*Legend rimedi per il corpo e lanima agenda:***Is Acupuncture The Remedy for You?**

With the growing acceptance of alternative medicine in Western cultures, acupuncture is quickly becoming a popular practice. More and more people today are choosing acupuncture over western medicine to treat bodily pains, relieve stress, or to promote overall health. If you are thinking about trying acupuncture but are wondering if it is safe or if it's the right treatment for you, the following information may aid you in making a more informed decision.

Description and Origin

Acupuncture is the practice of inserting fine needles into specific points in the body for therapeutic purposes. According to theory, these specific points called "acupuncture points" lie along pathways of the body along which one's vital energy is said to flow. The needles are used to promote free-flow of energy in areas of the body that circulation may have stagnated. Although acupuncture is practiced in many Asian cultures such as Japan, Tibet, and Korea the practice is commonly known to have originated in China.

These courses can be chosen on the basis of modules or on an hourly basis. The course material covers the history, theory and techniques of acupuncture. Courses that offer tools such as acupuncture DVD and video are ideal for acupuncturists or students of acupuncture to improve their clinical expertise.

Once you graduate from acupuncture school, some will open their own practice while others will first work for a clinic. Those who decide to be employed will work with other professionals that may include naturopaths, chiropractors and other specialists that are also into Oriental Medicine.

The average acupuncturist makes about \$45,000 a year but this can change in the years to follow as they add years or experience under their belt. This just goes to show that if you work hard, you too will make a fortune. Just make sure that you do this properly for each

patient because one mistake could make this all go away.

Acupuncture Could Help You Finally Manage Your Stress Levels

Today's world can fill the very busy individual with a lot of stress. Without some way of removing this stress from your system, you're placing yourself in danger from a lot of stress-related diseases. You might suffer from insomnia or headaches or very serious heart diseases.

You could take anti-stress pills to help you relax but, like me, you might also be worried about the side effects these pills could have. The good news is that you could try acupuncture at least once to see if it could help you manage the stress. It certainly couldn't hurt to try acupuncture if all you're after is stress relief.

If you find it doesn't work for you, then you can just easily stop taking acupuncture treatments. If it works, though, then you can say you've found a good treatment for stress that doesn't rely on those dangerous chemicals and pills.

Hope rimedi per il corpo e lanima agenda__Acupuncture in the Western World

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

First rimedi per il corpo e lanima agenda;How It Stops the Addiction

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation. Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

Unfortunately, standards of acupuncture have not been fully approved by the FDA due to many unregulated practices that still exist such as the re-use of needles. Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

Should You Try It

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to one's health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the

therapeutic properties of acupuncture have not yet been proven.

Acupuncture For All Those Simple Aches And Pains

If, like me, you have quite a fear of needles and injections, then acupuncture, that practice of sticking needles onto different parts of your body to cure sicknesses might seem scary at first.

However, if you've been long been suffering from some problems like headaches or chronic pains and your regular visits to the doctor don't seem to be helping you, then why not consider a trip to an acupuncture specialist? After all, who hasn't heard of somebody's aunt somewhere suffering from arthritis and trying out everything that the doctors recommended all to no avail, only to finally be cured by a really good acupuncturist? Perhaps you were wondering if it could actually work for you. You might feel a bit skeptical since traditional Chinese medicine doesn't immediately coincide with theories in modern Western medicine. In fact, the use of needles to cure people was discovered thousands of years ago in China long before microscopes or x-ray machines were invented or before bacteria and germs were discovered.

Obesity in Adolescents

Obesity and overweight are the second most major reasons of preventable deaths in America. Stagnant lifestyle and junk food is to be blamed for more than three hundred thousand deaths per annum. The sad thing is that this problem is on the rise. Obesity is a chronic disease which poses serious health risk to the health of an individual. Also, obesity is the easiest recognizable medical problem, but is very difficult to deal with.

People usually confuse obesity with overweight. Overweight is gaining of a few extra pounds. A person is considered obese when the total body weight is minimum ten percent more than the recommended weight for his/her body structure and height. According to an estimate every year hundred billion dollars are spent on the obesity problem. It is very important to treat the problem as early as possible. Obese children between the age of ten and thirteen have eighty percent chances of growing into obese adults, unless they change their ways and adopt a healthier lifestyle. The obesity problem starts from the age of five and continue till adolescence.

It has been found that weight gain is directly related to emotions. Other than physical hunger, people reach for a huge chocolate bar or a big platter of burger and fries because of the sense of comfort derived from food and eating. More often than not, excessive weight gain is an emotional issue, rather than a mere physical one. You may not realize it, but you tend to take in more food whenever you're stressed, upset, or pressured.

In Acupuncture, there are specific spots on the body being targeted by the hair-like needles. These spots are linked to certain areas in the body and by stimulating these spots; the patient will achieve a greater sense of inner balance. As these points are inserted by the needles, certain hormones are released throughout the body. These substances work by helping you manage hunger and efficiently control the impulse to overeat.

Lolita rimedi per il corpo e lanima agenda;Obsessive Compulsive Disorder in Adolescents

Obsessive compulsive disorder or OCD starts from adolescence onwards. OCD is feeling of strong obsessions and compulsions which result in intense discomfort and affects daily functioning. Obsessions are thoughts which are persistent and recurrent. They even include unwanted images and impulses which lead to distress and anxiety. These feelings and thoughts are usually irrational or unrealistic. Compulsions are repetitive rituals or behavior such as checking something again & again, or mental acts such as counting. These obsessions & compulsions cause intense distress and anxiety and can interfere with the daily activities, relationships, social activities and academic functioning. The person with OCD thinks that he has no control over his actions. OCDs are relapsing and chronic illness. The thoughts change as the adolescent grows. Younger children suffering from OCD often have thoughts of harm befalling on them and their family such as thief getting into the house through an unlocked door. This will make the children to recheck the door and windows again and again fearing that they might have left the door unlocked accidentally. Teenagers suffering from OCD fear that they might get fall sick due to germs, contaminated food and AIDS. The adolescent develops certain rituals, such as washing hands innumerable times, in order to get over the fear. These rituals help them to think that they have overcome the problem for the time being and give them temporary relief. If they do not perform these rituals, they become more and more anxious.

Acne in Adolescents

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

Acupuncture and Autism

Studies have shown that there is an increase in the number of children that have been diagnosed with autism. Until now, doctors have not yet found a cure to this illness which is why some parents want to experiment with alternative forms of treatment and one example is acupuncture.

Acupuncture is a holistic approach in treating and preventing certain diseases. Its main tool are very thin needles that are inserted to targeted points in the body. The body has about 400 of them linked through a system known as meridians or pathways. Once these are stimulated, these are supposed to create balance in the body.

Autism on the other hand is a brain disorder that is long term. This disease is characterized by deficits in language, social communication and cognition. Children who are diagnosed with this illness may also suffer from secondary problems such as aggression, irritability, stereotypes, hyperactivity, negativism, volatile emotions, temper tantrums, short attention span and obsessive-compulsive behavior.

Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

It is painless and cost efficient and a lot of studies have shown that it is effective in treating various illnesses and preventing some of them.

Miracle rimedi per il corpo e lanima agenda;High Blood Pressure in Adolescents

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.

There are many premenstrual syndrome symptoms which can be broadly classified as neurologic & vascular symptoms, psychological symptoms, gastrointestinal symptoms, fluid retention, eye problems and respiratory problems. The cause of premenstrual syndrome are fluctuations in the levels of progesterone & estrogen, hypoglycemia, hyperprolactinemia, psychogenic factors, changes in carbohydrate metabolism, excessive aldosterone, progesterone allergy and water retention by kidneys. The good thing is that premenstrual syndrome can be prevented by exercising regularly, eating balanced diet and sleeping adequately.

Dysmenorrhea is feeling intense menstrual pain and cramps. Depending on the severity, dysmenorrhea is stated as primary dysmenorrhea or secondary dysmenorrhea. Primary

dysmenorrhea symptoms are felt from the onset of the menstrual periods and are felt life-long. Because of abnormal uterine contractions due to chemical imbalance, severe menstrual cramping is experienced. Secondary dysmenorrhea starts in the later stages. The causes are different for primary and secondary dysmenorrhea. Secondary dysmenorrhea can be blamed on medical conditions such as endometriosis, uterine fibroids, pelvic inflammatory disease, tumors, infections, and abnormal pregnancy.

Dysmenorrhea symptoms are lower abdomen cramping & pain, lower back pain, nausea, diarrhea, vomiting, fatigue, fainting, weakness and headaches. Females who are overweight, smoke, and have started to menstruate before turning eleven are at a higher risk of developing dysmenorrhea. Females who drink alcohol during menstrual period experience prolonged pain. After studying the health conditions, age, cause of dysmenorrhea, and extent of condition of the individual, corresponding treatment will be recommended. Regular exercise, abdominal massage, hot bath, vitamin supplements, and dietary modifications can help overcome dysmenorrhea.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

Like other strategies used in treating health conditions, acupuncture may have some side effects. Medications have side effects and allergic reactions, surgeries have risk of infection and complications. For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with

very strict rules and regulations.

How do treatments go?

An acupuncturist will do an initial evaluation of your medical history and your body's current state. Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

Although the exact scientific basis is still unknown, recent theories seem to suggest involvement of complicated neurochemical effects in the brain, nerve to spinal cord impulse modulation, and microscopic connective tissue changes.

What risks and side effects are of concern?

The use of things not completely understood for the treatment of medical conditions is nothing new. Penicillin and aspirin were used for decades solely on the basis of their beneficial effects, without doctors knowing exactly how they worked. Results are what are truly important. However, it is equally important is to ensure that the technique is used safely.

Allergic reactions in very rare cases also produce severe reaction known as "anaphylaxis" for which the signs are difficulty in breathing, difficulty in swallowing, swelling in tongue, lips and throat and dizziness. This allergic reaction occurs as soon as the system is exposed to substances that trigger allergic reactions like peanut although some reactions are delayed by as much as four hours.

The reasons why people get allergies can be various and one of the reasons could be hereditary but that that does not necessarily mean that children are bound to get allergies

from their parents. Some of the common allergens include food, airborne particles, insect bite and sting, medicines, chemicals etc. Food allergies typically occur in infants and usually vanish as the child grows. The list of food allergens includes milk & dairy products, wheat, soy, eggs, peanuts, and seafood. Some people are allergic to stings and bites of certain insects. The venom in the bite is the one which actually causes reaction and can be as serious as anaphylactic in some teens. Some teens are also allergic to airborne particles which are also known as environmental allergens. They are also the commonest of all the allergens. Examples of these allergens include dust mites, animal dander, mold spores, grass pollens, trees and ragweed. Some adolescents are also allergic to certain antibiotic medicines. Another common allergen is chemical, certain chemicals present in laundry detergents or cosmetics can cause rashes that are itchy in nature.

Allergists usually treat allergic problems. They may ask questions like symptoms of the allergy and whether it is hereditary. They may also prescribe certain diagnostic tests like blood or skin test depending on the type of allergy. The best way to treat allergies is to completely avoid the substances that cause allergies. However there are certain medications and injections are also available to treat allergies.

These needles will be kept in place for 30 to 45 minutes depending on how much support is needed. These are then removed and replaced with ear tacs with adhesives to make sure they are in the same spot as the needles.

These ear tacs work by applying mild pressure whenever he or she feels hungry. It causes a mild endorphin release and helps the patient relax making it possible to use their willpower and resist the temptation to eat.

The patient will also have to reduce cravings on certain food by cutting down the intake. Some studies suggest that this can also lower insulin levels or lipid levels in the blood.

Learn rimedi per il corpo e lanima agenda__Symptoms of depression in adolescents are eating disorders, weight change, irritable mood, excessive sleeping in daytime, excessive temper, criminal behavior, memory loss, fatigue, self preoccupation, sadness, difficulty in concentrating, worthlessness feelings, loss of interest, self hatred, obsession with death and thought & attempts of suicides. When these symptoms are being noticed for more than two weeks, it is important to get treatment for the adolescent. Depression not only affects interpersonal relationships, but school performance as well. Depressed adolescents are more prone to take onto drugs and alcohol as an attempt to overcome their depression. Such problems require intensive treatment.

The doctor will take blood test and perform physical examination to determine the cause of depression. The adolescent can also be tested for substance abuse such as smoking, heavy alcohol consumption, marijuana smoking, and usage of other drugs. After the physical examination, psychiatric evaluation is also done to understand the cause of sadness, loss of interest and irritability. Depression can also lead to the development of other psychiatric disorders such as schizophrenia, mania and anxiety. It is also important to determine whether the adolescent poses a risk for himself/herself and others. Family and school personnel can provide valuable information about the adolescent to the doctor.

Treatment for depression for adolescent is similar to the treatment of depression for adults. Along with the treatment, the adolescent are given antidepressant medication and psychotherapy. Antidepressant medications include tricyclics, Prozac, selective serotonin reuptake inhibitors or SSRI. Some of the medicines increase the risk, so it is a good idea that parents discuss the possible risks with the doctor. Only some of the antidepressant medications are meant for children and adolescents. Adolescents with severe depression need to be hospitalized as they are more prone to kill themselves.

Depression in Adolescents

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement. Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones. Adolescent females are depressed twice more than adolescent boys according to a study.

Adolescent behavior is normally marked with good and bad moods. The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

Study case rimedi per il corpo e lanima agenda-Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be

handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. No crying, washing of face or bathing should be done with the contact lens on.

The best part about acupuncture is that there are no harmful side effects and no chance for an addiction to occur. The patient will have to come back for regular treatment and have to pay attention to one's diet and exercise regularly as needles can only do so much to control one's weight.

The number of treatments for someone who is overweight varies depending on how many pounds they want to lose, the speed at which they want to lose it and their commitment to sticking to the plan.

The average patient on the other hand who wants to lose 5 to 10 pounds will have to come for treatment every three days or twice a week then once this is attained, once every two weeks. It is up to the person until when the treatment will be done which shows that acupuncture can help you lose weight.

Project rimedi per il corpo e lanima agenda:What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

Challenge rimedi per il corpo e lanima agenda Instruments

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

Example Of Treatment

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. Needles are then carefully inserted into the skin until the patient feels a twinge, which is usually accompanied by a slight involuntary twitching of the area. During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.
- A hint of nausea during treatment in case of bad headaches.
- Near-immediate headache relief.
