The scholars contend that notwithstanding its sometimes aimless look and apparently unstructured material, casual conversation is a very structured activity and performs a crucial role in the social formation of reality. The book goes through real examples of casual conversations including participants diverging in age, gender, ethnicity, and socio-economic class¹². Deriving on perspectives from sociology, linguistics, and critical semiotics, the book provides readers with the analytic skills to portray the levels of structure and critical interpretive structures to clarify the 'social work' that goes on through chat.

The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary assessment that has been in operation for almost half a century. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is made to measure receptive vocabulary for Standard American English. It is fast and effortless to administer, preserving valuable time so that concentration can be placed on implementing successful approaches.

The PPVT-4 test content includes a broad range of vocabulary comprehension levels, ranging from preschool through adulthood. The evaluation questions broadly sample words that depict 20 subject domains (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary.

The test provides two identical forms which hold various vocabulary terms, guaranteeing that the person has not “memorized” the evaluation. One edition can be used prior to intervention implementation to assess individuals’ vocabulary understanding and the other version can be used for re-assessment to assess and record improvement. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is reactive to small changes in time.
