fascinating animal', Kenneth Sherman writes, and it is this fascination that drives the narrative in *Words for Elephant Man*. Written in the voice of Joseph Merrick, the 'Elephant Man' plagued with a disfiguring condition that ravaged much of his body, Sherman reveals his subject to be more than just a living fascination. Sherman's Merrick, acutely observant, is equally fascinated by those around him. Using found lines from historical record interwoven with his own beautifully rendered verse, Sherman's collection triumphs as a haunting, eloquent portrait of a man whose body was both disabler and enabler, a man who was both a commodity and a salesman, mechanical and organic, and whose extraordinary

The Coldest Place on Earth Tim Vicary
2007-12-27 In the summer of 1910, a race began. A race to be the first man at the South Pole, in Antarctica. Robert Falcon Scott, an Englishman, left London in his ship, the Terra Nova, and began the long journey south. Five days later, another ship also began to travel south. And on this ship was Roald Amundsen, a Norwegian. But Antarctica is the coldest place on earth, and it is a long, hard journey over the ice to the South Pole. Some of the travellers never returned to their homes again. This is the story of Scott and Amundsen, and of one of the most famous and dangerous races in history.

The Invisible Gorilla

Christopher Chabris 2010-05-18 Reading this book will make you less sure of yourself--and that's a good thing. In *The Invisible Gorilla*, Christopher Chabris and Daniel Simons, creators of one of psychology's most famous experiments, use remarkable stories and counterintuitive scientific findings to demonstrate an important truth: Our minds don't work the way we think they do. We think we see ourselves and the world as they really are, but we're actually missing a whole lot. Chabris and Simons combine the work of other researchers

with their own findings on attention, perception, memory, and reasoning to reveal how faulty intuitions often get us into trouble. In the process, they explain:

- Why a company would spend billions to launch a product that its own analysts know will fail
- How a police officer could run right past a brutal assault without seeing it
- Why award-winning movies are full of editing mistakes
- What criminals have in common with chess masters
- Why measles and other childhood diseases are making a comeback
- Why money managers could learn a lot from weather forecasters

Again and again, we think we experience and understand the world as it is, but our thoughts are beset by everyday illusions. We write traffic laws and build criminal cases on the

assumption that people will notice when something unusual happens right in front of them. We're sure we know where we were on 9/11, falsely believing that vivid memories are seared into our minds with perfect fidelity. And as a society, we spend billions on devices to train our brains because we're continually tempted by the lure of quick fixes and effortless self-improvement. The Invisible Gorilla reveals the myriad ways that our intuitions can deceive us, but it's much more than a catalog of human failings. Chabris and Simons explain why we succumb to these everyday illusions and what we can do to inoculate ourselves against their effects. Ultimately, the book provides a kind of x-ray vision into our own minds, making it
