**The French Revolution: A History in Documents** Micah Alpaugh 2021-01-14 The French Revolution: A History in Documents explores the rapidly evolving political culture of the French Revolution through first-hand accounts of the revolutionary (and counterrevolutionary) actors themselves. It demonstrates how radical Enlightenment philosophy fused with a governmental crisis to create a moment of new political possibilities unlike any the world had previously seen. In so doing, the French and their allies generated a template for revolutionary possibility from which virtually all subsequent political movements - liberalism, abolitionism, socialism, anarchism, conservatism, feminism and human rights included - derived inspiration. As well as providing an invaluable general introduction, vital contextual notes and thematic bibliographies, Micah Alpaugh selects a fascinating range of pieces, drawing on Parisian, provincial, colonial, and even international voices. From Enlightened dissent to apologias for terror, from declarations of human rights to accounts of slave rebellions, from passionate arguments for democratization to the authoritarian pronouncements of Napoleonic rule, this book presents the French Revolution's evolution in all its awesome complexity. In addition to classic texts, Alpaugh includes many lesser-known sources, a number of which are translated into English here for the first time. This unique collection of 13 visual sources and over 90 documents, incorporating perspectives from across class, gender, race and nationality, provides you with insights into the fervent debates, pronouncements and proposals that spawned modern politics.

**English Students at Leiden University, 1575-1650** Daniela Prögler 2016-05-13 The oldest and most renowned Dutch university, Leiden was an attractive proposition for travelling foreign students in the seventeenth and eighteenth centuries. Alongside offering an excellent academic program and outstanding facilities, Leiden was also able to cater to the desires of noble students providing various extra-curricular activities. Leiden was the most popular continental university among English students, and this book investigates the 831 English students who studied there between 1575 and 1650. The preference of English students for Leiden was, on the one hand, related to close Anglo-Dutch relations of the period, and these are investigated with respect to politics, economy, religion, culture, as well as to the large 'stranger' communities residing in the respective countries. On the other hand, Leiden's attraction resulted from its academic achievements, which are traced back to the conditions in the United Provinces, the limited influence of the Calvinist Church, Leiden's professors, as well as the university's facilities. The core of this study is an exhaustive quantitative study of the composition of the Leiden student population in general, and that of its English segment in particular. Information is provided on the duration of the studies of English students at Leiden, their age, social background and fields of study. We learn about the careers of English students both prior to and after their time at Leiden, and of the motivation that led the English to choose Leiden over other continental universities. More than a study of one group of students at one university, this book is a valuable contribution to the history of early modern universities and will appeal to a wide international readership interested in cultural and intellectual history as well as in Anglo-Dutch relations.

**When Texas Prison Scams Religion** Michael G. Maness 2023-05-22 When Texas Prison Scams Religion exposes corruption in the Texas Department of Criminal Justice, especially in the abuse of religion. In many ways, this book is a literature review of 1,800-plus works that defends freedom of conscience in prison while exposing the unconstitutionality of the seminary program that "buys faith with favor" from prisoners. The state veritably ordains the prisoner a "Field Minister" that represents the offices of the Governor, TDCJ Director, and wardens throughout the prison. Therein, TDCJ lies about neutrality in a program all about Christian missions and lies again in falsely certifying elementary Bible students as counselors. Why is the director sponsoring psychopaths counseling psychopaths? In fact, TDCJ pays \$314 million a year to UTMB for psychiatric care and receives not a single report of the care given, and worse, for UTMB generates no reports itself. The underbelly TDCJ's executive culture of cover up is exposed. TDCJ has hired the lowest qualified of the applicant pool many times in the last 25 years and regularly destroys statistics on violence. TDCJ Dir. Collier led the prison to model Louisiana Warden Burl Cain, the most scandal-ridden in penal history according to a host of published news stories for 20 years. Therein, Collier led TDCJ to favor the smallest segment of religious society within Evangelical Dominionism. Texas has no business endorsing the truth of any religion over another. We close with a proposal that utilizes the 400,000,000 hours of officer contact over ten years as a definitive influence in contrast to a commissioner that spends less than 10 minutes on each decision. Maness has been lobbying Austin for 15 years to definitively access staff for his "100,000 Mothers' 1% Certainty Parole Texas Constitutional Amendment," which would revolutionize prison culture and save Texans millions of the dollars.

**Climate-Smart Food** Dave Reay 2019-01-01 This open access book asks just how climate-smart our food really is. It follows an average day's worth of food and drink to see where it comes from, how far it travels, and the carbon price we all pay for it. From our breakfast tea and toast, through breakeime chocolate bar, to take-away supper, Dave Reay explores the weather extremes the worlds farmers are already dealing with, and what new threats climate change will bring. Readers will encounter heat waves and hurricanes, wildfires and deadly toxins, as well as some truly climate-smart solutions. In every case there are responses that could cut emissions while boosting resilience and livelihoods. Ultimately we are all in this together, our decisions on what food we buy and how we consume it send life-changing ripples right through the global web that is our food supply. As we face a future of 10 billion mouths to feed in a rapidly changing climate, its time to get to know our farmers and herders, our vintners and fisherfolk, a whole lot better. Dave Reay is Professor of Carbon Management at the University of Edinburgh, UK. He has studied climate change for over 20 years, from warming impacts in the Southern Ocean, through carbon fluxes in forests, to greenhouse gas emissions from wetlands and agriculture. In 2018 he received the Chancellor Award for Teaching for his work in climate change education. His latest project involves managing a large area of coastal land in Scotland to regrow native tree species and trap a lifetimes carbon.
