Modern Classics Beyond the Pleasure Principle

2003-07-29 Sigmund Freud in Freud's view we are driven by the desire for pleasure as well as by the desire to avoid pain. But the pursuit of pleasure has never been a simple thing. Pleasure can be a form of fear, a form of memory and a way of avoiding reality. Above all, as these essays show with remarkable eloquence, pleasure is a way in which we repeat ourselves. The essays collected in this volume explore, in Freud's uniquely subtle and accessible style, the puzzles of pleasure and morality - the enigmas of human development.

On Freud's "Beyond the Pleasure Principle"

2018 Salman Akhtar "Freud's Beyond the Pleasure Principle constitutes a major landmark and a real turning point in the evolution of psychoanalytic theory. Pushing aside the primacy of the tension-discharge-gratification model of mental dynamics, this work introduced the notion of a "daemonic force" within all human beings that slowly but insistently seeks psychic inactivity, inertia, and death. Politely dismissed by some as a pseudo-biological speculation and rapturously espoused by others as a bold conceptual advance, "death instinct" became a stepping stone to the latter conceptualizations of mind's attacks on itself, negative narcissism, addiction to near-death, and the utter destruction of meaning in some clinical situations. The concept also served as a bridge between the quintessentially Western psychoanalysis and the Eastern perspectives on life and death. These diverse and rich connotations of the proposal are elucidated in On Freud's "Beyond the Pleasure Principle". Other consequences of Freud's 1920 paper - namely, the marginalization of ego instincts and the "upgrading" of aggression in the scheme of things - are also addressed. The editors have gathered a body of distinguished psychoanalysts from around the world to argue, discuss, elaborate upon, and advance Freud's path-breaking contribution. The result is a book of rare intelligence, charm, and clinical significance. Beyond the Pleasure Principle

2011-03-02 Sigmund Freud Beyond the Pleasure Principle is Freud's most philosophical and speculative work, exploring profound questions of life and death, pleasure and pain. In it Freud introduces the fundamental concepts of the "repetition compulsion" and the "death drive," according to which a perverse, repetitive, self-destructive impulse opposes and even trumps the creative drive, or Eros. The work is one of Freud's most intensely debated, and raises important questions that have been discussed by philosophers and psychoanalysts since its first publication in 1920. The text is presented here in a contemporary new translation by Gregory C. Richter. Appendices trace the work's antecedents and the many responses to it, including texts by Plato, Friedrich Nietzsche, Melanie Klein, Herbert Marcuse, Jacques Derrida, and Judith Butler, among many others.

1990-01-01 Robert A. Glick Affects, or feelings, are crucial motivators and organizers in our psychological lives. Yet affect and the full range of emotional expressions have been relatively neglected by psychoanalysis since Freud's earliest formulations. This volume, the first in a three-part series addressing the centrality of affect, focuses on pleasure, which Freud believed to be a fundamental quality of affect. Here, psychoanalysts and psychiatrists integrate new understandings from the neurosciences, clinical research and practice, and observational studies of the development of infants and nonhuman mammals, and scholars in the humanities report on the philosophic and aesthetic implications.

The Penguin Freud Reader

2006-01-26 Sigmund Freud Here are the essential ideas of psychoanalytic theory, including Freud's explanations of such concepts as the Id, Ego and Super-Ego, the Death Instinct and Pleasure Principle, along with classic case studies like that of the Wolf Man. Adam Phillips's marvellous selection provides an ideal overview of Freud's thought in all its extraordinary ambition and variety. Psychoanalysis may be known as the 'talking cure', yet it is also and profoundly, a way of reading. Here we can see Freud's writings as readings and listenings, deciphering the secrets of the mind, finding words for desires that have never found expression. Much more than this, however, The Penguin Freud Reader presents a compelling reading of life as we experience it today, and a way in to the work of one of the most haunting writers of the modern age.

Beyond the Pleasure Principle

1922 Sigmund Freud "In the psycho-analytical theory of the mind we take it for granted that the course of mental processes is automatically regulated by 'the pleasure-principle': that is to say, we believe that any given process originates in an unpleasant state of tension and thereupon determines for itself such a path that its ultimate issue coincides with a relaxation of this tension, i.e. with avoidance of 'pain' or with production of pleasure. We know that the pleasure-principle is adjusted to a primary mode of operation on the part of the psychic apparatus, and that for the preservation of the organism amid the difficulties of the external world it is ab initio useless and indeed extremely dangerous. Under the influence of the instinct of the ego for self-preservation it is replaced by the 'reality-principle', which without giving up the intention of ultimately attaining pleasure yet demands and enforces the postponement of satisfaction, the renunciation of manifold possibilities of it, and the temporary endurance of 'pain' on the long and circuitous road to pleasure. The replacement of the pleasure-principle by the reality-principle can account only for a small part, and that not the most intense, of painful experiences. Another and no less regular source of 'pain' proceeds from the conflicts and dissociations in the psychic apparatus during the development of the ego towards a more highly co-ordinated organisation. The two sources of 'pain' here indicated still do not nearly cover the majority of our painful experiences, but as to the rest one may say with a fair show of reason that their presence does not impugn the supremacy of the pleasure-principle. Most of the 'pain' we experience is of a perceptual order, perception either of the urge of unsatisfied instincts or of something in the external world which may be painful in itself or may arouse painful anticipations in the psychic apparatus and is recognised by it as 'danger'. The reaction to these claims of impulse and these threats of danger, a reaction in which the real activity of the psychic apparatus is manifested, may be guided correctly by the pleasure-principle or by the reality-principle which modifies this. It seems thus unnecessary to recognise a still more far-reaching limitation of the pleasure-principle, and nevertheless it is precisely the investigation of the psychic reaction to external danger that may supply new material and new questions in regard to the problem here treated"--Book. A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

Acupuncture Can Help You Quit Smoking

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

Acupuncture For All Those Simple Aches And Pains

If, like me, you have quite a fear of needles and injections, then acupuncture, that practice of sticking needles onto different parts of your body to cure sicknesses might seem scary at first.

However, if you've been long been suffering from some problems like headaches or chronic pains and your regular visits to the doctor don't seem to be helping you, then why not consider a trip to an acupuncture specialist? After all, who hasn't heard of somebody's aunt somewhere suffering from arthritis and trying out everything that the doctors recommended all to no avail, only to finally be cured by a really good acupuncturist?

Perhaps you were wondering if it could actually work for you. You might feel a bit skeptical since traditional Chinese medicine doesn't immediately coincide with theories in modern Western medicine. In fact, the use of needles to cure people was discovered thousands of years ago in China long before microscopes or x-ray machines were invented or before bacteria and germs were discovered.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start. There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

At the same time, you have to find ways to prevent yourself from picking up a cigarette. You can do this by staying away from people who smoke since you will be tempted to ask for a stick. You can create your own personal mantra which you repeat to yourself every time you have an urge.

Remember that this craving is only short term and will last only for a few minutes. You have worked so hard to leave this behind so stick to the path and stay smoke free.

Adolescents' eating habits, exercise levels, activities in school and home will also be studied thoroughly. High blood pressure is dealt with by weight reduction, healthy diet, and increase in physical activity. If hypertension is due to illness, the illness is treated first. These treatment measures will decrease the systolic blood pressure and diastolic blood pressure. It will also strengthen the heart and decrease the level of cholesterol in blood. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

Anemia in Adolescents

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn't stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs I.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.
