The Organic Machine Richard White 2011-04-01 The Hill and Wang Critical Issues Series: concise, affordable works on pivotal topics in American history, society, and politics. In this pioneering study, White explores the relationship between the natural history of the Columbia River and the human history of the Pacific Northwest for both whites and Native Americans. He concentrates on what brings humans and the river together: not only the physical space of the region but also, and primarily, energy and work. For working with the river has been central to Pacific Northwesterners' competing ways of life. It is in this way that White comes to view the Columbia River as an organic machine--with conflicting human and natural claims--and to show that whatever separation exists between humans and nature exists to be crossed.

The Longest Silence Thomas McGuane 2014-08-06 From the highly acclaimed author of Ninety-two in the Shade and Cloudbursts comes a collection of alternately playful and exquisite essays—including seven collected here for the first time—borne of a lifetime spent fishing. "Thomas McGuane writes about fishing better than anyone else in the history of mankind." —Jim Harrison, New York Times bestselling author of Legends of the Fall The forty extraordinary pieces in The Longest Silence take the reader from the tarpon of Florida to the salmon of Iceland, from the bonefish of Mexico to the trout of Montana. They introduce characters as varied as a highly literate Canadian frontiersman and a devoutly Mormon river guide and address issues ranging from the esoteric art of tying flies to the enduring philosophy of a seventeenth-century angler to the trials of the aging fisherman. Both reverent and hilarious by turns, and infused with a deep experience of wildlife and the outdoors, The Longest Silence sets the heart pounding for a glimpse of moving water and demonstrates what dedication to sport reveals about life.

Shaun Morey is a fisherman, a connoisseur of fish stories, and a journalist with a novelist's eye (and vice versa) in this collection of over 100 incredible (and true!) fishing stories. Here are Remarkable Catches—like the time Billy Sandifer caught a 1,000-pound tiger shark in the surf (he released it after nabbing a souvenir tooth). Grueling Battles—like Bob Ploeger's record-breaking 37-hour fight with a Pacific salmon. Hilarious Feats of Bravery, like the exploits of Matt Watson, who leapt out of a helicopter to land on the back of a marlin. And, in what can only be considered poetic justice, Shocking Acts of Fish Aggression, like Mitchell Lee Franklin's visit to the emergency room with a 5-pound catfish attached to his chest via an impaled dorsal fin. Includes illustrations, photos, and links to videos on the author's website.

Toxic Loopholes Craig Collins 2010-03-08 The EPA was established to enforce the environmental laws Congress enacted during the 1970s. Yet today lethal toxins still permeate our environment, causing widespread illness and even death. Toxic Loopholes investigates these laws, and the agency charged with their

enforcement, to explain why they have failed to arrest the nation's rising environmental crime wave and clean up the country's land, air and water. This book illustrates how weak laws, legal loopholes and regulatory negligence harm everyday people struggling to clean up their communities. It demonstrates that our current system of environmental protection pacifies the public with a false sense of security, dampens environmental activism, and erects legal barricades and bureaucratic barriers to shield powerful polluters from the wrath of their victims. After examining the corrosive economic and political forces undermining environmental law making and enforcement, the final chapters assess the potential for real improvement and the possibility of building cooperative international agreements to confront the rising tide of ecological perils threatening the entire planet.

Border Flows Lynne Heasley 2016 Declining access to fresh water is one of the twenty-first century's most pressing environmental and human rights challenges, yet the struggle for water is not a new cause. The 8,800-kilometer border dividing Canada and the United States contains more than 20 percent of the world's total freshwater resources, and Border Flows traces the century-long effort by Canada and the United States to manage and care for their ecologically and economically shared rivers and lakes. Ranging across the continent, from the Great Lakes to the Northwest Passage to the Salish Sea, the histories in Border Flows offer critical insights into the historical struggle to care for these vital waters. From multiple perspectives, the book reveals alternative paradigms in water history, law, and policy at scales from the local to the transnational. Students, concerned citizens, and policymakers alike will benefit from the lessons to be found along this critical international border.

In this new collection of essays on fishing —and hunting—Gierach discusses fishing for trout in Alaska, for salmon in Scotland and for almost anything in Texas. He offers his perceptive observations on the subject of ice-fishing, getting lost, fishing at night, tournaments and the fine art of tying flies. Gierach also shares his hunting technique, which involves reading a good book and looking up occasionally to see if any deer have wandered by. Always entertaining, often irreverent and illuminating, Gierach invites readers into his enviable way of life, and effortlessly sweeps them along. As he writes in Dances with Trout, “Fly-fishing is solitary, contemplative, misanthropic, scientific in some hands, poetic in others, and laced with conflicting aesthetic considerations. It's not even clear if catching fish is actually the point.”
