reciprocity and their connections to state-building in Kazakhstan. The author analyzes both how these institutions changed over time and how they bridged the transition from the Soviet to post-Soviet periods.

The Hundred Years' War on Palestine Rashid Khalidi 2020-01-28 A landmark history of one hundred years of war waged against the Palestinians from the foremost US historian of the Middle East, told through pivotal events and family history In 1899, Yusuf Diya al-Khalidi, mayor of Jerusalem, alarmed by the Zionist call to create a Jewish national home in Palestine, wrote a letter aimed at Theodore Herzl: the country had an indigenous people who would not easily accept their own displacement. He warned of the perils ahead, ending his note, "in the name of God, let Palestine be left alone." Thus Rashid Khalidi, al-Khalidi's great-great-nephew, begins this sweeping history, the first general account of the conflict told from an explicitly Palestinian perspective. Drawing on a wealth of untapped archival materials and the reports of generations of family members—mayors, judges, scholars, diplomats, and journalists—The Hundred Years' War on Palestine upends accepted interpretations of the conflict, which tend, at best, to describe a tragic clash between two peoples with

claims to the same territory. Instead, Khalidi traces a hundred years of colonial war on the Palestinians, waged first by the Zionist movement and then Israel, but backed by Britain and the United States, the great powers of the age. He highlights the key episodes in this colonial campaign, from the 1917 Balfour Declaration to the destruction of Palestine in 1948, from Israel's 1982 invasion of Lebanon to the endless and futile peace process. Original, authoritative, and important, The Hundred Years' War on Palestine is not a chronicle of victimization, nor does it whitewash the mistakes of Palestinian leaders or deny the emergence of national movements on both sides. In reevaluating the forces arrayed against the Palestinians, it offers an illuminating new view of a conflict that continues to this day.

Deterrence Stability and Escalation Control in South Asia Henry L. Stimson Center 2013-12-13

India and Pakistan have developed and flight tested seventeen new nuclear weapon delivery vehicles since testing nuclear devices in 1998 - an average of more than one per year. Military doctrines have also evolved to emphasize more rapid mobilization to engage in limited conventional warfare. Diplomacy to reduce nuclear risks has lagged far behind nuclear weapon-related advances and doctrinal change. Since 1998, Pakistan and India have negotiated four notable military-related Confidence-Building and Nuclear Risk Reduction Measures. No new measures have been agreed upon since 2007. There is no basis for deterrence stability on the Subcontinent when diplomacy and nuclear risk reduction are moribund while nuclear capabilities grow and military doctrines evolve. The most desirable off-ramp to increased nuclear dangers is to secure normal relations with a nuclear-armed neighbor. This collection of essays - the product of bi-monthly discussions at the Stimson Center - provides analysis and ideas for deterrence stability and escalation control on the Subcontinent. This pursuit awaits leadership in India and Pakistan that is strong enough to persist in the face of violent acts

designed to disrupt progress.

Routledge Handbook of Asian Borderlands

Alexander Horstmann 2018-04-09 In Asia, where authoritarian-developmental states have proliferated, statehood and social control are heavily contested in borderland spaces. As a result, in the post-Cold War world, borders have not only redefined Asian incomes and mobilities, they have also rekindled neighbouring relations and raised questions about citizenship and security. The contributors to the Routledge Handbook of Asian Borderlands highlight some of these processes taking place at the fringe of the state. Offering an array of comparative perspectives of Asian borders and borderlands in the global context, this handbook is divided into thematic sections, including:

Livelihoods, commodities and mobilities Physical land use and agrarian transformations Borders and boundaries of the state and the notion of statelessness Re-conceptualizing trade and the economy in the borderlands The existence and influence of humanitarians, religions, and NGOs The militarization of borderlands Causing us to rethink and fundamentally question some of the categories of state, nation, and the economy, this is an important resource for students and scholars of Asian Studies, Border Studies, Social and Cultural Studies, and Anthropology.

Pakistan's Drift into Extremism: Allah, the Army, and America's War on Terror Hassan Abbas

2015-03-26 This book examines the rise of religious extremism in Pakistan, particularly since 1947, and analyzes its connections to the Pakistani army's corporate interests and U.S.-Pakistan relations. It includes profiles of leading Pakistani militant groups with details of their origins, development, and capabilities. The author begins with an historical overview of the introduction of Islam to the Indian sub-continent in 712 AD, and brings the story up to the present by describing President Musharraf's handling of the war on terror. He provides a detailed account of the political developments in Pakistan since 1947 with a focus on the influence of

religious and military forces. He also discusses regional politics, Pakistan's attempt to gain nuclear power status, and U.S.-Pakistan relations, and offers predictions for Pakistan's domestic and regional prospects.

Cotton Production Khawar Jabran 2019-08-05

Provides a comprehensive overview of the role of cotton in the economy and cotton production around the world This book offers a complete look at the world's largest fiber crop: cotton. It examines its effect on the global economy—its uses and products, harvesting and processing, as well as the major challenges and their solutions, recent trends, and modern technologies involved in worldwide production of cotton. Cotton Production presents recent developments achieved by major cotton producing regions around the world, including China, India, USA, Pakistan, Turkey and Europe, South America, Central Asia, and Australia. In addition to origin and history, it discusses the recent advances in management practices, as well as the agronomic challenges and the solutions in the major cotton producing areas of the world. Keeping a focus on global context, the book provides sufficient details regarding the management of cotton crops. These details are not limited to the choice of cultivar, soil management, fertilizer and water management, pest control, cotton harvesting, and processing. The first book to cover all aspects of cotton production in a global context Details the role of cotton in the economy, the uses and products of cotton, and its harvesting and processing Discusses the current state of cotton management practices and issues within and around the world's cotton producing areas Provides insight into the ways to improve cotton productivity in order to keep pace with the growing needs of an increasing population Cotton Production is an essential book for students taking courses in agronomy and cropping systems as well as a reference for agricultural advisors, extension specialists, and professionals throughout the industry.

Opportunities in the Development of Pakistan's Private Sector Sadika Hameed 2014-10-07 One of the barriers to investing in Pakistan's private sector has been the perceptions of risk due to insecurity and corruption. This report suggests that opportunities for economic cooperation are hidden among those real risks.

Sectarianism in Iraq Fanar Haddad 2014-05-03

Viewing Iraq from the outside is made easier by compartmentalising its people (at least the Arabs among them) into Shi'as and Sunnis. But can such broad terms, inherently resistant to accurate quantification, description and definition, ever be a useful reflection of any society? If not, are we to discard the terms 'Shi'a' and 'Sunni' in seeking to understand Iraq? Or are we to deny their relevance and ignore them when considering Iraqi society? How are we to view the common Iraqi injunction that 'we are all brothers' or that 'we have no Shi'as and Sunnis' against the fact of sectarian civil war in 2006? Are they friends or enemies? Are they united or divided; indeed, are they Iraqis or are they Shi'as and Sunnis? Fanar Haddad provides the first comprehensive examination of sectarian relations and sectarian identities in Iraq. Rather than treating the subject by recourse to broad-based categorisation, his analysis recognises the inherent ambiguity of group identity. The salience of sectarian identity and views towards self and other are neither fixed nor constant; rather, they are part of a continuously fluctuating dynamic that sees the relevance of sectarian identity advancing and receding according to context and to wider socioeconomic and political conditions. What drives the salience of sectarian identity? How are sectarian identities negotiated in relation to Iraqi national identity and what role do sectarian identities play in the social and political lives of Iraqi Sunnis and

Shi'as? These are some of the questions explored in this book with a particular focus on the two most significant turning points in modern Iraqi sectarian relations: the uprisings of March 1991 and the fall of the Ba'ath in 2003. Haddad explores how sectarian identities are negotiated and seeks finally to put to rest the alarmist and reductionist accounts that seek either to portray all things Iraqi in sectarian terms or to reduce sectarian identity to irrelevance.

Climate Change and National Security Daniel Moran 2011-03-22 In this unique and innovative contribution to environmental security, an international team of scholars explore and estimate the intermediate-term security risks that climate change may pose for the United States, its allies and partners, and for regional and global order through the year 2030. In profiles of forty-two key countries and regions, each contributor considers the problems that climate change will pose for existing institutions and practices. By focusing on the conduct of individual states or groups of nations, the results add new precision to our understanding of the way environmental stress may be translated into political, social, economic, and military challenges in the future. Countries and regions covered in the book include China, Vietnam, The Philippines, Indonesia, India, Pakistan, Bangladesh, Central Asia, the European Union, the Persian Gulf, Egypt, Turkey, the Maghreb, West Africa, Southern Africa, the Northern Andes, and Brazil.

Combating Terrorism Shruti Pandalai 2019

The Coronavirus Crisis and Challenges to Social Development Maria do Carmo dos Santos Gonçalves 2022-01-03 This book is a novel contribution to academic discourses on the coronavirus (COVID-19) crisis and how it has impacted societies globally. It proffers an overview on the social development and political measures, from both the Global North and Global South, to prevent COVID-19's spread. It

illuminates major social, political and economic challenges that already existed in different contexts and which are also currently being amplified by COVID-19. Curiously, this global pandemic has opened spaces for different actors, across the globe, to begin to fundamentally question and challenge the hegemony of the Global North, which sometimes is evident in social work. Linked to the foregoing and while reflecting beyond the pandemic and into the future, the book proposes that social work must become more political at all levels, and strive to transform societies, global social development efforts, and economic and health systems. This contributed volume of 38 chapters discusses and analyses ethical, social, sociological, social work and social development issues that complement and enrich available literature in the socio-political, economics, public health, medical ethics and political science. It provides various case studies which should enable readers to gain insights into how countries have responded to the pandemic and learn how COVID-19 negatively impacted countries in different parts of the world. This book also provides a platform for the articulation of neglected and marginalized voices, such as those of indigenous populations, the poor, or oppressed. The chapters are grouped according to three main themes as they relate to research on the COVID-19 pandemic and social work in Africa, Asia, Europe, Latin America and North America: Analysis: Social Issues and the COVID-19 Pandemic Strategies and Responses in Social Work: Globally and Locally Outlook: Looking Ahead Beyond the Pandemic Intended to engage a global, diverse and interdisciplinary audience, *The Coronavirus Crisis and Challenges to Social Development* is a timely and relevant resource for academics, students and researchers in inter alia Social Work, Philosophy, Sociology, Economics, and Development Studies. *How Tobacco Smoke Causes Disease* 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports

have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Government of Paper Matthew S. Hull 2012-06-05 "Drawing inspiration from actor-network theory, science studies, and semiotics, this brilliant book makes us completely rethink the workings of bureaucracy as analyzed by Max Weber and James Scott. Matthew Hull demonstrates convincingly how the materiality of signs truly matters for understanding the projects of 'the state.'" - Katherine Verdery, author of *What was Socialism, and What Comes Next?* "We are used to studies of roads and rails as central material infrastructure for the making of modern states. But what of records, the reams and reams of paper that inscribe the state-in-making? This brilliant book inquires into the materiality of information in colonial and postcolonial Pakistan. This is a work of signal importance for our understanding of the everyday graphic artifacts of authority." - Bill Maurer, author of *Mutual Life, Limited: Islamic Banking, Alternative Currencies, Lateral Reason* "This is an excellent and truly exceptional ethnography. Hull presents a theoretically sophisticated and empirically rich reading that will be an invaluable resource to scholars in the field of Anthropology and South Asian studies. The author's focus on bureaucracy, "corruption," writing systems and urban studies (Islamabad) in a post-colonial context makes for a unique ethnographic engagement with

contemporary Pakistan. In addition, Hull's study is a refreshing voice that breaks the mold of current representation of Pakistan through the security studies paradigm." - Kamran Asdar Ali, Director, South Asia Institute, University of Texas

The Future of Pakistan Stephen P. Cohen

2011-10-01 With each passing day, Pakistan becomes an even more crucial player in world affairs. Home of the world's second-largest Muslim population, epicenter of the global jihad, location of perhaps the planet's most dangerous borderlands, and armed with nuclear weapons, this South Asian nation will go a long way toward determining what the world looks like ten years from now. The Future of Pakistan presents and evaluates several scenarios for how the country will develop, evolve, and act in the near future, as well as the geopolitical implications of each. Led by renowned South Asia expert Stephen P. Cohen, a team of authoritative contributors looks at several pieces of the Pakistan puzzle. The book begins with Cohen's broad yet detailed overview of Pakistan, placing it within the context of current-day geopolitics and international economics. Cohen's piece is then followed by a number of shorter, more tightly focused essays addressing more specific issues of concern. Cohen's fellow contributors hail from America, Europe, India, and Pakistan itself, giving the book a uniquely international and comparative perspective. They address critical factors such as the role and impact of radical groups and militants, developments in specific key regions such as Punjab and the rugged frontier with Afghanistan, and the influence of—and interactions with—India, Pakistan's archrival since birth. The book also breaks down relations with other international powers such as China and the United States. The all-

important military and internal security apparatus come under scrutiny, as do rapidly morphing social and gender issues. Political and party developments are examined along with the often amorphous division of power between Islamabad and the nation's regions and local powers. Uncertainty about Pakistan's trajectory persists. The Future of Pakistan helps us understand the current circumstances, the relevant actors and their motivation, the critical issues at hand, the different outcomes they might produce, and what it all means for Pakistanis, Indians, the United States, and the entire world. Sukardi Rinakit 2005 "Because the military is an integral part of Indonesia's power structure, it is of interest to anyone studying Indonesian affairs. This volume is the first study to address the role of the military in post-Soeharto Indonesia. The author is a former ghostwriter at the Indonesian Ministries of Home Affairs and Defence. He is privy to the internal dynamics of the military and has personally interviewed such untouchable figures as former President Soeharto. As such, this is an up-to-date, well-informed study providing a useful contribution to the literature, particularly with regard to the younger generation of the military."-- BOOK JACKET.
