This book investigates how the gradual adoption of free market ideology has impacted on the realisation of socio-economic rights in both India and China and how the constitutional and legal frameworks have made necessary adjustments. Chapters in this volume, which are written by academics of international standing, explore how these two countries have tried to overcome certain common governance challenges in realising socio-economic rights. The role played by courts in India and China in the protection and realisation of socio-economic rights is considered along with the use and limitations of public interest litigation in achieving these rights. Finally, the effectiveness of measures in realising socio-economic rights are evaluated in relation to specific rights such as the rights to food, health, education, social security, and gender equality.
