The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a well-respected vocabulary test that has been in use for close to half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to evaluate receptive vocabulary for American English. It is fast and simple to carry out, saving valuable time so that focus can be placed on implementing successful interventions.

The PPVT-4 evaluation content encompasses a broad array of vocabulary comprehension levels, ranging from preschool through adulthood. The test questions widely sample words that depict 20 subject domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The evaluation gives two equal editions which contain various vocabulary items, making sure that the test-taker has not "memorized" the assessment. One form can be employed before intervention implementation to evaluate test-takers' vocabulary knowledge and the alternative version can be employed for re-assessment to evaluate and document improvement. The PPVT-4 also features a unique Growth Scale Value (GSV) which is reactive to small changes with time.
