ASEAN Law and Regional Integration Diane A Desierto
2020-12-30 Since the passage of the ASEAN Charter in 2008, ASEAN has transformed itself from a loose economic cooperation, into a formal intergovernmental organization designed to create an "ASEAN Community" forged together in three pillar communities - the ASEAN Political-Security Community, ASEAN Economic Community, and tASEAN Socio-Cultural Community. Forty years of pre-Charter ASEAN practices, coupled with over ten years of post-Charter ASEAN practices thus far, has witnessed the conclusion of hundreds of legally binding regional treaties and similarly binding international instruments in all areas of economic, political-security, and socio-cultural concerns for Southeast Asia to achieve ASEAN's rule of law-based development objective. Pre-Charter and post-Charter ASEAN Law is variably implemented under a hybrid governance system that

depends heavily on ASEAN Member State national implementation alongside ASEAN's evolving regional institutions. The result is not a model of deep integration as in the case of the European Union, but a particular paradigm of horizontal embeddedness of ASEAN Law - in all its norms and operational practices - contingent on the capacities and compliance of national government bureaucracies in Southeast Asia. This edited collection is a concise authoritative volume covering the practical, doctrinal, legal, and policy aspects of the new regime of ASEAN Law and its consequences for realizing rule of law-based development in Southeast Asia's emerging single market and production base. Drawing together contributions from a range of key thinkers in the field, the editors present the legal and policy-making issues implicated in the practical implementation of Southeast Asia's single market and its regime for the free movement of goods, services, foreign investment, and cross-

border labor. The book also examines the nature of regional law-making under ASEAN before and after the commencement of regional integration in 2015, the nature of ASEAN's economic regulators, as well as the evolving structure for enforcement and harmonization of "ASEAN Law" through the array of Southeast Asian national courts, arbitral tribunals, and incipient mechanisms for inter-State, intra-regional, and individual-State conflict management and dispute resolution. This book is highly relevant to students, scholars, and policy-makers with an interest in ASEAN Law and regional policy, and to Southeast Asian studies in general.

Competition Law in Kenya Brenda Pamela Mey 2017-11-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in the Kenya covers every aspect of the subject - the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on

the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Kenya will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

Consumer Involvement in Private EU Competition Law

Enforcement Maria Ioannidou 2015-09-03 Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law. *Consumer Involvement in Private EU Competition Law Enforcement* is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures, and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy-makers, and practitioners in the field.

To End a Plague Emily Bass 2021-07-06 "Randy Shilts and Laurie Garrett told the story of the HIV/AIDS epidemic through the late 1980s and the early 1990s, respectively. Now journalist-historian-activist Emily Bass tells the story of US engagement in HIV/AIDS control in sub-Saharan Africa. There is far to go on the path, but Bass tells us how far we've come." —Sten H. Vermund, professor and dean, Yale School of Public Health With his 2003 announcement of a program known as PEPFAR, George W. Bush launched an astonishingly successful American war against a global pandemic. PEPFAR played a key role in slashing HIV cases and AIDS deaths in sub-Saharan Africa, leading to the brink of epidemic control. Resilient in the face of flatlined funding and political headwinds, PEPFAR is America's singular example of how to fight long-term plague—and win. To End a Plague is not merely the definitive history of this extraordinary program; it traces the lives of the activists who first impelled President Bush to take action, and later sought to prevent AIDS deaths at the whims of American politics. Moving from raucous street protests to the marbled halls of Washington and the clinics and homes where Ugandan people living with HIV fight to survive, it reveals an America that was once capable of real and meaningful change—and illuminates imperatives for future pandemic wars. Exhaustively researched and vividly written, this is the true story of an American moonshot.

Thirty Years of SAARC Rajiv Kumar 2016-05-23 This book traces economic and political issues through SAARC's thirty-year journey. Topical and well-researched, this collection provides a comprehensive assessment of SAARC and provides policy directives for the future. The book points out the issues and constraints that have hindered regional cooperation in South Asia. It establishes that despite being democracies, there has been little effort by member nations to promote regional cooperation in the public domain. It stresses that in view of the increased role that countries wish to play in globalisation, economic cooperation is the way forward. The book further argues that political will is the pivot on which the prospect of regional cooperation revolves.

EU Regional Trade Agreements Maryna Rabinovych 2021-04-07 This book unveils the potential of utilizing EU Regional Trade Agreements (RTAs) as an instrument of promoting the rule of law to third states. In doing so, the book combines development economics, foreign policy and legal perspectives at three levels of analysis of four sectors to introduce the concept of "EU value-promoting RTAs". The book demonstrates that the EU RTAs bear considerable potential to be strategized as instruments of promoting the rule of law in third states, requiring, however, overcoming strict divides between EU political and economic cooperation, and values and acquis conditionality in its relations with third countries. This book will be of key interest to scholars and students of European Studies, European Union Law, EU external action/foreign policy, EU trade agreements and Development Studies, as well as to NGOs and think tanks that work on European affairs.

Search Stefan Weitz 2016-11-03 Search is as old as language. We've always needed to find something in the jumble of human creation. The first web was nothing more than passing verbal histories down the generations so others could find and remember how not to get eaten; the first search used the power of written language to build simple indexes in printed books, leading to the Dewey Decimal system and reverse indices in more modern times. Then digital happened. Besides having profound societal impacts, it also made the act of searching almost impossibly complex for both engines and searchers. Information isn't just words; it is pictures, videos, thoughts tagged with geocode data, routes, physical world data, and, increasingly, the machines themselves reporting their condition and listening to others'. Search: How the Data Explosion Makes Us Smarter holds up a mirror to our time to see if search can keep up. Author Stefan Weitz explores the idea of access to help readers understand how we are inventing new ways to search and access data through devices in more places and with more capabilities. We are at the cusp of imbuing our generation with superpowers, but only if we fundamentally rethink what search is, how people can use it, and what we should demand of it. "Search: How The Data Explosion Makes Us Smarter" is the first title from GreenHouse Collection. Created by the founders of Insight Labs, the world's first philanthropic think tank, GreenHouse Collection features books that encourage deeper exploration and inquiry to inform new models for social good.

Excellence Gaps in Education Jonathan A. Plucker 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education, Jonathan A. Plucker and Scott J. Peters shine a spotlight on "excellence gaps"—the achievement gaps among subgroups of students performing at the highest levels of achievement. Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial, ethnic, or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency. Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities. Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American, Hispanic, Native American, and poor students, resulting in an incalculable loss of potential among our fastest growing populations. Drawing on the latest research and a wide range of

national and international data, the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination. They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies, including universal screening, flexible grouping, targeted programs, and psychosocial interventions. Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high-potential students from underrepresented backgrounds.

Major Infrastructure Projects Edward Ochieng 2017-09-16 In this unique and comprehensive textbook, the authors examine the challenges faced all around the world with regard to major infrastructure project management, and they champion a fresh approach that takes into account the interdependencies between economic, social, political, technological and legislative environments. Managing, developing and investing in crucial infrastructure is essential to keep up with the challenges of a fast-paced and globalised world, but affecting and overseeing change requires a deep understanding of complex interlocking systems. To this end the book is neatly divided into three key parts: project appraisal, maximising integrated supply chains, and implementing value-enhancing practices. This is the ideal companion for courses on any aspect of civil engineering and construction project management including modules in infrastructure planning, infrastructure management, construction management and business management. The book will also appeal to practitioners involved in the management of capital and infrastructure projects.

Promoting Sustainable Innovations in Plant Varieties

Mrinalini Kochupillai 2016-07-28 This book develops the term 'Sustainable Innovations' and defines it on the basis of plant variety innovations that, by their very nature, (i) permit the in situ conservation of agrobiodiversity and genetic variability in diverse geographic and climatic conditions, (ii) do not exclude any potential innovators from the process of innovation, and thereby (iii) ensure that both formal and informal innovations can continue to take place in the generations to come (in both the developed and developing world). The book studies the Indian Plant Variety Protection Act, the UPOV Acts and associated agricultural policies from a legal, philosophical, historical and economic perspective with the aim of determining the means of promoting sustainable innovations in plant varieties and identifying laws, policies and practices that are currently acting as impediments to promoting the same.

The Future of African Peace Operations Cedric De Coning 2016-03-15 Facing threats ranging from Islamist insurgencies to the Ebola pandemic, African regional actors are playing an increasingly vital role in safeguarding peace and stability across the continent. But while the African Union has demonstrated its ability to deploy forces on short notice and in difficult circumstances, the challenges posed by increasingly complex conflict zones have revealed a widening divide between the theory and practice of peacekeeping. With the AU's African Standby Force becoming fully operational in 2016, this timely and much-needed work argues that responding to these challenges will require a new and distinctively African model of peacekeeping, as well as a radical revision of the current African security framework. The first book to provide a comprehensive overview and analysis of African peace operations, *The Future of African Peace Operations* gives a long overdue assessment of the ways in which peacekeeping on the continent has evolved over the past decade. It will be a vital resource for policy makers, researchers and all those seeking solutions and insights into the immense security challenges which Africa is facing today.
