An Illustrated Encyclopedia of Uniforms of World War II 2015-07 Jonathan North This is an expert guide to the uniforms of Britain, America, Germany, USSR and Japan, together with other Axis and Allied forces. It is an incredible directory of the military personnel of the period, with 600 images, including photographs and illustrations of uniforms, kit, weaponry and equipment. It analyses the context of the conflict, and the ideology and politics that motivated the various national forces, as well as the experience of the soldiers who fought on the front lines. World War II was a huge conflict, fought on different fronts, covering diverse terrain and involving the fighting men of dozens of nations. At the outbreak of war in 1945 military uniforms had changed little from those worn by the soldiers of World War I, but as the conflict progressed changes were made to adapt to fighting and living conditions. This book covers in detail what the soldiers who fought in the war wore, from British infantrymen in Normandy to Japanese troops in Burma, and from Finnish ski divisions to female Chinese partisans. Lavishly illustrated, with intricate insignia detail, this book offers a definitive visual study of a pivotal period of history.

An Illustrated Encyclopedia of the Uniforms of the Roman World 2012 Kevin F. Kiley This book details the uniforms of the Roman army and its enemies, from the first decades of tribal warfare in Italy, through the republican and imperial periods, up to the end of the eastern Roman Empire.

An Illustrated Encyclopedia 2006 Digby Smith This book brings a highly eventful period of European history to life, chronicling the battles, campaigns and skirmishes of the conflict and the political triumphs and declines of the combatant forces. The book's main focus, however, is the soldiers who fought these battles, and the uniforms that they wore. It was in this age of war that military uniforms flourished, with an astonishing array of flamboyance, style and intricate detail. This comprehensive volume presents not only a unique visual directory of Napoleonic uniforms, but an enlightening and evocative portrait of the political, military and social context of the soldiers who fought at the time.

An Illustrated Encyclopedia of Uniforms from 1775-1783, the American Revolutionary War 2008 Digby Smith The America that emerged from the War of Revolution in 1783 as an independent nation was very different from the one that had entered it eight years earlier. At the beginning of the war America was divided between anti-British revolutionaries and pro-British loyalists: there was no regular army as such, and militia units were made up of untrained, often unarmed civilians. America was also divided between north and south, and in some respects the war of revolution was also a civil war. The other combatant nations in the conflict were equally complex, with German mercenaries fighting on behalf of the British, and the French coming in to support the Americans along with Spanish, Dutch and official German forces. Native American Indians also fought on both sides of the conflict, as did Afro-American slaves. In this crucible of war, Americans hammered out a new republican and democratic nation as well as shaping a regular standing army. The men who fought in this multi-faceted war span the whole spectrum of American and European society, from farmers in the US Militia to highly experienced British and French generals, and from Native American warriors to German soldiers of fortune. The uniforms of the fighting men of the period are a vivid illustration of the difficulties and complexities of the conflict, and this book brings together for the first time a sweeping survey of what they should have worn, what they really wore, how they were armed, and what they carried with them. There is an additional section on the war at sea, in which Britain's vastly superior and experienced navy was gradually over-stretched and beleaguered by distance from home, lengthy delays in strategic orders, and the vast expanse of the American coastline. As well as illustrations of the soldiers, equipment and kit - with over 600 colour pictures in total and an unrivalled level of detail in the depiction of the uniforms - the campaigns and battles are explained with specially commissioned maps and plans, and colour plates and fine-art paintings of the period. The expert text, a collaboration of renowned military historians Kevin F. Kiley and Digby Smith, examines the organization, tactics and experience of the men-at-arms of these pivotal and formative times. This comprehensive volume presents not only a unique visual directory of uniforms, but an evocative portrait of the political, military and social contexts of the soldiers of the time.

The Armed Forces of World War II 2002-02-01 Andrew Mollo For many years, military historians and artists, collectors of militaria, war-gamers and war enthusiasts in general have felt the need for a comprehensive record of the uniforms, insignia and organisation of the fighting men of World War II. This remarkable book provides just such a record. Andrew Mollo is one of the leading British military historians with a worldwide reputation and his book is the result of years of study and research. His text not only details the design of uniforms and insignia but also describes their effectiveness in the field and how this affected the fighting ability of the troops themselves. An impressive series of 350 full-colour drawings has been specially commissioned for this book. These are supported by 160 photographs of the combatants in action, along with 53 plates of insignia. The authenticity of the drawings, together with the comprehensive descriptions, make The Armed Forces of World War II an invaluable source of reference for all students of military uniform.

International Encyclopedia of Military History 2004-12 James C. Bradford With its impressive breadth of coverage - both geographically and chronologically - the International Encyclopedia of Military History is the most up-to-date and inclusive A-Z resource on military history. From uniforms and military insignia worn by combatants to the brilliant military leaders and tacticians who commanded them, the campaigns and wars to the weapons and equipment used in them, this international and multi-cultural two-volume set is an accessible resource combining the latest scholarship in the field with a world perspective on military history.

Spies in Uniform 2006 Matthew S. Seligmann This book counters such revisionist arguments. Matthew Seligmann disputes the suggestion that the British government either got its facts wrong about the German threat or even, as some have claimed, deliberately 'invented' it in order to justify an otherwise unnecessary alignment with France and Russia. By examining the military and naval intelligence assessments forwarded from Germany to London by Britain's service attaches in Berlin, its 'men on the spot', Spies in Uniform clearly demonstrates that the British authorities had every reason to be alarmed.

Mein Kampf 2021-03-19 Adolf Hitler 'MEIN KAMPF' is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF' was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany's deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany. The books narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Second volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and 'public statements' constitute a partial revision of his book and are to be taken as such. Also, the author has translated Hitler's ideal, the Volkischer Staat, as the People's State. The author has tried his best making German Vocabulary easy to understand. You will never be satisfied until go through

the whole book. A must read book, which is one of the most widely circulated and read books worldwide.

Steampunk Soldiers 2014-11-20 Philip Smith Between 1887 and 1895, the British art student Miles Vancroft travelled around the world, sketching and painting the soldiers of the countries through which he passed. In this age of dramatic technological advancement, Vancroft was fascinated by how the rise of steam technology at the start of the American Civil War had transformed warfare and the role of the fighting man. This volume collects all of Vancroft's surviving paintings, along with his associated commentary on the specific military units he encountered. It is a unique pictorial guide to the last great era of bright and colourful uniforms, as well as an important historical study of the variety of steam-powered weaponry and equipment that abounded in the days before the Great War of the Worlds.

German Army Uniforms of World War II 2021-02-04 Stephen Bull In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the

German Army fought - from the North African desert to the Russian steppe - prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent in the period from September 1939 to May 1945.

Camouflage At War 2017-04-14 Martin J Dougherty Today we would be very surprised to see a soldier going into battle in red trousers and blue coats, but that is how French soldiers first fought in the trenches of the Western Front in World War I. Camouflage at War explores uniforms, military vehicles and buildings from World War I to the present day. From a dummy tank in North Africa in World War II to the different uniforms of Waffen-SS on the Eastern Front soldiers to zebra-striped dazzle ships in the north Atlantic to today's digital pixelated pattern uniforms used by US soldiers in Iraq and Afghanistan, the book is a wide-ranging examination of the developments and wrong turns in military camouflage all around the world. Although this was military work, the inspiration often came from the natural world and the designers were civilian artists. As we move further into the 21st century, the use of camouflage is changing. Straightforward visual camouflage is less important for aircraft as they can be picked up by heat sensors, so the task becomes to create non-visual camouflage, deflect radar signals and reduce their signature. Today, technology is being developed to project live images on to bodies, so that they appear invisible. From uniforms to tanks, from ships to aircraft to military buildings disguised as civilian ones, the book is an expert account of how different countries have sought to hide their forces in plain view for the past century. Packed with 200 colour and black and white photographs and colour artworks, Camouflage at War is a fascinating exploration of how warfare has changed over the last hundred years.

British Napoleonic Uniforms 2009-03-15 C. E. Franklin For the first time in print a book identifies each regiment and illustrates the change in uniforms, the colour of the facings and the nature and shape of the lace for the officers, NCOs and private soldiers over the period of the Napoleonic War 1793-1815. In British Napoleonic Uniforms, Carl Franklin's lavishly illustrated third volume for The History Press, these changes to the uniforms of all the numbered regiments of cavalry and infantry are discussed in detail. It is illustrated with more than two hundred full-colour plates of the uniforms and every aspect of their regimental distinctions. The book is divided into four parts. Part One looks at the commonalities of the cavalry and considers uniforms appropriate to each regiment such as headwear, the evolution of the uniforms and horse furniture. Part Two considers the uniforms of the heavy and light cavalry regiments. It includes full-page colour illustrations of the Household Cavalry, the Heavy Cavalry (Dragoon Guards and Dragoons), and Light Cavalry (the Light Dragoons and Hussars). Part Three shows the commonalities of the infantry and considers the uniform appropriate to each regiment, such as those of the Drummers and Highland Regiments, as well as their tartans. Part Four discusses the uniforms and distinctions of the infantry, including the regiments of Foot Guards and Infantry of the Line (Fusiliers, Light Infantry, Riflemen and Highland Regiments). For this revised edition Carl Franklin has updated many of the artworks and provided a colour guide specifically for modellers.

British Army Uniforms from 1751 to 1783 2013-05-19 Carl Franklin "Of great use to anyone interested in the 18th century British Army as well as illustrators and others who need detailed information."—Classic Arms and Militaria Based on records and paintings of the time, this book identifies each cavalry and infantry regiment and illustrates changes in uniforms, their facing

colors, and the nature and shape of lace worn by officers, NCOs and private soldiers from 1751 to 1783. Regiments that served in the American War of Independence are noted and the book includes more than 200 full-color plates of uniforms and distinctions. Divided into four sections, it not only details the cavalry and infantry uniforms of the period but also the tartans of the Highland regiments, some of which were short-lived, and the distinction of the Guards regiments. "A superb reference work, full of clearly researched details...it will be of value to family and military historians, re-enactors, figure painters, and wargamers."—FGS Forum

Armies of the Seven Years War 2013-05-13 Digby Smith Drawn from many international sources, many not employed before in English-language publications, *Armies of the Seven Years War* is the finest reference work on this most complex of conflicts. It details the senior commanders, uniforms, weapons, equipment, artillery, strategy and tactics (military and naval) of the forces that fought - in effect - for world supremacy from 1756 to 1763. States involved included Austria, Bavaria, Britain, Brunswick, Hanover, Hessen-Darmstadt, Hessen-Kassel, France, the Palatinate, Portugal, Prussia, Russia, Spain, Sweden, Württemberg and the minor states of the Holy Roman Empire. The colonial struggle in North America is not neglected. Coverage of the uniforms and colours is in depth. The tactics of the 'horse and musket' era are examined, as are Frederick the Great's abilities as a war leader who led his armies against the rest of continental Europe. With over 280 illustrations and specially commissioned battle maps, *Armies of the Seven Years War* is an invaluable resource for the modeller and wargamer, as well as a clear analysis of an extraordinary period of international conflict for all those with an interest in the history of empire. William Pitt, 1st Earl of Chatham, Britain's war leader, stated that 'America was won in Germany.' How could Prussian successes on the continent of Europe have sounded the death knell for New France and Spanish ambitions in North America? *Armies of the Seven Years War* explains the connection and the outcomes of all the complex alliances that led to the 'first world war'.

Revenge an illustrated encyclopedia of military uniforms of...**Acupuncture and Autism**

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. Children who are diagnosed with this illness may also suffer from secondary problems such as aggression, irritability, stereotypes, hyperactivity, negativism, volatile emotions, temper tantrums, short attention span and obsessive-compulsive behavior.

The eighth myth is that acupuncture is only used in third world countries. This is not true because this technique originated in China more than 2000 years ago and this has spread to developed nations in Asia such as Japan, South Korea, Singapore and Malaysia.

Here at home, acupuncture been practiced for more than 2 decades and is legal in 30 states. In fact 22 of them, license professionals after they graduate once they pass the state board examination.

Although acupuncture has been around for a very long time, there is still a need for this form of holistic healthcare which is why this is being taught in colleges and in use today. It is painless and cost efficient and a lot of studies have shown that it is effective in treating various illnesses and preventing some of them.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

Learn an illustrated encyclopedia of military uniforms of; Although there are risks if you decide to go undergo acupuncture, these can be avoided as long as the one doing it is a licensed professional who makes sure that the needles used are sterilized before they are inserted into the body.

These days, a lot of people in the medical field have accepted the fact that alternative medicine such as this can also help the patient which is why they may refer someone when it is needed.

So, if you are tired of experiencing the side effects of conventional medicine and want to try a holistic form of healthcare, why don't you see what acupuncture can do for you? It is painless and cost effective. In fact, it is just one of many you can try to help treat a chronic condition.

Anyone can try facial acupuncture because it is painless and it has proven to reverse the signs of aging. However, if you are pregnant, suffer from the colds or flu, have acute herpes or an allergic reaction, it is best to wait until this has passed.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes.

Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

Opportunity an illustrated encyclopedia of military uniforms of-This has resulted in the establishment of clinics nationwide that only use acupuncture as the means of rehabilitation. Acupuncturists in the US charge from \$75 to \$150 per session. This usually gets lower in the succeeding treatments. The person will probably have to undergo 10 to 15 treatments 2 to 3 times a week but this really depends on the condition of the patient. Before you go to one, you should check if this is covered by your insurance. If it isn't, perhaps you should suggest that it should be included as it is much cheaper than having to undergo surgery.

Part of the curriculum will also include basic courses in traditional medicine covering subjects such as anatomy, biosciences, medical terminology, herbal medicine, moxibustion, and acupressure. In some schools, they may require students to also learn about nutrition and various kinds of research.

Once they graduate, they may start in an entry level position earning \$40,000 or more which will soon double or triple after years of experience and working themselves up the ladder.

If you want to look for a school that offers acupuncture degrees, it is best to go online and see which one has the best program that suits your requirements.

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

Reading an illustrated encyclopedia of military uniforms of~**How does sticking needles into your body help manage the stress?**

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, youd typically have less of an ability to deal with stress. Youd get more irritable and find it really to difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the bodys wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner's credentials to ensure a safe and effective acupuncture treatment.

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

The duration of your treatment varies depending on the nature of your problem. Some are easy to fix compared to others especially if you are dealing with something long term. For instance, alcoholics and drug users may quit their vices after 3 or 4 months while those suffering from a disease like autism will take years as there is no know cure yet for the this illness.

Before the needles are inserted, you need to undergo a physical examination and answer a few questions. There are risks involved even though it is a painless procedure because the needle might hit something vital inside but if the specialist is good, then there is nothing to worry about.

You may notice a spot of blood when the needles come off. But if you are concerned about it, talk to your acupuncturist so he or she can prescribe something.

There is also auricular acupuncture where it is believed that the ear is a microcosm of the body. This means that acupuncture needles are placed on certain points on the ear so it can treat certain addiction disorders.

Myofascially-based acupuncture is often utilized by physical therapists as it involves feeling the meridian lines in search of tender points before applying needles as this is where abnormal energy flows.

Japanese styles of acupuncture referred to as "meridian therapy," tend to put more emphasis on needling technique and feeling meridians in diagnosis.

The question now is whether you should get free accounting software or not. It's only a download away but before anything else, there are some things that you need to look for in accounting software; consider the following tips.

Large companies who want to promote products and marketing campaigns are now providing the public with free accounting software. You have to surf the internet diligently so that you can immediately take advantage of it.

You can find a lot of free things online but you should be warned about scams. There are dishonest websites that tell surfers they offer free accounting software that are downloadable. The site will ask you to provide personal information on their registration forms and then ask for the number of your credit card. Legitimate websites that offer free accounting software will not request for any personal information.

You will then be given a physical exam to check your pulse and observe the shape, color and coating of your tongue. Other things that are checked will be the color and texture of the skin and your posture as this will give clues to your health.

Only then will you be told to lie down on a padded examining table and the needles are inserted to the skin. The difference with this kind of needle is that they twirl and jiggle each time they are pushed further into the body.

You may not feel them at all and if you do, it will only be a twitch that soon goes away. Once they are in place, this will be left there for 15 to 60 minutes that may make you feel very relaxed and sleepy that you may even doze off. Once the session is complete, the needles are removed and you will be on your way.

Study an illustrated encyclopedia of military uniforms of; The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

How well the acupuncture treatment will go depends also on specialist who will be performing it. You have to take into account their years of experience and skill so they are able to make the correct diagnosis, finding the acupoints in the body, the angle at which the needles will be inserted and the techniques they know as there are different types of acupuncture.

This brings us to asking ourselves how to find a skill acupuncturist. For this to work, we have to do ask our doctor if they can refer anyone. It wouldn't hurt to also do some research online. After all, there are about 3,000 acupuncturists all across the country so it won't be that hard to find one.

Solutions an illustrated encyclopedia of military uniforms of,Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Life Lessons from an illustrated encyclopedia of military uniforms of: There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

Analysis an illustrated encyclopedia of military uniforms of;Common Oral Health Problems in Adolescents

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels. An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

Along with doctor consultation, a psychologist must also be consulted who can deal with the emotional challenges of the adolescent. The family should also play an active role in making the youngster feel better. The family should work in collaboration with physician, dietitian and diabetes educators. Teachers, counselors, school nurses, day care providers, and other community members can provide extended support and guidance. They can provide help with transportation, mental health counseling, health education, social services and financial services.

Eating Disorders in Adolescents

Since the adolescence is the age where bones are sprout and grow rapidly, well nourished food must be given to the adolescent to facilitate normal growth & development. The nutritional intake must be monitored regularly and modified depending upon the growing needs. Teenagers tend to develop eating disorders which affect their nutritional health. The eating behavior must be corrected as early as possible as it can lead to the development of complex illnesses. Eating disorder is the third common chronic illness, especially in adolescent females and the number has been increasing rapidly from the past thirty years.

Project an illustrated encyclopedia of military uniforms of-Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

observation an illustrated encyclopedia of military uniforms of~There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and

even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

History an illustrated encyclopedia of military uniforms of:Family and school support is necessary to tackle the depression of the adolescent. Parents can get their children admitted in emotional growth schools, boot camps or wilderness programs, to solve the behavioral problems. These programs consist of non medical staff and confrontational therapies. But care must be taken as some of the programs can in turn harm children who are depressed and sensitive. Adolescents, who get caught due to criminal offense, should be taken special care of by their parents. It is best that the child face the consequences and learn a lesson from it. Depressed adolescents respond well to treatment if they are treated comprehensively and early. More than half of the adults are known to have depression when they were in their teens.

Diabetes in adolescents

Diabetes is a rapidly growing, serious health problem among youngster today. Above thirteen thousand adolescents are diagnosed for type 1 diabetes, every year in America. There has also been an increase in the number of teenagers with type 2 diabetes, which was more common among adults above forty and who were overweight. Clinics are reporting that nearly half of the new childhood diabetes cases are of type 2. Adolescents, who are obese and had type 2 diabetes in the family history, are at a greater risk of developing diabetes.

Eating disorders not only result in physical abnormalities, but also psychological abnormalities. Adolescents with eating disorders take onto social isolation, low self esteem, affective disorders, low self concept, substance abuse, anxiety, and depression. Usually adolescents switch to unhealthy eating habits because of depression and lack of knowledge about affective techniques to lose weight. So the patients who are being treated for eating disorders must also be treated for psychiatric illness, if they have any. Even if the habits doesn't fit the strict criteria, adolescents who limit food intake, binge, vomit or purge accompanied with or without harsh weight loss, should be monitored because of the involvement of risk of even death. Early treatment will have an improved outcome. But the level of intervention in adolescents should be less when compared to adults.

Eye problems and injuries in Adolescents

Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products.

It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. Also, no children must be around while handling chemicals. While spraying, the nozzle must be turned away from the face. Fertilizers, pesticides and paints must be stored away from reach. While doing household activities proper protective gears such as goggles, gloves, boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. The instructions for opening the tops of bottles must be read carefully to avoid them from popping and injuring other people. Children and adolescents should read instructions before handling operating equipment before playing games. All power equipment must be installed with guards. While playing outside, the eyes must be protected by UV protective goggles and it is a bad idea to look at the sun directly.

The best part about acupuncture is that there are no harmful side effects and no chance for an addiction to occur. The patient will have to come back for regular treatment and have to pay attention to one's diet and exercise regularly as needles can only do so much to control one's weight.

The number of treatments for someone who is overweight varies depending on how many pounds they want to lose, the speed at which they want to lose it and their commitment to sticking to the plan.

The average patient on the other hand who wants to lose 5 to 10 pounds will have to come for treatment every three days or twice a week then once this is attained, once every two weeks. It is up to the person until when the treatment will be done which shows that acupuncture can help you lose weight.

In some instances the combination of both the methods might be the way to go for acne treatment. Topical medication is nothing but creams, gels, lotions, solutions etc. prescribed to patients for acne treatment. Some of the examples of topical medication are: Benzoyl Peroxide which kills the Propionibacterium Acnes bacteria, antibiotics helps in stopping or slowing down the growth of the bacteria and also reduces inflammation. Retinoin helps in stopping the formation of new acne lesions and Adapalene reduces formation of comedo.

Systemic drug therapies involve prescription of systemic antibiotics primarily for the treatment of acne problem which is moderate to severe in nature. The examples of antibiotics prescribed are Doxycycline, erythromycin and tetracycline. In some cases an oral drug called Isotretinoin is prescribed for teenagers with severe acne problem which shrinks down the sebaceous glands that produce oil. The results are pretty good and almost ninety percent of the adolescents have success with this oral drug. But the drug has some serious side-effects and thus it is very important that one consults a doctor before use.

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

observation an illustrated encyclopedia of military uniforms of:But acupuncture only reached the US in the early 80's with the establishment of a regulatory board called the National Commission for Acupuncture and Oriental Medicine. As a result, various schools have been built and those who want to become licensed acupuncturists are now able to practice their profession. Despite that, there were a lot of people who are not yet convinced on the positive effects of alternative forms of medication. It was only in 1995 that the US Food and Drug Administration decided to classify the needles used for acupuncture as medical instruments and assured the public that they are both safe and effective.

To further promote acupuncture, the NIH or National Institute of Health in 1997 has stated that this technique is very useful in treating various health conditions. These include ear, nose, throat, respiratory, gastrointestinal, eye, nervous system and muscular disorders. In some cases, acupuncture is able to prevent some of them from happening.

The symptoms of Osgood-Schlatter disease are swelling of knee, tenderness below knee area and limping. The doctor will check the medical history of the patient and will conduct physical examination and diagnostic procedures such as taking an X-ray. The physician will decide on the treatment to be done by studying the overall health, age, medical history, tolerance for certain medications and extent of the disease. Treatment will include medications, rest, compression, elevation, neoprene knee sleeve and physical therapy. The main aim will be to control and limit the knee pain by cutting down on the adolescent's physical activities. Usually the Osgood-Schlatter disease gets healed over a period of time and in very rare cases is a surgery required.

Slipped capital femoral epiphysis is a problem which affects the hip joint. The ball or head of the thigh bone, also known as femoral head slips from the thigh bone's neck. Because of this the hip joint becomes stiff and painful. Slipped capital femoral epiphysis is the most common disorder of the hip which can happen in both the hips or one and it is more common in boys when compared to girls. Basically, adolescents of the age ten to eighteen years and who are overweight can be affected by this condition. The condition can arise over a time interval of few weeks or years. The condition, if resulted because of trauma and is also called acute slip and if results after a period of time is called chronic slip. Slipped capital femoral epiphysis is caused because of medications, radiation treatment, thyroid problems, and chemotherapy.

There are three degrees of intensity of slipped capital femoral epiphysis, mild, moderate and severe. In mild slipped capital femoral epiphysis, only one third of femoral head slips from the thigh bone. In moderate, one third to half slips and in severe, more than half of the femoral head slips. The symptoms of this condition are pain in hip which increases upon movement, pain in thigh, knee & groin and limpness in the leg. When an adolescent walks there will be a clicking sound in the hip and his/her legs will be turned outwards.

OCD is a sign of brain circuitry's unusual functioning and it involves the striatum part of the brain. The brain activity patterns of such people differ from normal people and people with other mental disorders. Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult.

Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wontedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.

Most acupuncturists will target the spots behind the ear when it comes to promoting weight loss. When these points behind the ear are stimulated, endorphins are released in large doses.

Endorphins are called the feel-good hormones, and these are also often referred to as natural pain and fever relievers. The release of endorphins is what makes you feel better after an increased level of physical activity, as in the case of a good workout.

These bodily compounds allow the patient to experience better relaxation, thus considerably alleviating stress. There is a greater possibility of enhanced weight loss when the patient has already achieved emotional wellness. Endorphins are also released whenever the body experiences low levels of bodily pain, thus their moniker as a natural pain reliever.

Consulting with a Professional Acupuncturist

There are a number of acupuncture practitioners in existence nowadays, offering a host of services. If you are considering this form treatment for your weight management, make sure that you

settle with no less than a trained and professional acupuncturist. A poorly trained acupuncturist may not be able to pinpoint the specific meridian points and worse, may cause unnecessary bodily pain and discomfort.

Moreover, your acupuncturist may require an herbal supplement for your treatment, to encourage a longer-term effect. Your sessions need not be maintained for an extensive period; however you may be required to visit your acupuncturist during the entire course of the sessions.

There are other means for losing weight successfully, and this does not include crash dieting and strenuous work outs. If carried out by trained professionals, acupuncture can be the answer for effective weight management. While it is far from being a cure-all, it may just be the right weight loss solution for you.
