intensifying complexity of legal framework, and the proliferating number of countries adopting indirect taxation, it is essential to scrutinize how the law is actually applied in practice. The primary driving force in this area is, undoubtedly, the Court of Justice of the European Union. This book analyses selected topics (e.g. the Charter of Fundamental Rights of the European Union and VAT, taxable base and rates, exemptions, and deductions) by examining the most prominent and recent judgments of the Court of Justice of the European Union. Experts from all over the world, not just from academia but also government representatives and tax practitioners, have provided their input and helped us compile what is an informative and worthy read for anyone dealing with indirect taxation on a professional basis.

Drawing Investigations 2020-06-11 Sarah Casey Using close visual analysis of drawings, artist interviews, critical analysis and exegesis, Drawing Investigations examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed. How does drawing add shape to ideas? How does the artist accommodate to challenges and restraints of a particular environment? To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative? Casey and

Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments. Drawing Investigations evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world, urban environment, social forces and lived experience. Examples represent a spectrum of research in international contexts: an oceanographic Institute in California, the archives of Amsterdam's Rijksmuseum, the Antarctic Survey, geothermal research in Japan and the Kurdish diaspora in Iraq. Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents. By exploring drawing's capacity to capture and describe experience, to sharpen visual faculties and to bridge

Undocumented Migrants and their Everyday Lives 2021-04-22 Jussi S. Jauhiainen This open access monograph provides an overview of the everyday lives of undocumented migrants, thereby focusing on housing, employment, social networks, healthcare, migration trajectories as well as their use of the internet and social media. Although the book's empirical focus is Finland, the themes connect the latter to broader geographical scales, reaching from global migration issues to the EU asylum policies, including in the post-2015 situations and during the COVID-19 pandemic, as well as from national, political, and societal issues regarding undocumented migrants to the local challenges, opportunities, and practices in municipalities and communities. The

book investigates how one becomes an undocumented migrant, sometimes by failing the asylum process. The book also discusses research ethics and provides practical guidelines and reflects on how to conduct quantitative, qualitative, and mixed methods research about undocumented migrants. Finally, the book addresses emerging research topics regarding undocumented migrants. Written in an accessible and engaging style the book is an interesting read for students, scholars, policymakers, and practitioners.

The Desecularisation of the City
2018-09-21 David Goodhew Major cities
have long been seen as centres of
secularisation. However, the number
of congregations in London grew by
50% between 1979 and the present.
London's churches have been
characterised more by growth than by
decline in the decades since 1980.
The Desecularisation of the City
provides the first academic survey of
churches in London over recent
decades, linking them to similar
developments in other major cities
across the West. Produced by a large
team of scholars from a range of
disciplines, this volume offers a
striking and original portrait of
congregational life in London since
1980. Seventeen chapters explore the
diverse localities, ethnicities and
denominations that make up the church
in contemporary London. The vitality
of London's churches in the last four
decades shows that secularisation is

Sick-Note Britain 2019-03-01 Adrian Massey Dr Adrian Massey has worked at the intersection of medicine and society for decades. He argues compellingly that our hyper-medicalized society has falsely equated sickness with illness, and sickness with unfitness to work--whereas sickness is primarily a social problem requiring social, not medical, solutions. Sick-Note Britain lays bare Britain's gross error: when doctors cannot 'fix' anxiety or chronic pain, workplace attendance is

still treated as a matter for arbitration by our strained primary care service. What is needed is a tailored, employer-employee contractual solution, but obstacles block this approach: excessively complex employment law constraining both sides; an outdated benefits system that overburdens doctors and traumatizes the vulnerable; and a workplace culture that is too inflexible to keep sick employees in work. This is a blistering condemnation of a sham system that works for nobody, and an urgent call to rethink how we manage sickness-- for the sake of our economy, our wellbeing, and our health service.

we rarely stop to consider: How do these spaces affect our mental and physical well-being? Our thoughts, feelings, and behaviors? Our productivity, performance, and relationships? In this wide-ranging, character-driven book, science journalist Emily Anthes takes us on an adventure into the buildings in which we spend our days, exploring the profound, and sometimes unexpected, ways that they shape our lives. Drawing on cutting-edge research, she probes the pain-killing power of a well-placed window and examines how the right office layout can expand our social networks. She investigates how room temperature regulates our cognitive performance, how the microbes hiding in our homes influence our immune systems, and how cafeteria design affects what—and how much—we eat. Worldwide Mobilizations 2018-06-11
Don Kalb The past decades have seen significant urban insurrections worldwide, and this volume analyzes some of them from an anthropological perspective; it argues that transformations of urban class relationships must be approached in a way that is both globally informed and deeply embedded in local and popular histories, and contends that every case of urban mobilization should be understood against its precise context in the global capitalist transformation. The book examines cases of mobilization across the globe, and employs a Marxian class framework, open to the diverse and multi-scalar dynamics of urban politics, especially struggles for spatial justice.

modernization, while the contemporary use of prisons as heritage tends to reduce the process of colonial modernity to oppression and atrocity - thus constituting a heritage of shame and death, which postcolonial societies blame upon the former colonizers. A study of how the remembering of punishment and imprisonment reflects the attempts of postcolonial cities to re-articulate an understanding of the present by correcting the past, Heritage, Memory, and Punishment examines how prisons were designed, built, partially demolished, preserved, and redeveloped across political regimes, demonstrating the ways in which the selective use of prisons as heritage, reframed through nationalism, leaves marks on urban contexts that remain long after the prisons themselves are decommissioned. As such, it will appeal to scholars of sociology, geography, the built environment, and heritage with interests in memory

Power to the People 2019-10-01 Audrey Kurth Cronin Never have so many possessed the means to be so lethal. The diffusion of modern technology (robotics, cyber weapons, 3-D printing, autonomous systems, and artificial intelligence) to ordinary people has given them access to weapons of mass violence previously monopolized by the state. In recent years, states have attempted to stem the flow of such weapons to individuals and non-state groups, but their efforts are failing. As Audrey Kurth Cronin explains in Power to the People, what we are seeing now is an exacerbation of an age-old trend. Over the centuries, the most surprising developments in warfare have occurred because of advances in technologies combined with changes in who can use them. Indeed, accessible innovations in destructive force have long driven new patterns of political

violence. When Nobel invented dynamite and Kalashnikov designed the AK-47, each inadvertently spurred terrorist and insurgent movements that killed millions and upended the international system. That history illuminates our own situation, in which emerging technologies are altering society and redistributing power. The twenty-first century "sharing economy" has already disrupted every institution, including the armed forces. New "open" technologies are transforming access to the means of violence. Just as importantly, higher-order functions that previously had been exclusively under state military control - mass mobilization, force projection, and systems integration - are being harnessed by non-state actors. Cronin closes by focusing on how to respond so that we both preserve the benefits of emerging technologies yet reduce the risks.
