Current scientific research results and its practicality within organizations are presented. This includes aspects of organizational performance and its measurement comprising its shift from purely financially measured methods to multidimensional approaches. Practical solutions for the evaluation of management systems are suggested, which show the strategic relevance of management systems and its influence on process performance. The presented evaluation model offers an extended use of the balanced scorecard together with the strategic map-process, the execution premium and the plan-do-check-act-cycle of management systems providing an approach for scientists and practitioners to use and extend it.

(IoT), artificial intelligence (AI), intelligent BPMS and BPM Everywhere. WfMC Chair, Keith Swenson states; “A platform for digital transformation brings a number of different capabilities together: processes, agents, integration, analytics, decisions, and—perhaps most important—case management.” In this book, you will learn how support of adaptive, data-driven processes empowers knowledge workers to know in real-time what is happening at the edge points, and to take actions through the combination of rule-driven guidance and their own know-how. It is not a traditionally-automated system but intelligent adaptability, where technology doesn’t replace human decision-making but extends the reach of the knowledge worker; making data actionable. In award-winning case studies covering industries as diverse as law enforcement, public safety, transportation, insurance, banking, state services and healthcare, you will find instructive examples for how to transform your own organization. Leading industry analysts study the awards entries for emerging industry trends. Read the chapter, The Seven Trends Impacting The Case Management Landscape by Connie Moore, Digital Clarity Group. Открытые системы. СУБД No02/2016 2022-05-07 Открытые системы В номере: Как преуспеть в условиях экономики изобилия памяти? Технологии памяти последние 60 лет развивались «в тени» микропроцессоров, которые уже подошли к пределам роста своих возможностей. Чтобы «перезагрузить» мир вычислений, его центром надо сделать память, которой будет вдоволь, и тогда можно будет вывести на новый уровень производительность вычислений, связи и работы с памятью. Но при этом появятся и новые угрозы. Архитектура хранения для цифрового предприятия Рост объемов информации, повышенные требования к ее доступности, эффективности накопления и использования вызывают необходимость в системах хранения, которые должны быть одновременно емкими, надежными, практически безгранично масштабируемыми и недорогими. Традиционные архитектуры таким требованиям уже не удовлетворяют. Agile и DevOps на службе крупного бизнеса Облака, Большие Данные и Интернет вещей способны предоставить цифровому бизнесу конкурентные преимущества, однако традиционные ИТ уже не могут обеспечить поддержку новых бизнес-моделей, своевременную разработку новых сервисов и приложений или изменение уже имеющихся. Инструмент для стартапа Для реализации своих идей стартапы сегодня уже не нуждаются в непомерных средствах, однако им требуются инструменты, позволяющие быстро вывести продукт на рынок, чтобы продемонстрировать его возможности инвесторам и сразу получать прибыль. В этом им могут помочь хорошо себя зарекомендовавшие готовые средства интеграции. Судьбы твердотельной памяти Флеш не панацея, а всего лишь первый опыт замены жестких дисков. Развитие электронной твердотельной постоянной памяти в ближайшие годы будет диктоваться протоколом NVMe. Пять лет на Kotlin Разработчикам ПО сегодня необходимо выпускать не «национальные», а востребованные и качественные программы, для создания которых нужны эффективные инструменты и многое другое

Produktivitätsmanagement von Dienstleistungen 2017-01-30 Christopher Marc Schlick Das Buch richtet sich an Dienstleistungsmanager und -planer und beinhaltet ein Kompendium von Modellen, Methoden und Werkzeugen zur Messung, Bewertung und Steuerung der Produktivität von wissensintensiven Dienstleistungen. Neben einer modellbasierten, ganzheitlichen Betrachtung der Produktivität von Dienstleistungen werden die in empirischen Studien identifizierten Stellgrößen vorgestellt und deren Wechselwirkungen in einem System-Dynamics-Modell veranschaulicht. Des Weiteren wird eine Methode zum partizipativen Projektcontrolling eingeführt. Anhand von Fallbeispielen von international agierenden Unternehmen werden innovative Konzepte und Softwareprototypen demonstriert, mit denen auch schwach strukturierte Arbeitsprozesse, wie sie für wissensintensive Dienstleistungen typisch sind, effektiv modelliert, simuliert und optimiert werden können. Die dargestellten Modelle, Methoden und Werkzeuge sollen dem Leser als Unterstützung dienen, komplexe, wissensintensive Dienstleistungen optimal zu planen, während der Erbringung erfolgreich zu steuern und abschließend zu bewerten. Als Innovationsführer in verschiedenen wertschöpfungsstarken Branchen ist Deutschland insbesondere auf wissensintensive Dienstleistungen dringend angewiesen. Die Wettbewerbsfähigkeit der in diesem Segment tätigen Unternehmen ist bei steigendem Lebensstandard der Beschäftigten und einem latenten Mangel an Fachkräften vor allem durch eine Steigerung der Produktivität zu sichern.

Business Process Maturity 2014-01-27 Amy Van Looy Organisations face many challenges, which induce them to perform better, and thus to establish mature (or excellent) business processes. As they now face globalisation, higher competitiveness, demanding customers, growing IT possibilities, compliancy rules etc., business process maturity models (BPMMs) have been introduced to help organisations gradually assess and improve their business processes (e.g. CMMI or OMG-BPMM). In fact, there are now so many BPMMs to choose from that organisations risk selecting one that does not fit their needs or one of substandard quality. This book presents a study that distinguishes process management from process orientation so as to arrive at a common understanding. It also includes a classification study to identify the capability areas and maturity types of 69 existing BPMMs, in order to strengthen the basis of available BPMMs. Lastly it presents a selection study to identify criteria for choosing one BPMM from the broad selection, which produced a free online selection tool, BPMM Smart-Selector.

BPMN 2.0 2016-04-07 Thomas Allweyer BPMN (Business Process Model and Notation) is the established standard for business process modeling. Only a few years after its first publication, it has gained widespread adoption in practice. All important modeling tools support BPMN diagramming. It is possible to create business-oriented diagrams, but also technical models for process execution in business process management systems (BPMS). This book provides a stepwise introduction to BPMN, using many examples close to practice. Starting with the basic elements for modeling sequence flow, all BPMN 2.0 diagrams are presented and discussed in detail. You will gain a profound understanding of the complete notation, and you will be able to make correct use of the different language elements. In the second edition, a collection of useful modeling patterns has been added. These patterns provide best-practice solutions for typical problems arising in the practice of process modeling.

Green Business Process Management 2012-06-15 Jan vom Brocke Green Business Process Management – Towards the Sustainable Enterprise” consolidates the global state-of-the-art knowledge about how business processes can be managed and improved in light of sustainability objectives. Business organizations, a dominant part of our society, have always been a major contributor to the degradation of our natural environment, through the resource consumption, greenhouse emissions, and wastage production associated with their business processes. In order to

lessen their impact on the natural environment, organizations must design and implement environmentally sustainable business processes. Finding solutions to this organizational design problem is the key challenge of Green Business Process Management. This book- discusses the emerging challenges of designing "green" business processes,- presents tools and methods that organizations can use in order to design and implement environmentally sustainable processes, and- provides insights from cases where organizations successfully engaged in more sustainable business practices. The book is of relevance to both practitioners and academics who are interested in understanding, designing, and implementing "green" business processes. It also constitutes a valuable resource for students and lecturers in the fields of information systems, management, and sustainable development. Preface by Richard T. Watson

Marc 2001 Susanna Partsch Animal expressions: Franz Marc's search for a universal art Franz Marc (1880-1916) became known principally for his images of animals: blue horses, yellow tigers, red fawns. What was it that led him to concentrate on painting animals? Marc himself explained his choice of subject matter in these words: "From an early date I felt humankind to be 'ugly'; animals seemed to me possessed of a greater beauty and purity..." Seeing Marc merely as a painter of animals proves, however, premature. Marc, cofounder of the Blaue Reiter group of Expressionist artists, was deeply dissatisfied with the impurity of the world, and was on a quest for a universal art which would resolve the contrarities of life in the harmony of creation. Using pure colors highly charged with symbolic values, adopting crystalline shapes, and absorbing the influence of Cubism, he moved steadily towards an abstract order of image, coming closer to his own understanding of a better world. At the age of 36, Franz Marc's life was cut short when he died in the Battle of Verdun. About the Series: Each book in TASCHEN's Basic Art series features: a detailed chronological summary of the life and oeuvre of the artist, covering his or her cultural and historical importance a concise biography approximately 100 illustrations with explanatory captions

The facilitation of knowledge work or what is increasingly known as "Case Management" represents the next imperative in office automation. The desire to fully support knowledge workers within the workplace is not new. What's new is that recent advances in Information Technology now make the management of unpredictable circumstances a practical reality. There's now a groundswell of interest in a more flexible, dynamic approach to supporting knowledge work. Here are examples of what recognized experts have recently written on the topic: Advancing to support more knowledge work is the goal of many organizations, thus there is a new groundswell of activity around unstructured processes. - Jim Sinur, VP of Research, Gartner I think a sea change is coming in the process world. -Connie Moore, Research Vice President, Forrester The sea of change Moore refers to is about technology that is able to support knowledge workers. The work of a knowledge worker is by its nature unpredictable and can not be handled by more formalized process definition techniques. For executives and managers of knowledge workers, "Mastering the Unpredictable" will: Explain the need and why previous technological approaches don't meet the need Explain the current technology gap, and the new technology that can close the gap Lay out the options that can increase the efficiency and effectiveness of their organizations Equip them to best take advantage of this evolving trend"
