The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary test that has been in operation for close to 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to measure receptive vocabulary for American English. It is quick and simple to administer, preserving important time so that focus can be put on implementing successful interventions.

The PPVT-4 assessment subject matter encompasses a wide scope of vocabulary comprehension grades, ranging from preschool through adult age. The test items broadly sample words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary. The evaluation offers two identical editions which include different vocabulary words, making sure that the person has not "mastered" the assessment. One form can be used ahead of intervention to evaluate people's vocabulary comprehension and the second version can be employed for re-assessment to assess and record advancement. The PPVT-4 also features a special Growth Scale Value (GSV) which is responsive to slight changes with time.
