The Global Epidemiology of Infectious Diseases

2004 Alan D. Lopez "This fourth volume of the Global Burden of Disease and Injuries Series provides the reader with information on the epidemiology and burden of major infectious and parasitic diseases. As with previous volumes of the Global Burden of Disease study, the chapters in this book detail the situation as experienced in the year 1990. Since then the epidemiology of some of the conditions described has changed, and where this is the case the authors have added a brief paragraph acknowledging this. The chapters therefore do not provide a detailed update on the current burden of disease, which is accommodated in the documentation of the Global Burden of Disease 2000 and published elsewhere."--Preface.

Adverse Events Associated with Childhood Vaccines

1993-01-01 Institute of Medicine Childhood immunization is one of the major public health measures of the 20th century and is now receiving special attention from the Clinton administration. At the same time, some parents and health professionals are questioning the safety of vaccines because of the occurrence of rare adverse events after immunization. This volume provides the most thorough literature review available about links between common childhood vaccinesâ€"tetanus, diphtheria, measles, mumps, polio, Haemophilus influenzae b, and hepatitis Bâ€"and specific types of disorders or death. The authors discuss approaches to evidence and causality and examine the consequencesâ€"neurologic and immunologic disorders and deathâ€"linked with immunization. Discussion also includes background information on the development of the vaccines and details about the case reports, clinical trials, and other evidence associating each vaccine with specific disorders. This comprehensive volume will be an important resource to anyone concerned about the immunization controversy: public health officials, pediatricians, attorneys, researchers, and parents.

Measles and Poliomyelitis

2012-12-06 Edouard Kurstak Elimination of measles and poliomyelitis diseases from the globe is a priority goal of the World Health Organization. For the first time, in a single volume comprising thirty-one well-documented chapters, internationally recognized experts provide a state-of-the-art treatment of these two important viral diseases. The book offers a wide range of new findings and references on the latest advances regarding the measles and poliomyelitis: • global and molecular genetic epidemiology, characteristics and diseases surveillance • all available vaccines and research to produce more safe and more potent-biotechnology vaccines • immunization programmes, considering the available vaccines and possibility of vaccinal associations in strategy to eliminate/eradicate these diseases • immunity to infections and immunogenicity of vaccines • virus genomes organization and antigenic structures related to vaccine characteristics, stressing their role in immunization strategies • needs of global cooperation, using all available resources, vaccines and strategies to achieve the global control of the diseases. It is addressed to all public health professionals concerned with measles and poliomyelitis control, especially in hospitals, clinics, governmental health services, international health services, centers of infectious diseases, research institutes, medical schools, vaccine producers and experts in immunization strategies and programmes.

Radiology of Infectious Diseases: Volume 1

2015-08-28 Hongjun Li This book provides a comprehensive overview of diagnostic imaging in infectious diseases. It starts with a general review of infectious diseases, including their classification, characteristics and epidemiology. In separate chapters, the authors then introduce the radionuclide imaging of 50 kinds of infectious diseases. Volume 1 covers 21 viral infections. Volume 2 has 29 chapters discussing 24 bacterial infections and 5 parasitic infections. Each disease is clearly illustrated using cases combined with high-quality computed tomography (CT) and magnetic resonance imaging (MRI). The book provides a valuable reference source for radiologists and doctors working in the area of infectious diseases.

Splendid Solution

2006-02-07 Jeffrey Kluger The compelling true story of Dr. Jonas Salk's quest to develop a vaccine for polio. In 1916, the United States was hit with one of the worst polio epidemics in history. The disease was a terrifying enigma: striking out of nowhere, it afflicted tens of thousands of children and left them—literally overnight—paralyzed. Others it simply killed. At the same time, a child named Jonas Salk was born.... When Franklin Delano Roosevelt was diagnosed with polio shortly before assuming the Presidency, Salk was given an impetus to study this deadly illness. After assisting in the creation of an influenza vaccine, Salk took up the challenge. His progress in combating the virus was hindered by the politics of medicine and by a rival researcher determined to discredit his proposed solution. But Salk's perseverance made history—and for close to seventy years his vaccine has saved countless lives,

bringing humanity close to eradicating polio throughout the world. Splendid Solution chronicles Dr. Salk's race against time to achieve an unparalleled breakthrough that made him a cultural hero and icon of modern medicine.

The Cutter Incident

2007-09-18 Paul A. Offit Vaccines have saved more lives than any other single medical advance. Yet today only four companies make vaccines, and there is a growing crisis in vaccine availability. Why has this happened? This remarkable book recounts for the first time a devastating episode in 1955 at Cutter Laboratories in Berkeley, California, thathas led many pharmaceutical companies to abandon vaccine manufacture. Drawing on interviews with public health officials, pharmaceutical company executives, attorneys, Cutter employees, and victims of the vaccine, as well as on previously unavailable archives, Dr. Paul Offit offers a full account of the Cutter disaster. He describes the nation's relief when the polio vaccine was developed by Jonas Salk in 1955, the production of the vaccine at industrial facilities such as the one operated by Cutter, and the tragedy that occurred when 200,000 people were inadvertently injected with live virulent polio virus: 70,000 became ill, 200 were permanently paralyzed, and 10 died. Dr. Offit also explores how, as a consequence of the tragedy, one jury's verdict set in motion events that eventually suppressed the production of vaccines already licensed and deterred the development of new vaccines that hold the promise of preventing other fatal diseases.

The assessment offers two equivalent forms which contain different vocabulary items, ensuring that the test-taker has not “memorized” the test. One edition can be employed ahead of intervention implementation to assess test-takers’ vocabulary knowledge and the other form can be utilized for re-assessment to measure and note improvement. The PPVT-4 also contains a special Growth Scale Value (GSV) which is sensitive to slight changes in time.

Alice was perpetually intrigued by the aged mansion perched at the end of the street. Stories of its reclusive owner, who never ventured out of his confined abode, had always piqued her curiosity. Whispers circulated about his identity, ranging from a hermit to a genius or even an eccentric, depending on the source. Alice yearned to unravel the truth behind these tales and uncover the secrets concealed within the locked door on the second floor. Driven by an irresistible urge to delve into the mansion's mysteries, Alice embarked on a reckless escapade. With a heart pounding with a mix of apprehension, she stealthily ventured into the mansion's grounds, her senses heightened as she approached the off-limits door on the second floor. Standing before the threshold, her hand trembling slightly as she reached for the doorknob, Alice braced herself for the revelations that awaited her beyond. With a deep breath, she turned the knob, the door creaking open to unveil a sight that would forever alter her perception of the world.
