2019-04-02 U.S. Department of Labor The principles of getting a job are fairly simple 1. You will need to think like employers and understand the factors that make them and their organizations successful. You will practice doing that in this section. 2. You will need to identify the skills you can offer that will contribute to the success of both the business you are targeting and the individual hiring decision makers who determine if it makes sense to

offer you a job. You will have an opportunity to do this in Section 2 of this Guide. 3. You will need to discover, research, and connect with employment opportunities that are a good match for your skills and interests. Sections 3 and 4 will help you accomplish these tasks. 4. You will need to develop and deliver self-marketing messages that enable civilian hiring decision makers to recognize that they and their organizations will be more successful if they hire you. You will have opportunities to develop these messages in Sections 5 and 6.

2011 Teresa M. Adams Public sector transportation agencies and the contractors who help them do their work will have a major challenge in meeting their workforce needs for

the foreseeable future. By some estimates, the aging of the baby boom generation could allow up to fifty percent of the total workforce to retire within the next ten years. Overall demographic issues and stagnant enrollments in science and math professional programs, traditionally the major sources of new hires into the transportation industry, will make finding adequate qualified recruits difficult. This project deals with strategies for transition planning, in particular, strategies for transition planning in a specialist organization such as the Wisconsin Department of Transportation's Rail and Harbor Section.

### **The People Factor**

2009-08-01 Linda J. Bilmes Successful businesses have spent the past two decades retooling and rethinking how to manage their people better. Most big companies that have survived and prospered in the 21st century view employees as a vital strategic asset. In comparison, the U.S. federal government is a Stone Age relic, with its top-down bureaucracy, stovepiping of labor and responsibilities, and lack of training and investment in its own public servants. The inevitable result is a government not keeping up with the complex demands placed on it. In *The People Factor*, Linda Bilmes and Scott Gould present a blueprint for reinvigorating the public sector in order to

deliver results for America. Their premise is that the federal government can achieve the same gains as the best private sector and military organizations by managing its people better. Their new vision for public service is based on "The People Factor," a set of management tools drawn from best practices in successful companies, the military, and high-performing government agencies. Part One of The People Factor book shows why the U.S. personnel system needs reform, revealing the high price of inaction. Part Two lays out the specific steps that must be taken to achieve the necessary gains. Part Three focuses on how to implement the People Factor and make the authors' vision a reality. They argue that the next president needs to turn this issue into a top priority and use political capital to push reform. Highlights of the book include:

- Extensive original survey research
- Case studies from government and the military
- Interviews with leading thinkers on strategic human capital
- A number of

The other virus called cytomegalovirus which also belongs to the family of herpes simplex causes the cells to become enlarged. According to statistics, about eighty percent of adolescents infected with this virus generally don't see any further symptoms. Although EBV has potential to develop infectious mononucleosis in adolescents the virus could make throat and blood cells its home for the lifetime. The virus has the capability to bounce back and reactive from time to time but the consolation is that it would reactivate without symptoms.

The condition usually lasts for 1-2 months. The symptoms may vary from one adolescent to other but may include inflamed lymph glands in areas such as groin, neck and armpits, fever, continuous fatigue, enlarged spleen, sore throat as a result of tonsillitis that can make things difficult to swallow and last but not the least minor liver damage that can lead to short-term jaundice. Some adolescents may also experience symptoms

such as abdominal pain, petechial hemorrhage, muscle ache, headache, depression, loss of appetite, skin rash, weakness, dizziness, enlarged prostate, dry cough, swelled genitals and puffy and swollen eyes. Some parents are puzzled by the symptoms of mononucleosis as it may be similar to other medical conditions. It is safe to consult a doctor in such cases.

The viruses are usually transmitted to other people through saliva (the reason why it is also called kissing disease), blood, sharing drinks and sharing utensils. The symptoms usually lasts for 4-6 weeks and do not cross 4 months. The disease is diagnosable but requires a thorough medical history of the adolescent. The diagnosis also involves physical examination of the adolescent and is based on symptoms reported to the physician. The diagnosis is further supported by laboratory test like blood test, antibody test and test to count white blood cells.

The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what

acupuncture can do in smoking cessation.

### **Solutions sample agency workforce transition plan and guide...Heat-Related Illnesses in Teens**

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. They are: Heat cramps, heat stroke and heat exhaustion.

### **Investment sample agency workforce transition plan and guide, Variations of Conventional Acupuncture**

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

### Best Seller : sample agency workforce transition plan and guide

You can think of a session with the acupuncturist as very much like massage therapy. A good massage would help give you a very relaxing sleep that night and an acupuncturist could help you with your sleep as well. You might immediately start to feel drowsy as soon as the right nerves are stimulated by the acupuncturists needles.

You might be asking yourself how youd be able to relax if youre suffering from the pain of the needles attached to your body. What you might not realize is that because of the thinness of the needles, you would hardly feel anything. The most that many people claim they feel is a kind of tingling feeling where the needles are. And that is actually a sign that the process is working,

Acupuncture is a practice that helps you use your bodies own ability to manage stress properly. This leaves you healthier, and more importantly, prevents any of the serious diseases that could come from unbalanced, stressful lifestyles.

*For Free sample agency workforce transition plan and guide;*Heat stroke is the severest condition of all heat related illnesses. In this condition the body gets overwhelmed with excessive heat and the efficiency of the system that regulates body heat goes down considerably which can result in a serious emergency requiring immediate medical care. The symptoms of heat stroke include dry and warm skin, very high fever generally above 104 degree Fahrenheit, increased heart rate, appetite loss, nausea, headache, vomiting,

fatigue, agitation, confusion, stupor, seizures, coma and possible death. A teenager experiencing symptoms of heat stroke should stay in a cool place and have adequate rest. Heat stroke is a serious condition and emergency attention should be sought by calling 911. In the meanwhile the affected teenager should be made free of excessive clothing and should be worn with cool clothes and also put cool water on the skin to lower the temperature. Placing ice bags in armpits also helps. Make the teenager drink cool drinks if the teenager is alert.

Heat strokes are very much preventable if certain precautions are taken like drinking adequate water during hot days, avoiding alcoholic and caffeine drinks, wearing light clothes, exercising in cooler time of the day, wearing sunglasses and hat, using umbrella on a hot day, applying sun cream with a spf of at least 15 etc.

*Study sample agency workforce transition plan and guide*, The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted

**Read Only : sample agency workforce transition plan and guide:** Before you decide to have a session with them, talk to the acupuncturist to know their credentials. This will also give you the opportunity to find out how much do they charge as this can be from \$45 to more than \$100 per session.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn't work out for you, don't be afraid to find someone else who can do a better job.

The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

**Rating : sample agency workforce transition plan and guide-** Accounting has four general areas, namely – public, government, internal auditing, and management accounting. If you choose an accounting course, you will learn how to prepare and organize financial reports that include collation or calculation of a range of figures, analyses, tax, and even projections.

Traditionally, the study of accounting focused mainly in the technical skills. The traditional methods in the study of accounting include teaching the basic principles and concepts of accounting. The present accounting practices haven't adapted yet to the various changes in business, regulatory environment, and economics. There are now modern methodologies used in accounting education. These methodologies are based mainly on accounting communication, decision-making, ethics, analytical skills, and the internal auditing principles.

Educational programs in accounting have the same objectives and one is to teach the students about the various accounting principles. Aside from that, the students will also learn to develop their skills through

various accounting practices. Professional accountants today have greatly benefited from modern accounting education. Accounting education also functions as an effective management tool for business executives.

### sample agency workforce transition plan and guide

The educational components of an accounting education are specialized accounting, general accounting, and professional accounting. These days, accounting students can also take advantage of doctoral programs and other continuing educational programs.

Is accounting education right for you? Before you finally enroll in an accounting course, you have to be very sure that you like business matters. You see, accounting is more on business matters and mathematical computations. It also involves a lot of analyzing tasks.

Once you've decided that an accounting course is the best for you, find a university or college now; you can either go to college abroad or you can attend school locally. Every step involves making decisions. So make sure that you make the best decisions because your future lies with it.

### **Reading sample agency workforce transition plan and guide**

There are things that patients have to be aware of before, during and after surgery. The same goes for those who undergo acupuncture because in order to enhance the value of the treatment, there are some do's and don'ts that patients have to follow.

First, you should not eat a large meal before or after treatment.

You should also avoid over exercising, engaging in a sexual activity or consume alcoholic beverages 6

hours before and after treatment.

Since the acupuncture session will last from 45 minutes to 2 hours depending on how often you have to go to the clinic, you better fix your schedule so you have time to rest.

### **Discovery sample agency workforce transition plan and guide**

Chances are, you were consulting with a doctor prior to your visit to the acupuncturist. If there are any prescription medicines given, don't forget to take them.

You will not feel any improvement after just one or two visits with the acupuncturist. Just the same, you should write this down so you can go back to the acupuncturist on your next visit and tell him or her how you felt during the previous session. Such feedback will let the specialist know what needs to be modified in the future to help you with your problem.

The acupuncturist might give you some herbs to take as part of your treatment. Since you don't know if taking them will have any side effects with the medication you are taking, you should first consult with your doctor if it is safe to consume both.

Opportunity sample agency workforce transition plan and guide;The greatest advantage of this ancient Oriental procedure is the absence of side-effects during and after treatment. Unlike smoking cessation medications and nicotine replacement therapy products, acupuncture does not employ chemically manufactured substances. There is also no risk of weight gain during therapy. In conjunction with helping a patient quit smoking, it can also curb appetite, thus reducing food cravings. If you have tried several methods in smoking cessation to no avail, perhaps it is high time you consider the alternative method that is acupuncture. With the right practitioner and the right frame of mind, there is no reason why you won't be nicotine-free before long.

### *Obsession sample agency workforce transition plan and guide-* **How to Look For a Good Acupuncture School**

Since 1982, acupuncture has found its way to the US. There are currently 50 schools that teach it and 3,000 licensed practitioners all over the country. Do you think you can be a licensed professional? Here are a few things to help you look for a good acupuncture school.

You should now that the 50 schools mentioned are all accredited by the National Commission for Acupuncture and Oriental Medicine. It is recognized by the Department of Education and some of these schools even have a masters program.

Most of these schools can be found online so you can give them a call and ask certain questions about the school. You can find out the cost of tuition, the teacher student ratio, if the school offers consultation services to students and the alumni and if they have an extensive library which focuses on traditional Chinese medicine.

Holistic healthcare by definition is being able to cure an illness through the use alternative means. This means no medication is given to the patient and an instrument like a bunch of needles could do the trick. Acupuncture has been around for than 2000 years. It is only recently that this holistic form of healthcare has reached the US. Studies have shown that it can treat minor problems and prevent some from happening. The needles used in acupuncture are very thin but thicker than the human hair. This makes it smaller than those used on hypodermic needles.

### **Acupuncture Can Help You Quit Smoking**

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas

where the energy is low.

### Liberation sample agency workforce transition plan and guide...**Acupuncture in the Western World**

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

**Discovery sample agency workforce transition plan and guide**\_\_\_ Unfortunately, standards of acupuncture have not been fully approved by the FDA due to many unregulated practices that still exist such as the re-use of needles. Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

### **Should You Try It**

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to ones health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.

The doctor will check the medical history of the patient and will conduct physical examination and diagnostic procedures such as taking an X-ray. The physician will decide on the treatment to be done by studying the overall health, age, medical history, tolerance for certain medications and extent of the disease. Treatment will include medications, rest, compression, elevation, neoprene knee sleeve and physical therapy. The main aim will be to control and limit the knee pain by cutting down on the adolescent's physical activities. Usually the Osgood-Schlatter disease gets healed over a period of time and in very rare cases is a surgery required. Slipped capital femoral epiphysis is a problem which affects the hip joint. The ball or head of the thigh bone, also known as femoral head slips from the thigh bone's neck. Because of this the hip joint becomes stiff and painful. Slipped capital femoral epiphysis is the most common disorder of the hip which can happen in both the hips or one and it is more common in boys when compared to girls. Basically, adolescents of the age ten to eighteen years and who are overweight can be affected by this condition. The condition can arise over a time interval of few weeks or years. The condition, if resulted because of trauma and is also called acute slip and if results after a period of time is called chronic slip. Slipped capital femoral epiphysis is caused because of medications, radiation treatment, thyroid problems, and chemotherapy.

There are three degrees of intensity of slipped capital femoral epiphysis, mild, moderate and severe. In mild slipped capital femoral epiphysis, only one third of femoral head slips from the thigh bone. In moderate, one

third to half slips and in severe, more than half of the femoral head slips. The symptoms of this condition are pain in hip which increases upon movement, pain in thigh, knee & groin and limpness in the leg. When an adolescent walks there will be a clicking sound in the hip and his/her legs will be turned outwards.

Based on what the acupuncturist finds out about your sickness, he or she would then formulate the treatment that your body needs. With traditional Chinese medicine, sicknesses are seen as a kind of imbalance and loss of harmony between your bodies organs. You can consider the use of needles on your

body as just a way to push your body and its organs back into balance.

The specialist would begin inserting very thin needles into the right places in your body. To many people, inserting these needles doesn't really hurt. After all, an acupuncturist's needles are usually much thinner than the needles that are used for injections. Many have claimed that inserting these needles actually calms them down and relaxes them.

*Review sample agency workforce transition plan and guide;* There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over

their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

### **Allergies in Adolescents**

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in

the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

This will help you plan your schedule since you need to go to the clinic 2 to 3 times weekly. The acupuncturist just like a medical doctor is there to help you get better. If you don't see any progress with this person, perhaps you should seek the help of another specialist.

### **What is Acupuncture?**

What is acupuncture? It is a form of holistic healthcare that is used to prevent and treat certain diseases as well as relieve pain and anesthetize patients for surgery. Research shows that this began in China and has been practiced for more than 5,000 years.

Challenge sample agency workforce transition plan and guide; The earliest account of this is found in the

book called Nei Jing which in English means the Yellow Emperor's Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

*Power sample agency workforce transition plan and guide*~But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement. Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones. Adolescent females are depressed twice more than adolescent boys according to a study. Adolescent behavior is normally marked with good and bad moods. The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also

done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

When will the cure be found? Only time can tell as there are many other questions that have to be answered in order for doctors to further understand neurological disabilities. Doctors who are conducting research believe that an interdisciplinary approach is needed given that acupuncture has shown positive results in helping children with autism.

Part of examination is to help the acupuncturist figure out where the needles will be inserted. Your pulse will give the person an idea on your general state of energy and the general health of your stomach.

You will also have to open your mouth and show your tongue to check for cracks, peelings or puffiness on the stomach area as this provides clues to why you are overweight.

Revenge sample agency workforce transition plan and guide: There are basically two types of diabetes that

will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the system attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type 2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items.

Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.
