Some More Connections Richard MacArthur, M.d. 2017-03-03 Richard MacArthur, MD, understands the power poetry has to reflect life in all its joy, love, and unexpected pain. In *Some More Connections*, MacArthur's third book of verse, he digs deep into his personal life to produce a new collection of poignant, powerful poems. MacArthur's verses run the gamut of human emotions, from the sweetest phases of love to the challenges of dealing with a debilitating disease. No subject is too small or too grand to escape MacArthur's pen-he jumps effortlessly from the loss of a beloved pet to pride in his country's history and from memories of his medical training to the miracle of new life. To read MacArthur's poems is to open yourself to your own memories, experiences, and emotions. He reminds readers of the simple joys of life as well as disappointments, triumphs, heartaches, and wonder. Written in MacArthur's trademark style-short, punchy lines of evocative free verse-*Some More Connections* follows in the poetic footsteps of his earlier works, *Connections* and *More Connections*. Fans will find poems at once familiar in tone and varied in subject, while new readers will delight in the discovery of a poet who dares to share his deepest feelings.

competitors, the only way they were going to win was to push the limit, go for broke, and hope for more than a little luck. By the time they got to the racetrack, they knew: In the fog of fierce competition, whether you win or lose, you learn the hardest lessons about engineering, teamwork, friendship, and yourself.

Historical strengths rest in the broad use of applications, the easy-to-understand writing style, and the wealth of examples and exercises to reinforce conceptualization of the subject matter. Rotorcraft Aeromechanics Wayne Johnson 2013-04-29 A rotorcraft is a class of aircraft that uses large-diameter rotating wings to accomplish efficient vertical take-off and landing. The class encompasses helicopters of numerous configurations (single main rotor and tail rotor, tandem rotors, coaxial rotors), tilting proprotor aircraft, compound helicopters, and many other innovative configuration concepts. Aeromechanics covers much of what the rotorcraft engineer needs: performance, loads, vibration, stability, flight dynamics, and noise. These topics include many of the key performance attributes and the often-encountered problems in rotorcraft designs. This comprehensive book presents, in depth, what engineers need to know about modelling rotorcraft aeromechanics. The focus is on analysis, and calculated results are presented to illustrate analysis characteristics and rotor behaviour. The first third of the book is an introduction to rotorcraft aerodynamics, blade motion, and performance. The remainder of the book covers advanced topics in rotary wing aerodynamics and dynamics.

White Hart Down Ian Cooper 2020-08-02 'Very fair, tries hard, plays keenly, steadily improving his game. Should be useful when he is older.' - School report, Autumn 1971. Meet Ian Cooper: responsible for some of the most sublime moments in sports history. In his head. He never shirked a tackle, never missed a game (except for the one he did), and ran and ran and ran. Mostly away. He never hit any marathon walls though, because he was too busy building them. The mucky exploits of Sunday morning football on Wandsworth Common means he has, quite literally, always been full of shit. A promise to get his daughter to the Champions League final on time, if Spurs ever got there, means he has to break the habits of a lifetime. His eyes went a long time ago. His mind's on a yellow card. His heart's still in it. A sporting tale (as old as time) of openness, honesty and the redeeming, affirming qualities of friendship, love, three little birds and two gerbils. 'White Hart Down' is a journey that takes us places we've all been. As sporting memoirs go it's a heartfelt, thoughtful, honest but delightful meander down memory lane.

Fitrah- Mans Natural Disposition MURTADHA. MUTAHHARI 2021-11-27 "Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi'rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given by the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural

disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.
