Thinking Critically About Law 2018-01-31 Amy R. Codling So you've arrived at university, you've read the course handbook and you're ready to learn the law. But is knowing the law enough to get you the very best marks? And what do your lecturers mean when they say you need to develop critical and analytical skills? When is it right to put your own views forward? What are examiners looking for when they give feedback to say that your work is too descriptive? This book explores what it means to think critically and offers practical tips and advice for students to develop the process, skill and ability of thinking critically while studying law. The book investigates the big questions such as: What is law? and What is 'thinking critically'? How can I use critical thinking to get better grades in assessments? What is the role of critical thinking in the work place? These questions and more are explored in Thinking Critically About Law. Whether you have limited prior experience of critical thinking or are looking to improve your performance in assessments, this book is the ideal tool to help you enhance your capacity to question, challenge, reflect and problematize what you learn about the law throughout your studies and beyond.

Major Decisions 2020-03-13 Laurie Grobman A practical how-to guide for students and a powerful reminder of the value of a humanities education In recent decades, the humanities have struggled to justify themselves in the American university. The costs of attending a four-year college have exploded, resulting in intense pressure on students to major in STEM (science, technology, engineering, and mathematics), business, and other pre-professional or "practical" majors that supposedly transmit more marketable skills than can be acquired from the humanities. But, as Laurie Grobman and E. Michele Ramsey argue, this vision of humanities majors idly pondering the meaning of life for four years is inaccurate. Major Decisions demonstrates how choosing a major in the humanities is a worthwhile investment in a global economy that is shifting in the direction of college graduates who think broadly, critically, and ethically. Indeed, the core skills and knowledge imparted by an education in the humanities—including facility with written and verbal communication, collaboration, problem-solving, technological literacy, ethics, leadership, and an understanding of the human impacts of globalization—are immensely useful to employers across a variety of sectors. Major Decisions serves as a deeply informative guide to students and parents—and provides a powerful reminder to employers and university administrators of the true value of an education in the humanities.

Infusing Critical Thinking Into Your Course 2023-07-03 Linda B. Nilson Critical thinking—every scholar in the literature has defined it, but there is no clearly agreed upon definition. No wonder polls and surveys reveal that few college-level faculty can define critical thinking or know how to teach it. Still, critical thinking keeps appearing in accreditation standards and surveys of the skills employers seek in college graduates. The good news is that we do know that critical thinking can be taught. But the concept cries out for the simplification, translation into discipline-relevant course outcomes, tangible teaching strategies, and concrete assessment techniques that this book will provide. Like a course or a workshop, this book proposes learning outcomes for the reader—promises of what the reader will be able to do after reading it. These include: • explain what critical thinking is in simple terms; • convincingly explain to students why it is important for them to learn critical thinking, and, if they tune out, what they stand to lose; • overcome the challenges that teaching critical thinking presents; • identify the type of course content to which critical thinking can be applied and, therefore, that readers can use to teach critical thinking; • integrate critical thinking into the design of a new or existing course in any discipline; • write assessable critical thinking learning outcomes that are compatible with and make sense in any discipline; • select and adapt activities and assignments that will give students no- or low-stakes practice with feedback in critical thinking using a variety of questions, tasks, and teaching methods.

Thinking Critically and Ethically about Research for Education 2021-11-29 Alison Fox Thinking Critically and Ethically about Research for Education draws on the experiences of a range of researchers in the discipline to explore the lived realities, including ethical and methodological complexities, involved in undertaking educational research. Using global case studies, this book examines the meaning of ethical research practice and raises questions about representation, power and empowerment in the field. It provides critical reflections from researchers, reviewing the methodologies they used in their studies and the ethical implications of these in theory and practice. The book highlights the various difficulties and realities present in education research and provides researchers with the tools necessary for refining their skills and understanding ethical research methodologies. The chapters reflect authors' responses to the following questions: What values prompted you to do this work and how did you share these with participants? What were the ethical considerations raised beforehand and how were these tackled in terms of meeting obligations (including to ERBs), maximising benefits and dealing with issues arising during the study and through to publication? What does 'empowerment' and/or 'voice' mean to you as a researcher and how did you express this to your participants? In what ways were the participants given opportunities to be empowered in or through your study? With critical discussions on ethics and research practices in education research, this book is ideal for student, novice and experienced researchers looking to undertake ethical education research.

Handbook of Research on Advancing Critical Thinking in Higher Education 2015-07-17 Wisdom, Sherrie The importance of critical thinking has surged as academics in higher education realize that many students, upon entering college, lack the critical thinking skills necessary to succeed. While much has been written regarding the 'lack' of critical thinking, less has been written on the success of methods implemented to develop this fundamental skill. The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies. Due to the difficulties associated with teaching critical thinking skills to learners of any age, this publication is a crucial addition to the scholarly reference works available to pre-service and early career teachers, seasoned educational professionals, professors across disciplines, curriculum specialists, and educational administrators.

Thinking Critically About Environments for Young Children 2014 Lisa P. Kuh Using a practice-based focus and a researcher lens, the contributors consider the ways in which environments for children enhance or diminish educational experiences, how social constructs about what is good for children influence environmental

design, and what practitioners can do in their own work when creating learning environments for young children. There are copious examples from practice, lessons learned, and illustrations and photographs of key aspects of the environments they discuss. Organized into three parts, this essential text addresses: Aesthetics, politics, and space configurations in school environments for young children. Outdoor spaces, beginning with intentionally designed playscapes, children's gardens, and spontaneous improvisational play venues. The role of environments outside school, including informal learning environments that promote science knowledge, museum spaces, and virtual environments. "Through rich examples and clear explanations of the historical, political, and aesthetic dimensions of design, [Kuh and her colleagues] help us think critically about environments and provide theoretical and practical tools to support our efforts." —Benjamin Mardell, professor, Early Childhood Education, Lesley University. "An enlightening book that gives educators new lenses for thinking about and creating the kinds of places that can optimize children's growth and learning, especially in this era of standardization. Educators need this book!" —Nancy Carlsson-Paige, professor emerita, Lesley University "For everyone who wants to take educational settings beyond minimal standards, this collection is a thoughtful and inspiring guide." —Louise Chawla, professor, Environmental Design Program, University of Colorado, Boulder

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary 2015-07-22 Truth and Reconciliation Commission of Canada This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

This edited volume offers an international perspective on citizenship education enacted in specific socio-political contexts. Each chapter includes a pointed conceptualization of citizenship education—a philosophical framework—that is then applied to specific national cases across Europe, Asia, Canada and more. Chapters emphasize how such frameworks are implemented within local contexts, encouraging particular pedagogical/curricular practices even as they constrain others. Chapters conclude with suggestions for productive change and how educators might usefully engage contemporary contexts through citizenship education.

Revisiting Moroccan Migrations 2018-02-02 Mohammed Berriane Over the 20th century, Morocco has become one of the world's major emigration countries. But since 2000, growing immigration and settlement of migrants from sub-Saharan Africa, the Middle East, and Europe confronts Morocco with an entirely new set of social, cultural, political and legal issues. This book explores how continued emigration and increasing immigration is transforming contemporary Moroccan society, with a particular emphasis on the way the Moroccan state is dealing with shifting migratory realities. The authors of this collective volume embark on a dialogue between theory and empirical research, showcasing how contemporary migration theories help understanding recent trends in Moroccan migration, and, vice-versa, how the specific Moroccan case enriches migration theory. This perspective helps to overcome the still predominant Western-centric research view that artificially divide the world into 'receiving' and 'sending' countries and largely disregards the dynamics of and experiences with migration in countries in the Global South. This book was previously

published as a special issue of The Journal of North African Studies.

The Power of Critical Thinking 2015 Lewis Vaughn "The Power of Critical Thinking offers a comprehensive introduction to the systematic, rational evaluation of the arguments, claims, and evidence that lead to beliefs. In clear and accessible language, the authors take students through all essential components of critical analysis--from identifying premises and conclusions, to recognizing common fallacies and misrepresentations of fact, to using deductive and inductive reasoning to deconstruct arguments, to overcoming psychological, social, and philosophical impediments that can cloud clear thinking. Emphasizing the importance of critical thinking to personal development and success with expanded "Field Problems" and new "Everyday Problems and Decisions Boxes," The Power of Critical Thinking provides students with the skills they need to engage meaningfully with the world around them--both inside and outside the classroom."--

Developing Children's Critical Thinking through Picturebooks 2014-07-25 Mary Roche This accessible text will show students and class teachers how they can enable their pupils to become critical thinkers through the medium of picturebooks. By introducing children to the notion of making-meaning together through thinking and discussion, Roche focuses on carefully chosen picturebooks as a stimulus for discussion, and shows how they can constitute an accessible, multimodal resource for adding to literacy skills, while at the same time developing in pupils a far wider range of literary understanding. By allowing time for thinking about and digesting the pictures as well as the text, and then engaging pupils in classroom discussion, this book highlights a powerful means of developing children's oral language ability, critical thinking, and visual literacy, while also acting as a rich resource for developing children's literary understanding. Throughout, Roche provides rich data and examples from real classroom practice. This book also provides an overview of recent international research on doing 'interactive read alouds', on what critical literacy means, on what critical thinking means and on picturebooks themselves.
