### **The Fan Fiction Studies Reader**

2014-02-15 Karen Hellekson An essential introduction to a rapidly growing field of study, The Fan Fiction Studies Reader gathers in one place the key foundational texts of the fan studies corpus, with a focus on fan fiction. Collected here are important

texts by scholars whose groundbreaking work established the field and outlined some of its enduring questions. Editors Karen Hellekson and Kristina Busse provide cogent introductions that place each piece in its historical and intellectual context, mapping the historical development of fan studies and suggesting its future trajectories. Organized into four thematic sections, the essays address fan-created works as literary artifacts; the relationship between fandom, identity, and feminism; fandom and affect; and the role of creativity and performance in fan activities. Considered as literary artifacts, fan works pose important questions about the nature of authorship, the meaning of “originality,” and modes of transmission. Sociologically, fan fiction is and long has been a mostly female enterprise, from the fanzines of the 1960s to online forums today, and this fact has shaped its themes and its standing among

fans. The questions of how and why people become fans, and what the difference is between liking something and being a fan of it, have also drawn considerable scholarly attention, as has the question of how fans perform their fannish identities for diverse audiences. Thanks to the overlap between fan studies and other disciplines related to popular and cultural studies—including social, digital, and transmedia studies—an increasing number of scholars are turning to fan studies to engage their students. Fan fiction is the most extensively explored aspect of fan works and fan engagement, and so studies of it can often serve as a basis for addressing other aspects of fandom. These classic essays introduce the field's key questions and some of its major figures. Those new to the field or in search of context for their own research will find this reader an invaluable resource.

He also broadens the discussion with additional selections. The structure and themes of the Reader closely follow those of Schechner's companion textbook. 2003-09-02 David Morley Television, Audiences and Cultural Studies presents a multi-faceted exploration of audience research, in which David Morley draws on a rich body of empirical work to examine the emergence, development and future of television audience research. In addition to providing an introductory overview from a cultural studies perspective, David Morley questions how class and cultural differences can affect how we interpret television, the significance of gender in the dynamics of domestic media consumption, how the media construct the 'national family', and how small-scale ethnographic studies can help us to understand the global-local dynamics of postmodern media systems. Morley's work reconceptualises the study of 'ideology' within the broader context of domestic communications, illuminating the role of the media in articulating public and private spheres of experience and in the social organisation of space, time and community.
