## The Regulation of Financial Planning in Australia

2019-08-20 Angelique Nadia Sweetman McInnes This book investigates the legitimacy of the current Australian Financial Services Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.

## Behavioral Finance: The Second Generation

2019-12-02 Meir Statman Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and

misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

#### STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

---

2009-07-29 National Research Council Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for

law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
