Leak Detection 2013-06-30 Stuart Hamilton Ageing infrastructure and declining water resources are major concerns with a growing global population. Controlling water loss has therefore become a priority for water utilities around the world. In order to improve efficiencies, water utilities need to apply good practices in leak detection. Leak Detection: Technology and Implementation assists water utilities with the development and implementation of leak detection programs. Leak detection and repair is one of the components of controlling water loss. In addition, techniques are discussed within this book and relevant case studies are presented. This book provides useful and practical information on leakage issues.

Politics, Women and Well-Being 2016-07-27 Robin Jeffrey In 1990, Kerala on the southwestern coast has India's lowest infant mortality, longest life expectancy and highest female literacy. India's 'problem state' of the 1950s has become 'the Kerala model'. The collapse of a matrilineal social structure and a rigid caste system contributed to widespread politicization. Women retained a circumscribed but influential position in social life. The result is an instructive analysis for students of politics, development policy and women's issues.

The Family in India 1998 A. M. Shah This collection of essays on the family in India covers a wide range of theoretical methodological, substantive and policy issues. Professor Shah's work challenges many popularly held beliefs about the family in India.

Bewitching Women, Pious Men 1995-09-07 Aihwa Ong This impressive array of essays considers the contingent and shifting meanings of gender and the body in contemporary Southeast Asia. By analyzing femininity and masculinity as fluid processes rather than social or biological givens, the authors provide new ways of understanding how gender intersects with local, national, and transnational forms of knowledge and power. Contributors cut across disciplinary boundaries and draw on fresh fieldwork and textual analysis, including newspaper accounts, radio reports, and feminist writing. Their subjects range widely: the writings of feminist Filipinas; Thai stories of widow ghosts; eye-witness accounts of a beheading; narratives of bewitching genitals, recalcitrant husbands, and market women as femmes fatales. Geographically, the essays cover Singapore, Indonesia, Malaysia, Thailand, and the Philippines. The essays bring to this region the theoretical insights of gender theory, political economy, and cultural studies. Gender and other forms of inequality and difference emerge as changing systems of symbols and meanings. Bodies are explored as sites of political, economic, and cultural transformation. The issues raised in these pages make important connections between behavior, bodies, domination, and resistance in this dynamic and vibrant region.

The Divine Husband 2007-12-01 Francisco Goldman A devout woman finds herself adrift in late nineteenth-century Central America in this novel of "deep imagination, stylistic verve, and psychological acuity" (The Washington Post). Set in late nineteenth century Central America and New York City, The Divine Husband tells the story of María de las Nieves Moran, whose brief career as a nun is ended in the wake of revolution. Forced to make her way in the secular world, María is surrounded by an unforgettable cast of characters: José Martí, the poet and hero of Cuban independence and the first man María loves; Mack Chinchilla, the Yankee-Indio entrepreneur intent on winning her hand; a British diplomat setting up a

political impostor plot; and Mathilde, the daughter whose birth—perhaps fathered by one of these men—ruins María's reputation and launches her on a journey toward a new future. This joyfully imagined novel of ideas is populated by Indian girls, wandering Jewish coffee farmers, the founder of the rubber-balloon industry, and one of Latin America's greatest and most complex men. Written by Pulitzer Prize-finalist Francisco Goldman, The Divine Husband is a sweeping, poetic novel rich in historical detail and vivid characterization. "Goldman echoes Flaubert, García Marquez, and even DeLillo." —Bookforum

Women and Kinship 1997 Leela Dube This work sets out to compare the situation of women in South and South-East Asia and argues that kinship systems provide an important context in which gender relations are located. It looks at three types of kinship system found in their various forms in the two regions of Asia - patrilineal in South Asia and bilateral in South-East Asia, with a presence of matriliney in both. The treatment of kinship departs from what has been found, with gender permeating the examination of chosen themes. The results obtained suggest that South-East Asian women's degree of autonomy in economic and social life contrasts with the situation in South Asia which is characterized by strong patriliney and women's lack of rights.

Transformation english now 2009 2010 litconn pdf pdf-There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

Study english now 2009 2010 litconn pdf pdf. Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Common Oral Health Problems in Adolescents

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Consulting with a Professional Acupuncturist

There are a number of acupuncture practitioners in existence nowadays, offering a host of services. If you are considering this form treatment for your weight management, make sure that you settle with no less than a trained and professional acupuncturist. A poorly trained acupuncturist may not be able to pinpoint the specific meridian points and worse, may cause unnecessary bodily pain and discomfort.

Moreover, your acupuncturist may require an herbal supplement for your treatment, to encourage a longer-term effect. Your sessions need not be maintained for an extensive period; however you may be required to visit your acupuncturist during the entire course of the sessions.

There are other means for losing weight successfully, and this does not include crash dieting and strenuous work outs. If carried out by trained professionals, acupuncture can be the answer for effective weight management. While it is far from being a cure-all, it may just be the right weight loss solution for you.

Obesity can be caused due to complex reasons including biological, genetic, cultural and behavioral factors. Usually a person gets obese when he/she consumes more calories than the body burns. Also there are fifty percent chances of becoming obese when both one of the parent is obese and when obesity has affected both the parents, the chances increases to eighty percent. One percent of obese people can have that fat because of health reasons, as obesity can be caused due to few medical disorders. The causes of obesity in adolescence are overeating, family history, bad eating habits, little or no exercise, medical illness, low self esteem, medications, depression, emotional problems, stressful life, and family problem.

Obesity can cause many major problems. Some of them are diabetes, sleeping disorders, high blood pressure, breathing problems, emotional problems and increase in heart disease risk. Teenagers are more prone to get emotional problems. Because of the weight, they develop low self esteem. They get into depression, obsessive compulsion disorder and anxiety.

Adolescents who want to tackle the obesity problem should approach a pediatrician who will thoroughly evaluate the cause. If no physical disorder is to be blamed, the weight is reduced by limiting the calorie intake and increasing physical activity. The doctor can advice a weight management program and change the eating habits of the teenager, slowly. The patient must avoid oily, fatty, fast and junk food. The portions must be reduced in order to decrease the calorie intake. If the adolescent has developed emotional problems because of obesity, an adolescent psychiatrist can collaborate with the pediatrician in order to make a comprehensive plan for treatment. The plan includes reasonable goals, behavior modification, family participation, and management of physical activity.

Acupuncture in the Western World

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

Acupuncture is already a renowned method used in treating smoking addiction. An alternative medicine believed to have originated as far as 3000 BC in ancient China, this treatment is now being widely utilized for various medicinal and therapeutic purposes. It has been found furthermore to successfully treat drug dependence and chronic smoking addiction.

There are several smoking cessation medications and therapies available presently. However acupuncture is a recommended alternative procedure, especially where conventional therapies have already failed. The strategic insertion of needles in various parts of the body aims to treat the condition in a more profound and emotional level. A smoker needs to free himself from the physiological and psychological addiction of smoking, thus necessitating a more holistic treatment.

How It Stops the Addiction

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again. Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation. Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

Courses that offer tools such as acupuncture DVD and video are ideal for acupuncturists or students of acupuncture to improve their clinical expertise.

Once you graduate from acupuncture school, some will open their own practice while others will first work for a clinic. Those who decide to be employed will work with other professionals that may include naturopaths, chiropractors and other specialists that are also into Oriental Medicine.

The average acupuncturist makes about \$45,000 a year but this can change in the years to follow as they add years or experience under their belt. This just goes to show that if you work hard, you too will make a fortune. Just make sure that you do this properly for each patient because one mistake could make this all go away.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses.

Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Acupuncture treatment for smokers should only be done by a license professional. You can do some research online to find out if they are accredited by the National Commission for Acupuncture and Oriental Medicine, ask how long they have been in the profession, find out how many smokers they have helped and how much will they charge.

Once you have found one, you have to commit yourself to the program because both you and the acupuncturist have to work together to give up this habit.

Acupuncture can help smokers in the same way that it has helped addicts and alcoholics quit their addictions. You just have to try it even if you may not believe in it.

Heat-Related Illnesses in Teens

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

The Best english now 2009 2010 litconn pdf pdf.The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients.

The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication schools. Although it is only short term, it is better than nothing until a cure is found.

Part of examination is to help the acupuncturist figure out where the needles will be inserted. Your pulse will give the person an idea on your general state of energy and the general health of your stomach.

You will also have to open your mouth and show your tongue to check for cracks, peelings or puffiness on the stomach area as this provides clues to why you are overweight.

Behind the english now 2009 2010 litconn pdf pdf~Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

Life Lessons from english now 2009 2010 litconn pdf pdf;Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

Study english now 2009 2010 litconn pdf pdf

There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

Not everyone is impressed with acupuncture itself. Most western medical professionals have expressed either doubt or indifference to the oriental method while others have downright driven it down into the earth with criticisms and brutal skepticism. However, recent research shows the efficacy (or lack thereof) of acupuncture, and while more research has to be done, it has been proven to actually positively affect some, but not all, forms of ailments that it claims to cure.

So as the doors open to a new age of acupuncture, give it a try when you feel the need for pain relief and you will not be disappointed. As the Chinese have used it for many centuries, so should we.

Guide english now 2009 2010 litconn pdf pdf___**What is acupuncture?**

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

The second accountancy career that you may be able to land is serving as a public accountant. If you're already a CPA, you can serve the general public. You will be called a public accountant once there is already the so-called practitioner-client connection or relationship. Even those accountants who are not yet certified can already practice their profession. Oftentimes, CPAs join partnerships and they have a wide scope of clientele from the local area to the national and even international clients at times.

Being a government accountant is another career. In this profession, you will be working for the government, whether local, state, or federal. The accounting methods used conventionally are also used in government accounting. You will make use of the method called double-entry systems and you will be using journals as well as ledgers. If

you're a government accountant, you will be focusing more in rendering service. Government units are not very particular with profits because they are put up to serve the public.

Fiduciary accounting is another type of accountancy careers. Here, accounting relies on trust. Executors, administrators, trustees, or any other person who is trustworthy can do fiduciary accounting. A fiduciary accountant keeps important records and he also prepares certain reports. The courts can authorize these fiduciary accountants to carry out their tasks.

Rating : english now 2009 2010 litconn pdf pdf:Acne in Adolescents

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

In some cases, acupuncture is more effective when the needles are first heated. This technique is known as "moxibustion." Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell, will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

It is also possible that herbal medications will also be prescribed by the acupuncturist for your treatment to be successful.

Fight english now 2009 2010 litconn pdf pdf;Impulses of electromagnetic energy can also be used as the body generates tiny but electrical discharges which influence the function, growth and maturity of certain types of cells. By inserting the needles in these areas, it stimulates and alters the neurotransmitters in the body thus making the patient feel better after treatment. This is also sometimes used for diagnosis and testing.

There are also other forms of acupuncture that do not use needles. For instance there is sonopuncture that uses an ultrasound device that transmits sound waves to points in the body to treat a patient. Some practitioners use a tuning fork or other vibration devices.

Acupressure is another. Here, the professional will use their hands to relieve the pain. This can be used on it sown or with other manual healing techniques.

Every business aims to get a good and positive figure because that would mean profit to them; if not, the business is at a loss. Societies and economies are built on profit. However, there are times when a certain business incurs losses. Consumer behaviors and economic trends change. Because of this fact, it is not possible to foresee the company's future performance at all times.

How can you tell if a business is at a loss? That is understandable and even those who have no background in accounting know what it means. All liabilities will be deducted from the assets and if results to a negative amount, then the business is at a loss. The accounting staff of the company can still pursue effective measures to revive the business. If the business has efficient and effective accounting staffs, the business can improve in the near future.
