Loss of Signal 2014-07-25 National Aeronautics and Space Administration NOTE: NO FURTHER DISCOUNT FOR THIS PRODUCT-- OVERSTOCK SALE -- Significantly reduced list price"Loss of Signal", a NASA publication (to be available in May 2014) presents the aeromedical lessons learned from the Columbia accident that will enhance crew safety and survival on human space flight missions. These lessons were presented to limited audiences at three separate Aerospace Medical Association (AsMA) conferences: in 2004 in Anchorage, Alaska, on the causes of the accident; in 2005 in Kansas City, Missouri, on the response, recovery, and identification aspects of the investigation; and in 2011, again in Anchorage, Alaska, on future implications for human space flight. As we embark on the development of new spacefaring vehicles through both government and commercial efforts, the NASA Johnson Space Center Human Health and Performance Directorate is continuing to make this information available to a wider audience engaged in the design and development of future space vehicles." Loss of Signal" summarizes and consolidates the aeromedical impacts of the Columbia mishap process--the response, recovery, identification, investigative studies, medical and legal forensic analysis, and future preparation that are needed to respond to spacecraft mishaps. The goal of this book is to provide an account of the aeromedical aspects of the Columbia accident and the investigation that followed, and to encourage aerospace medical specialists to continue to capture information, learn from it, and improve procedures and spacecraft designs for the safety of future crews. This poster presents an outline of "Loss of Signal" contents and highlights from each of five sections - the mission and mishap, the response, the investigation, the analysis and the future. Army Fundamentals 2017-05-01 Bethan Greener How do we understand the functions of militaries of democratic societies? How good soldiers are made, how they behave when posted overseas, the issue of gender and the increased use of military beyond their core functions all demand a closer academic examination. This edited collection brings together work by exciting new scholars as well as established academics, and examines the identity and functions of the New Zealand Army from a range of perspectives. Drawing on anthropology, political studies, international relations, development studies, law, and defence and security studies, it provides a multi-faceted view of one military organisation, and helps further our understanding of the character and the challenges of military personnel and institutions in the twenty-first century.

Handbook of Disaster and Emergency Management. First Edition 2017-10-10 Amir Khorram-Manesh We propose here a comprehensive educational program, based on the best available evidence to date drawn from recent publications intended to impart the knowledge, skills, and abilities necessary for the role of crisis manager. We expect this program to enhance the intercultural and interagency performance across the Disaster Management (DM) cycle. Here "Intercultural" does not refer to different nations and cultural backgrounds but rather to working cultures within diverse agencies. Since communication and information shortcomings are the most common reason for failed DM, this educational program focuses heavily on collaboration and interoperability between trained professionals involved in disaster response to ensure that they understand the need for collaboration and are aware of each other's limitations and possibilities. The aim of programs such as this is not to re-educate people in respect to their profession/area of expertise, but rather to train them in elements specific to DM and ways in which they can apply their existing knowledge and professional expertise in the disaster context. Such multidisciplinary programs cover all disaster phases, accommodate the needs of each organization, and offer a safe environment where participants are able to learn by doing in an interactive environment--vertically within their own organization and horizontally together with other organizations--by focusing on shared training, cooperation, and intercultural understanding. Such programs bring some degree of standardization and offer a thorough evaluation of participants and the program by using evidence-based scientific methods. One important part of the program is to offer a standardized handbook in which all necessary information is gathered. This is not intended as a substitute for reference books, but it is intended to make the information accessible and easy to learn so that the information can be combined with the practical parts of the education

The Lifework and Legacy of Iona and Peter Opie 2020-04-02 Julia C. Bishop Iona and Peter Opie were twentieth-century pioneers. Their research and writing focused on the folklore of British children - their games, rhymes, riddles, secret languages and every variety of the traditions and inventions of the children's collective physical and verbal play. Such closely observed, respectful, good-humoured and historically attuned writing about the traditions of childhood was a revelation to English-language readers around the world. Their numerous books were a rare phenomenon: they attracted a popular readership far beyond the professional and academic communities. For those who work with children, their collaborative research was a powerful influence in confirming the immense capacities of the young for cooperation, conservation, invention and imagination. Their books challenged - then and now - the bleak and limited view of children which focuses on their smallness, ignorance and powerlessness. The writers in this volume pay their tribute to the Opies by exploring a wonderfully varied topography of children's play, from different countries and different perspectives. Their research is vivid and challenging; that is, as it should be, in the tradition of the Opies. This book was originally published as a special issue of the International Journal of Play.

The Price of Aid 2018-02-19 David C. Engerman This study of US and Soviet aid efforts in India during the Cold War "makes a major contribution towards a necessary discussion of the politics of aid" (Times Higher Education). Debates over foreign aid are often strangely ahistorical. Economists argue about how to make aid work while critics bemoan money wasted on corruption, ignoring the fundamentally political character of aid. The Price of Aid turns the standard debate on its head. By exposing the geopolitical calculus underpinning development assistance, it also exposes its costs. India stood at the center of American and Soviet aid competition throughout the Cold War, as both superpowers saw developmental aid as a way of pursuing their geopolitical goals by economic means. Drawing on recently declassified files from seven countries, David Engerman shows how Indian leaders used Cold War competition to win battles at home, eroding the Indian state in the process. As China spends freely in Africa, the political stakes of foreign aid are rising once again. "A superb, field-changing book . . . A true classic." —Sunil Amrith

An Aid to the MRCP PACES 2009-04-13 Robert E. J. Ryder The forerunner to this book - Ryder, Mir & Freeman's 'An Aid to the MRCP Short Cases' - rapidly established itself as a classic and has sold over 30,000 copies. The new Progressive Assessment of Clinical Examination Skills (PACES) has replaced the old short case exam and, as a result, the authors have revised, reworked and extended their highly successful text so that it continues to address the study needs of candidates. This new revision aid is now presented in two volumes: An Aid to the MRCP PACES Volume 1: Stations 1, 3 and 5 An Aid to the MRCP PACES Volume 2: Stations 2 and 4 This Volume covers Station 1 'Respiratory and Abdominal Systems', Station 3 'Cardiovascular and Neurological Systems' and Station 5 'Skin, Locomoter, Eyes and the Endocrine System'. The 200 cases have been written in accordance with the new examining and marking schemes used for the exam. They provide an invaluable training and revision aid for all candidates.

Project Eagle 2017-05 Robert S. Kim Robert S. Kim contributes to a fuller understanding of Asia in World War II by revealing the role of American Christian missionary families in the development of the Korean independence movement and the creation of Project Eagle, the forgotten alliance between that movement and the Office of Strategic Services (OSS), called Project Eagle. Project Eagle tells the story of American missionaries in Korea from 1884 to 1942. They brought a new religion, modern education, and American political ideals to a nation conquered and ruled by the Japanese Empire. The missionaries' influence inextricably linked Christianity and American-style democracy to Korean nationalism and independence, meanwhile establishing an especially strong presence in Pyongyang. Project Eagle connects this era for the first time to OSS-Korean cooperation during the war through the story of its central figures: American missionary sons George McCune and Clarence Weems and one of Korea's leading national heroes, Kim Ku. Project Eagle illuminates the shared history between Americans and Koreans that has remained largely unexamined since World War II. The legacy of these American actions in Korea, ignored by the U.S. government and the academy since 1945, has shaped the relationship of the United States to both North Korea and South Korea and remains crucial to understanding the future of U.S. relations with both Koreas.

Winning the Peace 2008-01-28 Nicolaus Mills Politicians of every stripe frequently invoke the Marshall Plan in support of programs aimed at using American wealth to extend the nation's power and influence, solve intractable third-world economic problems, and combat world hunger and disease. Do any of these impassioned advocates understand why the Marshall Plan succeeded where so many subsequent aid plans have not? Historian Nicolaus Mills explores the Marshall Plan in all its dimensions to provide valuable lessons from the past about what America can and cannot do as a superpower.

Herbert H. Lehman 2016-12-20 Duane Tananbaum The definitive biography of New York State's four-term Governor, US Senator, humanitarian, and Jewish liberal political reformer. This new biography of Herbert Lehman—the first in a half century—fills the void left by historians and political scientists who have neglected one of the truly great liberal icons of the mid-twentieth century. Based on extensive research in archival sources, Herbert H. Lehman restores this four-term Governor of New York, US Senator, national and international humanitarian, and political reformer to his rightful place among the pantheon of liberal heroes of his era. By focusing on Lehman's interactions with Al Smith, Franklin Roosevelt, Harry Truman, Lyndon Johnson, and John Kennedy, Duane Tananbaum shows how Lehman succeeded politically despite his refusal to compromise with his conscience. In his thirty-five years of public service, Herbert Lehman fought the Republicans in the State Legislature to provide economic security for New Yorkers during the Great Depression, and he battled the bureaucrats in the Roosevelt and Truman administrations and the United Nations Relief and Rehabilitation Administration to feed the starving people in Europe and Asia during and after World War II. His efforts on behalf of "the welfare state," civil rights legislation, and immigration reform helped keep the liberal agenda alive until Congress, and the nation, were ready to enact it into law as part of Lyndon Johnson's Great Society in 1964-1965. Duane Tananbaum is Professor of American History at Lehman College, City University of New York, and the author of The Bricker Amendment Controversy: A Test of Eisenhower's Political Leadership.

Hegemony and Culture in the Origins of NATO Nuclear First-Use, 1945-1955 2005-11-18 A. Johnston Johnston argues that the preemptive first-use of nuclear weapons, long the foundation of American nuclear strategy, was not the carefully reasoned response to a growing Soviet conventional threat. Instead, it was part of a process of cultural 'socialization', by which the United States reconstituted the previously nationalist strategic cultures of the European allies into a seamless western community directed by Washington. Building a bridge between theory and practice, this book examines the usefulness of cultural theory in international history.

Emergency Care of Children and Young People 2008-04-15 Karen Cleaver Children and young people account for a quarter of all patients treated in emergency departments in the UK, with three million children attending emergency departments every year. Emergency Care of Children and Young People prepares practitioners for the challenges of caring for children in emergency departments. Children requiring emergency care have unique and differing needs and may not respond or cooperate during an initial assessment as an adult would. Emergency Care of Children and Young People is an essential reference for all health care professionals working with children in the emergency department setting. It explores the key skills needed for effective care and presents the evidence which underpins effective practice in an accessible and informative format. Emergency Care of Children and Young People covers a complete range of topics including legal and ethical aspects, minor injuries, major trauma, effective ways to communicate with children through the use of play and distraction, meningitis and resuscitation.

The Sun Turned Black 1995 Ian Knight The Sun would never set on the British Empire. On 22 January, 1879, at the height of battle between Regular and Colonial troops and King Cetshwayo's Zulu Army, at a remote African crag called Isandlwana, the sun turned black. In ordinary terms, it was no more than a partial eclipse, but as a portent, it foreshadowed an ignominious defeat and a dark stain that would be cast over Britain's imperial policy and military pride. troops - experienced in African warfare, armed with modern rifles, well-supplied, supported by and encamped at their leisure on ground of their own choosing - came to be annihilated by a tribal people very largely with only spears. It also tells the story of the successful defence, on the night of the massacre, of a tiny outpost held by just over 100 men, against repeated assaults of some 4000 men. This is a revised edition of Ian Knight's Zulu.

Cold Wars 2020-03-19 Lorenz M. Lüthi What was the Cold War that shook world politics for the second half of the twentieth century? Standard narratives focus on Soviet-American rivalry as if the superpowers were the exclusive driving forces of the international system. Lorenz M. Lüthi offers a radically different account, restoring agency to regional powers in Asia, the Middle East and Europe and revealing how regional and national developments shaped the course of the global Cold War. Despite their elevated position in 1945, the United States, Soviet Union and United Kingdom quickly realized that their political, economic, and military power had surprisingly tight limits given the challenges of decolonization, Asian-African internationalism, pan-Arabism, pan-Islamism, Arab-Israeli antagonism, and European economic developments. A series of Cold Wars ebbed and flowed as the three world regions underwent structural changes that weakened or even severed their links to the global ideological clash, leaving the superpower Cold War as the only major conflict that remained by the 1980s.

Uprooting the Diaspora 2023-03-07 Sarah A. Cramsey In Uprooting the Diaspora, Sarah Cramsey explores how the Jewish citizens rooted in interwar Poland and Czechoslovakia became the ideal citizenry for a post-World War II Jewish state in the Middle East. She asks, how did new interpretations of Jewish belonging emerge and gain support amongst Jewish and non-Jewish decision makers exiled from wartime east central Europe and the powerbrokers surrounding them? Usually, the creation of the State of Israel is cast as a story that begins with Herzl and is brought to fulfillment by the Holocaust. To reframe this trajectory, Cramsey draws on a vast array of historical sources to examine what she calls a "transnational conversation" carried out by a small but influential coterie of Allied statesmen, diplomats in international organizations, and Jewish leaders who decided that the overall disentangling of populations in postwar east central Europe demanded the simultaneous intellectual and logistical embrace of a Jewish homeland in Palestine as a territorial nationalist project. Uprooting the Diaspora slows down the chronology between 1936 and 1946 to show how individuals once invested in multi-ethnic visions of diasporic Jewishness within east central Europe came to define Jewishness primarily in ethnic terms. This revolution in thinking about Jewish belonging combined with a sweeping change in international norms related to population transfers and accelerated, deliberate postwar work on the ground in the region to further uproot Czechoslovak and Polish Jews from their prewar homes.

Fighting EOKA 2015-03-19 David French Drawing upon a wide range of unpublished sources, including files from the recently-released Foreign and Commonwealth Office 'migrated archive', Fighting EOKA is the first full account of the operations of the British security forces on Cyprus in the second half of the 1950s. It shows how between 1955 and 1959 these forces tried to defeat the Greek Cypriot paramilitary organisation, EOKA, which was fighting to bring about enosis, that is the union between Cyprus and Greece. By tracing the evolving pattern of EOKA violence and the responses of the police, the British army, the civil administration on the island, and the minority Turkish Cypriot community, David French explains why the British could contain the military threat posed by EOKA, but could not eliminate it. The result was that by the spring of 1959 a political stalemate had descended upon Cyprus, and none of the contending parties had achieved their full objectives. Greek Cypriots had to be content with independence rather than enosis. Turkish Cypriots, who had hoped to see the island partitioned on ethnic lines, were given only a share of power in the government of the new Republic, and the British, who had hoped to retain sovereignty over the whole of the island, were left in control of just two military enclaves.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

History first aid aide memoire pdf pdf~The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

The bone marrow replaces small amounts of blood is lost due to some reason without making a person anemic. But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

Periodontal disease can be diagnosed by a dentist or a periodontist after reviewing the complete medical history and also physical examination of the teenager's mouth. Usually x-ray of the teeth is taken to evaluate the disease. Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as "gingivitis" in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist's treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis.

Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periodontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth.

There are various treatments available for periodontal disease which is decided by the dentist depending on teenager's age, medical history and health in general. The method of treatment also depends on the extent to

which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration.
