Lamborghini Supercars 50 Years Stuart Codling 2015-06-01 Immerse yourself in this complete guide on Lamborghini's ultimate performance cars. Nearly 50 years ago, upstart high-end sports car manufacturer Lamborghini set the performance car world on its ear with its stunning supercar, the Miura. Wrapped in a svelte Marcello Gandini - designed body and powered by a 350-horsepower V-12, the Miura instantly made every other car look antiquated. In 1974, Lamborghini again shocked the automotive world with the mad Countach (an Italian expression one might utter at the sight of a beautiful woman), another Gandini masterpiece. Wide, low, and menacing, the original Countach completely recalibrated the supercar template. The Diablo replaced the Countach in 1990 and was the last of the Lamborghini supercars under the auspices of the "original" company. Audi acquired the company in 1997 and would bring significant German endurance to bear, turning out supercars to a new template: the Murielago in 2001, the Gallardo in 2003, the Reventon in 2008, the Aventador in 2011, and, most recently, the appropriately named Huracan. Each one is an ultimate car. Many were collector vehicles from the moment they rolled off the production line. Beneath their stunning bodywork lie chassis and powerplants bristling with the best technology of their respective eras. Lamborghini's latest supercars zip from 0 to 60 miles per hour in under 3 seconds and hit top speeds in excess of 220 miles per hour. Their prices are equally staggering. Lamborghini Supercars 50 Years is devoted exclusively to all of Lamborghini's ultimate performance cars. No enthusiast of these world-class sports cars will want to miss it!

The Art of the Muscle Car David Newhardt 2013-05-19 "Just what is a Muscle Car?" Road Test magazine asked in June 1967. The answer: "Exactly what the name implies. It is a product of the American car industry adhering to the hot rodder's philosophy of taking a small car and putting a BIG engine in it. . . . The Muscle Car is Charles Atlas kicking sand in the face of the 98 horsepower weakling." Unconcerned with such trivial details as comfort and handling, the vintage American muscle car was built for straight-line speed and quickly became the ride of choice for power-hungry racers and serious gearheads. In a country where performance was measured in brute force, a quarter mile at a time, the muscle car was the perfect machine. In the intervening years, these down-and-dirty, high-performing beauties have earned their place in the automotive pantheon. As prized by collectors and aficionados as they are by denizens of garages and drag strips, classic muscle cars now fetch upwards of a million dollars at auctions and feature in any story of America's automotive glory days. The icons of muscle car art—including Camaro and Chevelle SS, the Hemi and 440-6 'Cuda, Challenger, Roadrunner, Super Bee, GTX, Super Bird, Daytona Charger, Super Cobra Jet and Boss Mustang, Talladega Torino, Buick GSX and W30 Oldsmobile 442, and AMX Javelin—are all here, on full display in this lavishly illustrated volume, each described in a detailed essay followed by a gallery of portraits and special gatefold presentations that capture the art of the muscle car at its finest.

Sports cars are the athletes of the automotive world. Always nimble and quick, often powerful, sports cars fly where other cars lumber, and dash where others plod. Sports cars have offered road and track excitement for nearly 100 years. The original cars evolved for racing, but their appeal and popularity ensured that production versions were soon available for those whose sporting intents never left the boulevard or winding back road. Each featured car includes a profile discussing the car's place in sports car history along with technical and performance specs as well as a smattering of historical images and period ads.
