Portraits and Portrait Painting 2017-12-15 Estelle M. Hurll Excerpt from Portraits and Portrait Painting: Being a Brief Survey of Portrait Painting From the Middle Ages to the Present Day The purpose of this book is so plain as to need no explanation: it is a brief survey of portrait painting from the Middle Ages to the present day, showing what has been contributed to the art by each age and by each nationality, as well as by the several most notable portrait painters. Something, too, is told of the people who were the subjects of famous portraits. Among the illustrations the reader will find some familiar favourites, and also some interesting pictures which have never before been reproduced. Painting a Portrait by de Laszlo - "How to Do It" Series 2008-10-01 A. L. Baldry EDITORS FOREWORD Portrait of C. G. Holme by de Gszlb There is no Royal Road to the

painting of a successful portrait. Success depends upon the painter's observation, his understanding and the ability to paint what he wishes. It is a personal affair. Much can be learned from those who have won for themselves the title of Master, but it is impossible to have our questions answered, first-hand, by great Masters who are no longer with us.

Portrait of Young Genius – The Mind and Art of Marie Bashkirtseff 2019-07-15 Joel L. Schiff Marie Bashkirtseff was one of the most extraordinary women of the 19th century. Her Journal (originally comprising some 20,000 hand-written pages but pared down to a few hundred for publication) was a cause célèbre after her death and continues to be an inspiration to the Women's Movement to this day. It also inspired such great writers as Anaïs Nin and Katherine Mansfield among many others. Born into an aristocratic family in a village in Ukraine the family soon settled in France, first in Nice and later in Paris. Taught entirely by tutors Marie spoke multiple languages, played numerous musical instruments and longed for a singing career on the stage. An illness that affected her throat made her change course and she took up painting for which she had a latent talent. As a student at the Académie Julian in Paris she was soon exhibiting at the annual Paris Salon, the premier venue for artists. But it was her personality that makes Marie Bashkirtseff such an exceptional individual. At a very young age she was already exhibiting in her Journal the thoughts of a learned philosopher, wrestling with the nature of God, the position of women in society, the politics of men. Having contracted tuberculosis in early childhood she ceaselessly strove to shrug it off in her quest to

achieve greatness. In the end, a great tragedy unfolds. The book is somewhat unique in format. The first part is a biographical section that describes Marie's unusual and fascinating life. Then a second section, consists of a single Journal excerpt (in English translation from the original French) on each left-hand page, juxtaposed with one of her outstanding works of art on the facing page. In this manner, we learn about her remarkable life and tribulations, enter her restive and brilliant mind via her Journal, as well as appreciate her exceptionally fine works as an artist.

Lessons in Likeness 2010-11-26 Estill Curtis Pennington

From 1802, when the young artist William Edward West began painting portraits on a downriver trip to New Orleans, to 1918, when John Alberts, the last of Frank Duveneck's students, worked in Louisville, a wide variety of portrait artists were active in Kentucky and the Ohio River Valley. Lessons in Likeness: Portrait Painters in Kentucky and the Ohio River Valley, 1802–1920 charts the course of those artists as they painted the mighty and the lowly, statesmen and business magnates as well as country folk living far from urban centers. Paintings by each artist are illustrated, when possible, from The Filson Historical Society collection of some 400 portraits representing one of the most extensive holdings available for study in the region. This volume begins with a cultural chronology—a backdrop of critical events that shaped the taste and times of both artist and sitter. The chronology is followed by brief biographies of the artists, both legends and recent discoveries, illustrated by their work. Matthew Harris Jouett, who studied with Gilbert Stuart, William Edward West, who painted Lord Byron, and Frank Duveneck are well-known; far less so are James T. Poindexter, who painted charming children's portraits in western Kentucky, Reason Croft, a recently discovered itinerant in the Louisville area, and Oliver Frazer, the last resident portrait artist in Lexington during the romantic era. Pennington's study offers a captivating history of portraiture not only as a cherished possession but also representing a period of cultural and artistic transitions in the history of the Ohio River Valley region.

Lessons in Likeness 2011 Estill Curtis Pennington  
Between 1802, when the young Kentucky artist William Edward West began to paint portraits while on a downriver journey, and 1920, when the last of Frank Duveneck's students worked in Louisville, a large number of notable portrait artists were active in Kentucky and the Ohio River Valley. In Lessons in Likeness: Portrait Painters in Kentucky and the Ohio River Valley, 1802-1920, Estill Curtis Pennington charts the course of those artists as they painted a variety of sitters drawn from both urban and rural society. The work is illustrated, when possible, from The Filson Historical Society collection of some four hundred portraits representing one of the most extensive holdings

available for study in the region. Portraiture involves artists and subjects, known as sitters, and is an art that combines elements of biography, aesthetics, and cultural history. Private portraits often attract an oral history that enlivens the more colorful aspects of local tradition and culture. Public portraits of towering figures such as George Washington, Henry Clay, and Abraham Lincoln were often reproduced in printed format to satisfy popular demand and subsequently attained an iconic, timeless status. Lessons in Likeness is organized in two parts. Part One, the cultural chronology, serves as a backdrop to the biographies of the portrait artists. This section identifies stylistic sources and significant historical moments that influenced the artists and their milieus. Rather than working in isolation, portrait artists were connected to the world around them and influenced by prevailing trends in their trade. Early in the nineteenth century, for instance, Matthew Jouett journeyed to Boston for study with Gilbert Stuart, and upon his return to Kentucky painted in a style that subsequently influenced an entire generation. Later artists, notably Oliver Frazer and William Edward West, studied the lessons of Thomas Sully in Philadelphia. Sully popularized the lush, warmly colored, and highly flattering style of portraiture practiced by many of the itinerant artists whose careers were facilitated by the introduction of steam and rail travel. The Civil War provoked a dramatic shift in the cultural terrain, further augmented by the rise of photography and the emergence of academic art centers. Painters who had previously worked with a master painter, or learned on their own, were now able to study at established schools, especially in Cincinnati, which became one of the leading centers for

the teaching of art in late nineteenth-century America. Several of the teachers there, Frank Duveneck and Thomas Satterwhite Noble in particular, had firsthand experience with avant-garde European styles, notably the realism and naturalism practiced in Munich and Paris in the last quarter of the nineteenth century and then taught in the art schools of New York and Philadelphia. Part Two profiles the artists from this area and period who have appeared in previous art historical literature and have an identifiable body of work represented in public and private collections. Individual biographies provide details of the artists' lives, sources for further study, and locations of works in public collections.

For Love Or Money: a Business Handbook for Portrait Painters 2014-06-14 Chris Saper Becoming a successful commission portrait painter requires much more than just painting well. A Treatise on Portrait Painting From Life 2018-02-11 F. Haynes Excerpt from A Treatise on Portrait Painting From Life: Also, Instructions for Painting Upon Photographs and Painting From Photographs The work is supplemented with a discourse upon Art which the Author hopes may be interesting not only to Artists, Art students, and patrons Of Art, but also to the general reader. The position Of fine Portraiture in Art should rank high; the most celebrated painters have practised it, but the individuality and precision, which in the best are its characteristics and requisites, have precluded the possibility Of there being many very successful. The contemplation Of great Characters of History in their Counterfeit Presentment, as Of those of families whose images are endeared to the social circle, make this Art an essential in the World's interest. Practical Hints on Portrait Painting 2018-02-11 John Burnet Excerpt from Practical Hints on Portrait Painting: Illustrated by Examples From the Works of Vandyke and Other Masters This work on portrait painting originated in an Essay on the beauty and character of the human countenance, from which, in the body of the present treatise, many of the thoughts and arrangements are taken and engrafted. I found, however, that the original work, from being long under my hand, had grown to too great an extent for a single volume, therefore determined to abridge it, and confine my labours in the present instance to the single subject of Portrait Painting - intending to commence with examples from the works of Raffaele and Titian; but, on reflection, decided upon taking the illustrations from artists more coeval with our own times and present practice - recollecting an observation of Sir Joshua Reynolds, that, all things considered, Vandyke must be acknowledged the greatest portrait painter that ever existed. Man with a Blue Scarf: On Sitting for a Portrait by Lucian Freud 2013-09-09 Martin Gayford "An extraordinary record of a great artist in his studio, it also describes what it feels like to be transformed into a work of art." –ARTnews Lucian Freud (1922-2011), widely regarded as the greatest figurative painter of our time, spent seven months painting a portrait of the art critic Martin Gayford. The daily narrative of their encounters takes the reader into that most private place, the artist's studio, and to the heart of the working methods of this modern master—both technical and subtly psychological. From this emerges an understanding of what a portrait is, but something else is also created: a portrait, in words, of Freud himself. This is not a biography, but a series of close-ups: the artist at work and in conversation at restaurants, in taxis, and in his studio. It takes one into the company of the painter for whom Picasso, Giacometti, and Francis Bacon were friends and contemporaries, as were writers such as George Orwell and W. H. Auden. The book is illustrated with many of Lucian Freud's other works, telling photographs taken by David Dawson of Freud in his studio, and images by such great artists of the past as van Gogh and Titian who are discussed by Freud and Gayford. Full of wry observations, the book reveals the inside story of how it feels to pose for a remarkable artist and become a work of art.

Painting Classic Portraits 2013-01-07 Luana Luconi Winner Easy techniques for true-to-life portraits! If you think all portrait-painting books are the same, think again. This book will inspire you to approach your canvas with renewed (or newly discovered) enthusiasm and confidence. Using modern-day techniques, Luana Luconi Winner shows you how to capture not only a physical likeness, but also the personality and unique, natural expression of your subject. Her direct, relaxed teaching style takes the intimidation out of painting portraits, empowering artists of any skill level and medium to turn ordinary people into exceptional works of art. • Time-tested, easy-to-follow techniques for achieving accurate facial shapes and proportions. • 10 quick-reference color charts make it easy to mix skin tones and hair colors for a full range of complexions and ethnicities. • Mini-demonstrations show how to use a variety of mediums--graphite, charcoal, pastels, watercolor and oils--to create sketches and preliminary studies. • Tips on using a digital camera to generate reference material and troubleshoot your compositions. • Three start-to-finish painting demonstrations in oils and pastels illustrate the particulars of painting males and females, adults and children. Destined to become a classic in its own right, Painting Classic Portraits covers every step in the process--from selecting clothes, backgrounds and props that tell a story, to using design elements to stir emotion in your viewers. It's everything you need to know to create timeless portraits and great paintings.

Gilbert Stuart: Master Portrait Painter 2014-06-12 Monticello West Our founding fathers (George Washington, Thomas Jefferson et al) were always one step ahead of

history and having an artist of such immense talents as Gilbert Stuart to paint their portraits has made the images of our founding fathers indelible in the minds of the modern reader. As a TJ enthusiast I often wonder how amazing it must of been to have "sat" for Gilbert Stuart a known storyteller and have your portrait painted. Mr. Jefferson was a favorite portrait sitter and this book is a lovely trip down memory lane (circa 18th century) to read about the fascinating story behind the portraits and the artist.

Painting Their Portraits in Winter 2015-07-08 Myriam Gurba In this artfully crafted collection of new short stories by award-winning author Myriam Gurba, nothing is as it seems on the surface. A Mexican grandmother tells creepy yet fascinating ghost stories to her granddaughters as a way to make them sit still ("How Some Abuelitas Keep Their Chicana Granddaughters Still So That They Can Paint Their Portraits in Winter"). A Polish grandfather spends the night in a Mexican graveyard after a Día de Muertos celebration to discover if ghosts really do consume the food that has been left for them ("Even This Title Is a Ghost"). Unforgettable characters inhabit these cross-border tales filled with introspection and longing, as modern sensibilities weave and wind through traditional folktales creating a new kind of magical realism that offers insights into where we come from and where we may be going. A native Californian, Myriam Gurba earned a BA with honors from UC-Berkeley. Her writing has been published by Manic D Press, Future Tense, City Lights, and Seal Press. Her first book, *Dahlia Season*, won the Publishing Triangle's Edmund White Award for Debut Fiction and was shortlisted for a Lambda Literary Award. She blogs often for the

With grammar, vocabulary, and pronunciation practice in every lesson, students are equipped with a solid foundation for successful speaking. Plus - an array of digital resources provides even more choice and flexibility. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved

using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

Robert Feke 2015-08-09 William Carey Poland  
Excerpt from Robert Feke: The Early Newport Portrait Painter and the Beginnings of Colonial Painting  
It is superfluous, in this presence, to say that the early colonists in this country found but small opportunity, and discovered but little inclination, for the practice of the Fine Arts. They were dedicated to toil and hardship, subject to privations, hurt by the inclemencies of a strange sky, forced to create their farms and homesteads by conquest of the forests, exposed to countless perils from the wild beasts and from the hostile savages whom they had dispossessed of the soil. They had no time to develop or to practice art. Their energies were consumed by the strenuous exertions through which they nourished,

clothed and sheltered their bodies and defended their lives. They had often but little to offer as a reward or emolument to the artist, if any artist could have been found to serve them. Beyond these limitations from without, the colonists, at least those of British origin, were not people whose sentiments and tastes were favorable to art. The seventeenth and eighteenth centuries, outside of a few favored and limited areas, were, on the whole, a time in which art was declining in Europe. The brilliant achievements of painting in Holland, Flanders and Spain in the seventeenth century, were not accompanied by any equal achievements in architecture and sculpture. French art was grandiose, rather than great, or at its best was gay and pleasing through a lively and natural manner of treating trivial themes. Only a few English artists earned permanent eminence, and these in the eighteenth century, mainly in the one art of painting, in which portrait painting bulked conspicuously. The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to

produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

**Liberation successful portrait painting pdf pdf**\_\_\_Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Adolescents who are obese also should have lipid test along with cholesterol test. The lipid test shows levels of kinds of fats in blood such as triglycerides, LDL and HDL.

Right after each acupuncture session, you will feel a bit tired and may need to rest. Some people feel an increase in their energy levels. The response to acupuncture is very individual. In some cases there is immediate relief of symptoms. For some patients, the beneficial effects may only be noticed after undergoing a few sessions. Do not be alarmed and keep your acupuncturist updated on what you are feeling to ensure everything is going as expected. You need never fear the thought of needles ever again. Acupuncture is a beneficial treatment with a long history of effectiveness. It is used to complement current medical therapy and should not replace currently existing medications or treatments.

The safe application of this once exclusively Chinese therapy can now be experienced by chronic disease sufferers worldwide.

Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship. There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

**Analysis successful portrait painting pdf pdf...Obsessive Compulsive Disorder in Adolescents**

Obsessive compulsive disorder or OCD starts from adolescence onwards. OCD is feeling of strong obsessions and compulsions which result in intense discomfort and affects daily functioning. Obsessions are thoughts which are persistent and recurrent. They even include unwanted images and impulses which lead to distress and anxiety. These feelings and thoughts are usually irrational or unrealistic. Compulsions are repetitive rituals or behavior such as checking something again & again, or mental acts such as counting. These obsessions & compulsions cause intense distress and anxiety and can interfere with the daily activities, relationships, social activities and academic functioning. The person with OCD thinks that he has no control over his actions. OCDs are relapsing and chronic illness.

The thoughts change as the adolescent grows. Younger children suffering from OCD often have thoughts of harm

befalling on them and their family such as thief getting into the house through an unlocked door. This will make the children to recheck the door and windows again and again fearing that they might have left the door unlocked accidentally. Teenagers suffering from OCD fear that they might get fall sick due to germs, contaminated food and AIDS. The adolescent develops certain rituals, such as washing hands innumerable times, in order to get over the fear. These rituals help them to think that they have overcome the problem for the time being and give them temporary relief. If they do not perform these rituals, they become more and more anxious.

The symptoms of Osgood-Schlatter disease are swelling of knee, tenderness below knee area and limping. The doctor will check the medical history of the patient and will conduct physical examination and diagnostic procedures such as taking an X-ray. The physician will decide on the treatment to be done by studying the overall health, age, medical history, tolerance for certain medications and extent of the disease. Treatment will include medications, rest, compression, elevation, neoprene knee sleeve and physical therapy. The main aim will be to control and limit the knee pain by cutting down on the adolescent's physical activities. Usually the Osgood-Schlatter disease gets healed over a period of time and in very rare cases is a surgery required.

Slipped capital femoral epiphysis is a problem which affects the hip joint. The ball or head of the thigh bone, also known as femoral head slips from the thigh bone's neck. Because of this the hip joint becomes stiff and painful. Slipped capital femoral epiphysis is the most common disorder of the hip which can happen in both the hips or one and it is more common in boys when compared to girls. Basically, adolescents of the age ten to eighteen years and who are overweight can be affected by this condition. The condition can arise over a time interval of few weeks or years. The condition, if resulted because of trauma and is also called acute slip and if results after a period of time is called chronic slip. Slipped capital femoral epiphysis is caused because of medications, radiation treatment, thyroid problems, and chemotherapy.

There are three degrees of intensity of slipped capital femoral epiphysis, mild, moderate and severe. In mild slipped capital femoral epiphysis, only one third of femoral head slips from the thigh bone. In moderate, one third to half slips and in severe, more than half of the femoral head slips. The symptoms of this condition are pain in hip which increases upon movement, pain in thigh, knee & groin and limpness in the leg. When an adolescent walks there will be a clicking sound in the hip and his/her legs will be turned outwards.

#### Liberation successful portrait painting pdf pdf, **Obesity in Adolescents**

Obesity and overweight are the second most major reasons of preventable deaths in America. Stagnant lifestyle and junk food is to be blamed for more than three hundred thousand deaths per annum. The sad thing is that this problem is on the rise. Obesity is a chronic disease which poses serious health risk to the health of an individual. Also, obesity is the easiest recognizable medical problem, but is very difficult to deal with.

People usually confuse obesity with overweight. Overweight is gaining of a few extra pounds. A person is considered obese when the total body weight is minimum ten percent more than the recommended weight for his/her body structure and height. According to an estimate every year hundred billion dollars are spent on the obesity problem. It is very important to treat the problem as early as possible. Obese children between the age of ten and thirteen have eighty percent chances of growing into obese adults, unless they change their ways and adopt a healthier lifestyle. The obesity problem starts from the age of five and continue till adolescence.

*Legend successful portrait painting pdf pdf*\_\_\_Patients of acupuncture typically experience very minimal or no pain at all, however most of the points are located near nerve endings and muscle tissues. As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland. There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual's appetite, while another has the ability to reduce water retention in the body. The acupuncturist may choose a multi-targeted approach, depending on the requirements of the patient.

Results have showed that of 30 respondents in the test, majority showed functional improvement of various degrees depending on the age and severity of their disabilities. Some improvement was noticeable within a few TAC sessions, especially for drooling, spasticity (scissoring or tiptoeing), ataxia, and poor balance in walking. Functional improvement was noted after one to two courses of TAC. Most children tolerated TAC well, with only occasional pain and minor bleeding in some patients.

The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism. But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication schools. Although it is only short term, it is better than nothing until a cure is found.

Family and school support is necessary to tackle the depression of the adolescent. Parents can get their children admitted in emotional growth schools, boot camps or wilderness programs, to solve the behavioral problems. These programs consist of non medical staff and confrontational therapies. But care must be taken as some of the programs can in turn harm children who are depressed and sensitive. Adolescents, who get caught due to criminal offense, should be taken special care of by their parents. It is best that the child face the consequences and learn a lesson from it. Depressed adolescents respond well to treatment if they are treated comprehensively and

early. More than half of the adults are known to have depression when they were in their teens.

### **Diabetes in adolescents**

Diabetes is a rapidly growing, serious health problem among youngster today. Above thirteen thousand adolescents are diagnosed for type 1 diabetes, every year in America. There has also been an increase in the number of teenagers with type 2 diabetes, which was more common among adults above forty and who were overweight. Clinics are reporting that nearly half of the new childhood diabetes cases are of type 2. Adolescents, who are obese and had type 2 diabetes in the family history, are at a greater risk of developing diabetes.

**Life Lessons from successful portrait painting pdf pdf...**There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

But how well acupuncture does for one patient may vary with another. This depends on the condition of the attack

and the individual.

The best part about acupuncture is that there are no side effects and it is painless. Skillful professionals can do this so you don't suffer from hematoma or pneumothorax. Another disease is potentially dangerous is HIV or hepatitis which can be prevented of course as long as the needles used are properly sterilized. It will be much better if the person uses disposable needles.

Acupuncture has been practiced in the United States for more than 2 decades. Although tests have shown how effective it can be to treat chronic conditions and certain addictions, more studies need to be done to see where else it can be useful.

observation successful portrait painting pdf pdf:Once he or she knows the reason, this is the time that the needles are inserted into different parts of the body. One way is called the multi-targeted approach which is designed to lower the body's weight by increasing the output of the pituitary gland.

The areas where the needles will be inserted will be in the ear and in two of three body points. These areas could also include the mouth, the stomach, the lung, the endocrine, the spleen, kidney or thyroid.

During the initial treatment, the "Four Gate" points would be used to circulate energy throughout the entire body. It is also possible that electro simulation will also be done to increase endorphin release and stimulate metabolism.

The earliest account of this is found in the book called Nei Jing which in English means the Yellow Emperor's Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which

branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

*Discovery successful portrait painting pdf pdf...*Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

### **A Quick-Start guide to Acupuncture**

Using needles to adjust bodily functions to optimum levels is the principle behind acupuncture. Both ancient Chinese and modern Western practitioners have used this technique to relieve many sufferers of chronic disease. Needling is a relatively safe, beneficial treatment strategy that can be used to reduce pain, improve healing, and increase general well-being. But exactly how is this procedure done and what sort of benefits can be obtained?

#### **Procedure for Needle Puncture**

There are two broad categories of acupuncture practice today, traditional Chinese medicine (TCM) and medical acupuncture. Both have their merits, so the choice is individual. The decision for most people hinges upon which philosophy appeals more to them and which technique holds the least apprehension.

Anyone can try facial acupuncture because it is painless and it has proven to reverse the signs of aging. However, if you are pregnant, suffer from the colds or flu, have acute herpes or an allergic reaction, it is best to wait until this has passed.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes. Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

### **A Primer on Medical Acupuncture**

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word "acupuncture". It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people. Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

#### **How does needle puncture work?**

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

**Best Seller : successful portrait painting pdf pdf**~After the regular sessions, it is advisable to go back for

follow up treatment. It should be every 2 weeks for the next 2 months and then once a month later on. Aside from needles, most clinics use herbs in the form of masks, poultices and moisturizers. Before you use it, check with your doctor to make sure there is no allergic reaction to any forms of medication that you are taking. After the first facial acupuncture treatment, you will usually see an increased glow to one's complexion which the Chinese say is an increased Qi or blood flow to the face. It becomes more open, the wrinkles start to disappear and the skin appears more toned.

Some patients will experience immediate relief after the first session but others will not experience anything at all. This is the reason that an average session should be done 12 to 15 times at least 2 to 3 times a week. If acupuncture works for you, then the only thing you need are follow up sessions. This can be done twice every 2 weeks or monthly. It is really up to you. But don't forget to also see your regular doctor so he or she can also monitor the progress of your condition.

### **Instruments**

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

### **Example Of Treatment**

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area.

During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.
- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.

### **Behind the successful portrait painting pdf pdf,What is acupuncture?**

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

### **Basic Procedure**

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

**Reading successful portrait painting pdf pdf:** Before you decide to have a session with them, talk to the acupuncturist to know their credentials. This will also give you the opportunity to find out how much do they

charge as this can be from \$45 to more than \$100 per session.

You can probably ask for the name and contact number of a previous client so you can ask this person how everything went. Remember, if it doesn't work out for you, don't be afraid to find someone else who can do a better job.

The most important thing to do during the session is to relax. If you feel an itch or something, tell the acupuncturist. The same goes if you are nervous or experience a burning sensation so the specialist will take out the needles.

#### **How does sticking needles into your body help manage the stress?**

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, you typically have less of an ability to deal with stress. You get more irritable and find it really difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the body's wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

But you have to remember that acupuncture is not permanent. It merely starts something that you have to finish on your own. Some smokers who go 2 or 3 times a week to the clinic will need to come back for follow up sessions in the future.

At the same time, you have to find ways to prevent yourself from picking up a cigarette. You can do this by staying away from people who smoke since you will be tempted to ask for a stick. You can create your own personal mantra which you repeat to yourself every time you have an urge.

Remember that this craving is only short term and will last only for a few minutes. You have worked so hard to leave this behind so stick to the path and stay smoke free.

There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms,

psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy. Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.

The other virus called cytomegalovirus which also belongs to the family of herpes simplex causes the cells to become enlarged. According to statistics, about eighty percent of adolescents infected with this virus generally don't see any further symptoms. Although EBV has potential to develop infectious mononucleosis in adolescents the virus could make throat and blood cells its home for the lifetime. The virus has the capability to bounce back and reactive from time to time but the consolation is that it would reactivate without symptoms.

The condition usually lasts for 1-2 months. The symptoms may vary from one adolescent to other but may include inflamed lymph glands in areas such as groin, neck and armpits, fever, continuous fatigue, enlarged spleen, sore throat as a result of tonsillitis that can make things difficult to swallow and last but not the least minor liver damage that can lead to short-term jaundice. Some adolescents may also experience symptoms such as abdominal pain, petechial hemorrhage, muscle ache, headache, depression, loss of appetite, skin rash, weakness, dizziness, enlarged prostate, dry cough, swelled genitals and puffy and swollen eyes. Some parents are puzzled by the symptoms of mononucleosis as it may be similar to other medical conditions. It is safe to consult a doctor in such cases.

The viruses are usually transmitted to other people through saliva (the reason why it is also called kissing disease), blood, sharing drinks and sharing utensils. The symptoms usually lasts for 4-6 weeks and do not cross 4

months. The disease is diagnosable but requires a thorough medical history of the adolescent. The diagnosis also involves physical examination of the adolescent and is based on symptoms reported to the physician. The diagnosis is further supported by laboratory tests like blood test, antibody test and test to count white blood cells.

### **Learn successful portrait painting pdf pdf\_\_Variations of Conventional Acupuncture**

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

### **Revenge successful portrait painting pdf pdf-What This Ancient Method Does**

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the

### **Acupuncture Can Help Treat Migraines**

Acupuncture can help treat migraines. This was discovered after a comparative study was done with conventional medical care. In some cases, it even prevents it from happening which helps improve the quality of life for the patient.

To understand how acupuncture helps migraine sufferers, you have to understand that in traditional Chinese medicine, it is believed that an imbalance in the flow of blood and energy causes this to happen.

In order to treat it, the specialist must relieve the tension by inserting needles into the body to improve the blood flow to the brain thus reducing the pain experienced during an attack.
