Sustainable Neighbourhoods in Australia 2015-04-21 Raymond Charles Rauscher This book examines the planning and implementation of policies to create sustainable neighborhoods, using as a case study the City of Sydney. The authors ask whether many past planning and development practices were appropriate to the ways that communities then functioned, and what lessons we have learned. The aim is to illustrate the many variations within a city and from neighborhood to neighborhood regarding renewal (rehabilitation), redevelopment (replacement) and new development. Case study examples of nine City of Sydney neighborhoods note the different histories of planning and development in each. Features of the studies include literature searches, field work (with photography), and analysis. The authors propose a set of sustainability principles which incorporate elements of the twenty seven principles of the 1992 Rio Declaration on Environment and

Development Part One explores sustainable urban planning, and the importance of planning tools that enable best planning outcomes for communities and investors. Common factors in the nine case study neighborhoods are renewal, redevelopment and development pressures affecting Sydney from the 1970s to 2014. Also discussed are the differing circumstances of planning faced by authorities, developers and communities in each of the study areas. Part Two of the book is focused on the case study areas in City of Sydney East area: Woolloomooloo and Kings Cross. Part Three covers case study areas in Sydney's Inner South area: Chippendale, Redfern and Waterloo District. Part Four surveys the Inner West suburb of Erskineville. Part Five looks at the City West area, including the Haymarket District and the Pyrmont and Ultimo District. Part Six concentrates on the North West area suburb of Glebe. Part Seven of the book looks at the growth area of South Sydney District, which includes the suburbs of Beaconsfield, Zetland and the new localities of Victoria Park and Green Square. The authors recount lessons learned and outline directions of planning for sustainable neighborhoods. Finally, the authors challenge readers to apply the lessons of these case studies to further advances in sustainable urban planning.

Volcano and Geothermal Tourism 2010 Patricia Erfurt-Cooper There are over 1300 active volcanoes worldwide and many more dormant or extinct. Some are developed as tourist destinations; others are not, but have great potential. Mount Fuji in Japan attracts over 100 million visitors per year and has immense cultural and spiritual significance, while a number of volcanic areas in national parks, for example Teide in Spain, Yellowstone in the US, Vesuvius in Italy and Tongariro in New Zealand, attract between one to four million tourists each year. In the last decade the designation of nearly 50 geoparks around the world has highlighted their potential for tourism development. This book provides the first global review and assessment of the sustainable use of active and dormant volcanic and geothermal environments for geotourism. The volcano-based tourism sector is further augmented through a closely linked range of geothermal resources and attractions, such as geysers and hot springs, which are discussed in detail throughout individual chapters covering all key volcanic and geothermal regions around the world. It is shown that volcano and geothermal tourism is a subsection of nature-based geotourism and incorporates a variety of other tourism categories such as adventure tourism, extreme tourism, ecotourism, green tourism, educational tourism, and hot spring tourism. This comprehensive book covers the most important issues of this growing tourism sector whilst incorporating relevant global research, making it an essential resource for all in the field. Includes colour plates.

Nature-based Tourism and Conservation 2012-01-01
Clement Allan Tisdell 'This book tackles the two edge sword of non consumptive wildlife tourism: on net does it add to or detract from species conservation? The book does so with a treasure trove of original survey research on the supply and demand for wildlife tourism on both public and private lands from Antarctica to rainforests to marine wildlife. The economic analysis is one of the first to apply new behavioral economics to analyzing tourists' choices.' John Loomis, Colorado State University, US 'Does nature-based tourism help or hinder biodiversity conservation? The answer provided by this authoritative volume is that it depends on context and type of tourism and is no easy panacea. Indeed it can result in an under supply of nature conservation from an economic point of view. This book provides an excellent synthesis, supported by case studies, of the tourism conservation trade off problem, it will appeal to both academic and practitioner audiences.' R. Kerry Turner, CBE, University of East Anglia, UK 'This book encapsulates a lifetime's scholarly work between the authors. It sets out the platform upon which nature-based tourism may be discussed and debated, which it then enriches by a series of case examples, mostly drawn from personal experience. In doing so it performs a valuable service to all interested in this field by capturing those detailed insights into nature-based tourism that are often only acquired by experience.' Stephen Wanhill, Editor, Tourism Economics 'In today's world, even nature seems to have to pay its own way. Nature-based Tourism and Conservation provides detailed real-life examples of how this is working in various parts of the world, from rainforests to Antarctica, and how the tradeoffs can best be measured. Clem Tisdell and Clevo Wilson provide a unique economic perspective to the various issues involved, providing practical illustrations of how others can incorporate the various ways of considering costs and benefits when deciding how to define the role nature-based tourism when planning conservation measures. This book will be useful to a wide range of audiences,

from national protected area agencies to private land-owners who are establishing their own nature-based tourism enterprises.' Jeffrey McNeely, International Union for Conservation of Nature, Switzerland Nature-based Tourism and Conservation unearths new or neglected principles relevant to tourism and recreational economics, environmental valuation and economic theory. Its three parts have chapters on nature-based tourism and its relationships to conservation including case studies dealing with the consequences of World Heritage listing of natural sites, Antarctic, subtropical and tropical national park-based tourism and an NGO's conservation efforts modelled on ecotourism. The final part focuses on tourism utilizing particular wildlife, including sea turtles, whales, penguins, royal albatross, glow-worms and tree kangaroos.

Ethnic and Minority Cultures as Tourist Attractions 2015-01-15 Anya Diekmann This book focuses on ethnic and minority communities in urban contexts and the ways in which their cultures are represented in tourism development. It offers a multi-disciplinary approach which draws on examples and case studies of ethnic and minority communities and cultural tourism development from all around the world, including slums in India, favelas in Brazil, Chinatowns in Australia, Jewish quarters in Central and Eastern Europe, ethnic villages in China, the African district of Brussels, the gay quarter in Cape Town and a desert town in Israel. It offers a positive perspective on ethnic and minority cultures and communities at a time when social and political support is lacking in many countries. This book will be a useful resource for those studying and researching cultural and urban tourism, urban planning and development, community studies and urban and cultural geography.

World Tourism Cities 2014-05-01 Robert Maitland This book presents new research on the capacity of big cities to generate new tourism areas as visitors discover and help create new urban experiences off the beaten track. It examines similarities and differences in these processes in a group of established world cities located in the global circuits of tourism. The cities featured are Berlin, New York, London, Paris, and Sydney. In these cities experienced city visitors are contributing to the 'discovery' of new places to visit. Many neighbourhoods close to the historic centre and to traditional attractions offer the mix of cultural difference and consumption opportunities that can create new experiences for distinctive groups of city users. Each of the cities included in the book offers rich experiences of the re-

imagining and re-branding of neighbourhoods off the beaten track, and informative stories of the complex relationships between visitors, residents and others and of the ambitions of public policy to reproduce these new tourism experiences in other parts of the city. *World Tourism Cities* brings together current research in each of the cities and relates the often separate field of tourism research to some of the mainstream themes of debate in urban studies addressing topics such as consumption, markets and spaces. Drawing on original research in this important group of cities this book has significant messages for public policy. In addition the book engages directly with a range of important current academic debates – about world cities, about cities as sites of consumption and about the smaller scales at which urban neighbourhoods are being transformed. The range of cities and the messages about the making of attractive places provides a timely resource for those focused in this area and the book will also have an appeal among those experienced and sophisticated city users that it focuses on.

How to Lie with Maps 2014-12-10 Mark Monmonier Originally published to wide acclaim, this lively, cleverly illustrated essay on the use and abuse of maps teaches us how to evaluate maps critically and promotes a healthy skepticism about these easy-to-manipulate models of reality. Monmonier shows that, despite their immense value, maps lie. In fact, they must. The second edition is updated with the addition of two new chapters, 10 color plates, and a new foreword by renowned geographer H. J. de Blij. One new chapter examines the role of national interest and cultural values in national mapping organizations, including the United States Geological Survey, while the other explores the new breed of multimedia, computer-based maps. To show how maps distort, Monmonier introduces basic principles of mapmaking, gives entertaining examples of the misuse of maps in situations from zoning disputes to census reports, and covers all the typical kinds of distortions from deliberate oversimplifications to the misleading use of color. "Professor Monmonier himself knows how to gain our attention; it is not in fact the lies in maps but their truth, if always approximate and incomplete, that he wants us to admire and use, even to draw for ourselves on the facile screen. His is an artful and funny book, which like any good map, packs plenty in little space."—*Scientific American* "A useful guide to a subject most people probably take too much for

granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way. For that alone, it seems worthwhile."—Christopher Lehmann-Haupt, *The New York Times* ". . . witty examination of how and why maps lie. [The book] conveys an important message about how statistics of any kind can be manipulated. But it also communicates much of the challenge, aesthetic appeal, and sheer fun of maps. Even those who hated geography in grammar school might well find a new enthusiasm for the subject after reading Monmonier's lively and surprising book."—*Wilson Library Bulletin* "A reading of this book will leave you much better defended against cheap atlases, shoddy journalism, unscrupulous advertisers, predatory special-interest groups, and others who may use or abuse maps at your expense."—John Van Pelt, *Christian Science Monitor* "Monmonier meets his goal admirably. . . . [His] book should be put on every map user's 'must read' list. It is informative and readable . . . a big step forward in helping us to understand how maps can mislead their readers."—Jeffrey S. Murray, *Canadian Geographic*

Wellmania 2018-03-13 Brigid Delaney THE BOOK THAT INSPIRED THE HIT NETFLIX SERIES "I laughed so hard I choked on a donut reading this book."—Jen Mann, NYT-bestselling author of *People I Want to Punch in the Throat* Tired of late-night parties and all-day hangovers, thirty-something-year-old journalist Brigid Delaney decides to test the things that are supposed to make us healthy and whole, looking (with skepticism) to the trillion dollar wellness industry as her guide. She begins with a controversial and brutal 101-day fast, which leaves her glowing and "giddy," but also unemployed, bed-ridden, and strangely stinky. Next, she tries yoga classes, meditation, CBT, Balinese healing, silent retreats, group psychotherapy, and more, sorting through the fads and expensive hype to find out what works, while asking, "What does all this say about us?" With refreshing honesty and biting wit, *Wellmania* is an all too relatable book about the lengths we go to achieve optimal health—and whether it's really worth it. As *The Cut*'s Katey Heaney said: "Reading about all these impossible, expensive, scientifically unsupported self-improvement projects piled end on end, I wanted to shake Delaney, as I might shake myself, were I brave enough to tally all the money I've spent on green juice and witchy crap." According to comedian Judith Lucy,

the result of Delaney's harrowing wellness journey is "a bloody entertaining read that leaves you wondering whether you want to do yoga or get mindlessly drunk and despair at the state of the world."

Cultural Property and Contested Ownership 2016-06-10 Brigitta Hauser-Schäublin Against the backdrop of international conventions and their implementation, Cultural Property and Contested Ownership explores how highly-valued cultural goods are traded and negotiated among diverging parties and their interests. Cultural artefacts, such as those kept and trafficked between art dealers, private collectors and museums, have become increasingly localized in a 'Bermuda triangle' of colonialism, looting and the black market, with their re-emergence resulting in disputes of ownership and claims for return. This interdisciplinary volume provides the first book-length investigation of the changing behaviours resulting from the effect of the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. The collection considers the impact of the Convention on the way antiquity dealers, museums and auction houses, as well as nation states and local communities, address issues of provenance, contested ownership, and the trafficking of cultural property. The book contains a range of contributions from anthropologists, lawyers, historians and archaeologists. Individual cases are examined from a bottom-up perspective and assessed from the viewpoint of international law in the Epilogue. Each section is contextualised by an introductory chapter from the editors.

The Monocle Travel Guide to London (Updated Version) 2020-01-15 Monocle A parade through London's outposts of good food, design, retail, and more, this definitive travel guide will make you feel like a local no matter where you are from. Vast and sprawling, a tangle of roads and lanes, a muddle of rising and falling neighborhoods: London can be a big beast to tame, even for the people who get to call it home. But this ever-changing and regenerating capital can also charm you with its beauty, from wind-rustled parks to that winding River Thames. Its mix of people, abundance of culture, and the occasional louche night on the tiles also makes it a city that will surprise you and win you over. The Monocle Travel Guide to London is a celebration of all the things that the Monocle team loves above this mighty metropolis (and they are brave enough to let you see the wrinkles too). It's a guide to the bars, shops, restaurants, music venues, and museums that they think should edge their way on to your itinerary. They will lure you to some fresher neighborhoods and fill your head with lots of "We really have to see..." ideas. And they will leave you with a clear, crisp view of how the capital is changing. London is a global city but the Monocle team will help you see it as a series of friendly local gems. Hold on to your hat.

The workers who built the building, the politicians, architects and members of the public who championed it and its often beleaguered architect are discussed as is its current world status as a symbol of Australia.
