Smokescreen 2021-04-20 Kevin A. Sabet From the leading authority on marijuana—a man who has served as White House advisor on drugs to three different administrations and who NBC News once called “the prodigy

of drug politics”—comes the remarkable and shocking exposé about how 21st century pot, today's new and highly potent form of the drug, is on the rise, spreading rapidly across America by an industry intent on putting rising profits over public health. Smokescreen: What the Marijuana Industry Doesn't Want You to Know examines the inside story behind the headlines, containing accounts from Sabet's time in the Obama administration to stunning revelations from whistleblowers speaking out for the first time. What it finds is how the marijuana industry is running rampant without proper oversight, leaving Americans' health seriously at risk. Included are interviews with industry insiders who reveal the hidden dangers of a product they had once worshipped. Also contained in these pages are insights from a major underground-market dealer who admits that legalization is hastening the growth of the illicit drug trade. And more to the heart of the issue are the tragic stories of those who have suffered and died as a result of marijuana use, and in many cases, as a result of its mischaracterization. Readers will learn how power brokers worked behind the scenes to market marijuana as a miracle plant in order to help it gain widespread acceptance and to set the stage for the lucrative expansion of recreational pot. The author of this compelling first-person narrative leading the national fight against the legalization of cannabis through his nonprofit, Smart Approaches to Marijuana (aka SAM) is Kevin Sabet. As a policy advisor to everyone from county health commissioners to Pope Francis, and a frequent public speaker on television, radio and through other media outlets, his analysis is consistently relied upon by those who recognize what's at stake as marijuana lobbyists downplay the risks of massive commercialization. A book several years in the making, filled with vivid characters and informed by hundreds of interviews and scores of confidential documents, Sabet's Smokescreen lays bare the unvarnished truth about marijuana in America.

**Marijuana As Medicine?** 2000-12-30 Institute of Medicine Some people suffer from chronic, debilitating disorders for which no conventional treatment brings relief. Can marijuana ease their symptoms? Would it be breaking the law to turn to marijuana as a medication? There are few sources of objective, scientifically sound advice for people in this situation. Most books about marijuana and medicine attempt to promote the views of advocates or opponents. To fill the gap between these extremes, authors Alison Mack and Janet Joy have extracted critical findings from a recent Institute of Medicine study on this important issue, interpreting them for a general audience. *Marijuana As Medicine?* provides patients—as well as the people who care for them—with a foundation for making decisions about their own health care. This empowering volume examines several key points, including: Whether marijuana can relieve a variety of symptoms, including pain, muscle spasticity, nausea, and appetite loss. The dangers of smoking marijuana, as well as the effects of its active chemical components on the immune system and on psychological health. The potential use of marijuana-based medications on symptoms of AIDS, cancer, multiple sclerosis, and several other specific disorders, in comparison with existing treatments. *Marijuana As Medicine?* introduces readers to the active compounds in marijuana. These include the principal ingredient in Marinol, a legal medication. The authors also discuss the prospects for developing other drugs derived from marijuana's active ingredients. In addition to providing an up-to-date review of the science behind the medical marijuana debate, Mack and Joy also answer common questions about the legal status of marijuana, explaining the conflict between state and federal law regarding its medical use. Intended primarily as an aid to patients and caregivers, this book objectively presents critical information so that it can be used to make responsible health care decisions. *Marijuana As Medicine?* will also be a valuable resource for policymakers, health care providers, patient counselors, medical faculty and students—in short, anyone who wants to learn more about this important issue.

Now, with a dynamic new leader in Pope Francis, all eyes are upon the church, as this immensely popular Pope seeks to bring the church back from the right to center, in what can almost be described as a populist stance, blurring the lines between politics, religion and culture. With topics including women, finance, scandal, and reform at the fore, never before have so many eyes been upon the church in what could be its defining moment for modern times. Now the most respected journalist covering the Vatican and the Catholic Church today, John L. Allen, reveals the inner workings of the Vatican to display the vast machinery, and the man at the helm in a way that no other writer can. The Boston Globe has stated that John L. Allen 'is basically the reporter that bishops and cardinals call to find out what's going on within the confines of the Vatican.'

The Health Effects of Cannabis and Cannabinoids 2017-03-31 National Academies of Sciences, Engineering, and Medicine Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda--outlining gaps in current knowledge and opportunities for providing additional insight into these issues--that summarizes and prioritizes pressing research needs.

Communities in Action 2017-04-27 National Academies of Sciences, Engineering, and Medicine In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Strengthening Forensic Science in the United States 2009-07-29 National Research Council Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Science of Medical Cannabis 2018-11-14 David S. Younger The cultural, scientific and legislative divide created by vigorous debates over the legalization of medical marijuana is giving way to a new synergy among community stakeholders across the United States. The goal is to improve access to medical marijuana for patients with refractory debilitating neurological disorders, cancer, and chronic pain as an alternative to ineffective pharmacotherapy and potentially addictive pain medications. The ultimate test of our nations resolve to ensure the welfare of our sickest patients is the enactment and implement of effective public health reform in the area of medical marijuana, also known as medical cannabis. This book evolved out of the present need for a definitive volume on the science and public health aspects of medical cannabis to fuel this national narrative. The ethnographic research presented in the concluding chapter was inspired by Professor Miriam W. Boeri and colleagues, at Bentley University in Waltham, MA. They examined views of community stakeholders including medical marijuana dispensary entrepreneurs, health care professionals, and patients in a state that legalized medical marijuana in 2013, yet there continued to be confusion and misunderstandings in the interpretation and implementation of medical marijuana guidelines during the period of policy shifts. Apparent gaps in policy development and implementation signaled the urgency for a comparison study addressing stakeholder views in New York State, where its medical marijuana program has legally dispensed the drug since 2014. The resulting pilot study was carried out in the Division of Health Policy and Management of the City University of New York School of Public Health. The research model incorporated ethnographic and grounded methodologies to detail the views of physicians, pharmacists, educators, patients, and entrepreneur stakeholders; with triangulation of data and application of dominant themes into a socioecological framework model to identify areas of public health policy reform. The findings of this study detail that New York, like other states that recently legalized the dispensation of medical marijuana, faces challenges beyond policy transparency, communication and education explicitly to improve the implementation process for applying and registering medical cannabis dispensaries, referring physicians, and qualified patient recipients. Ken Langone, Chairman of the Board of New York University Langone Health, and Steven Galetta, Chair of Neurology in the School of Medicine, where the authors is senior staff in neuroepidemiology, motivated him to pursue doctoral training in Health Policy and Management. The author has had the good fortune of interacting with thought-provoking medical students, neurology trainees, public health doctoral students, and professors who reinforce the high ethical standards in medical and public health practice and research. However, his patients still educate him in empathy and humanity. The author is grateful to his family, including his spouse Holly and sons Adam and Seth, who serve as his daily compass, encouraging him to take on projects that promote core values of medicine and humanity.

The American marijuana industry remains underground, where modern-day moonshiners who view themselves as tomorrow's Johnnie Walkers continue to take immeasurable personal risks to fulfill America's incessant demand for weed. Drawing on unparalleled access to sources ranging from lawyers to cannabis club owners, from outlaw cultivators to industry entrepreneurs, The Weed Runners is both journalistic exposé and adventure story.

Branding Bud 2021-05-25 David Paleschuck Never before has a book been compiled on cannabis brands and the consumers they appeal to. Once an underground commodity, with legalization in more and more states and countries, cannabis is now marketed under a variety of national brands, each with its own unique approach to targeting consumers. The global legal cannabis market was valued at US\$17.7 billion in 2019 and is expected to reach US\$73.6 billion in 2027. Celebrities, athletes, politicians, and large corporations alike are investing and competing in this fast-paced industry. But what makes a cannabis brand successful? What techniques do companies use to brand and market their products? What segments have been established? In Branding Bud: The Commercialization of Cannabis, David Paleschuck answers these questions, digging deep into this evolving industry to uncover what both small companies and large corporations are doing to introduce their products to the hearts and minds of cannabis consumers. The results of his exploration may surprise you. Branding Bud showcases the exciting range of products that cannabis consumers will be able to buy in a local dispensary once legalization comes to their state. The book offers a comprehensive overview and contextualization of this new segment, examining the multitude of emerging brands, their creative assets, and the strategies behind them, and the political, legal, and cultural aspects of cannabis that inform the brand landscape of today. This book is a must-read for entrepreneurs, investors, marketers, designers, and anyone interested in the rapidly growing cannabis industry. -- David Paleschuck

Investing in the Health and Well-Being of Young Adults 2015-01-27 National Research Council Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to

high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

And no one saw them, no one heard them, no one knew who they were. They departed from no mark, no lead, no proof. They disappeared into the night, with the African Star. And the riddle of the missing diamond commenced.
