Journey of a Thousand Miles

He was tired of his life. He was bored, sad, and unsatisfied. He had a employment he detested, a manager he despised, and a significant other he didn't cherish. He had no zeal, no purpose, no meaning. He sensed like he was misusing his hours, his possibility, his being. He wanted to modify, he wished to escape, he desired to live. He chose to resign from his job, to split up with his partner, to get rid of his belongings, and to purchase a single fare to the other side of the world. He didn't know where he was going, he didn't understand what he was performing, he didn't realize what he was seeking. He only understood that he had to go, that he had to explore, that he had to discover. He started on a voyage of a thousand miles, a trip of adventure, of challenge, of knowledge, of development, of transformation.

*Investment if you give a mouse a brownie~*Engineering Economics and Cost Estimation is a crucial aspect of any engineering project. It involves present and future economic factors, making it vital to obtain dependable estimates of future costs, benefits, and other economic parameters. Engineers often deal with

projects whose scale, complexity, and uncertainty call for advanced approaches to planning and budgeting<sup>[1]</sup>. Various methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates<sup>[2]</sup>. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. A number of models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate usually increases as the resources allocated to developing the estimate increase.
