## *Illness and Literature in the Low Countries*

2015-12-09 Jaap Grave From as early as classical antiquity there has been an interplay between literature and medicine. The first book of Homer's Iliad recounts the plague that swept the camp of the Achaeans. While this instance concerns a full-length book, it is the aphorism that is of greater importance as a literary technique for the dissemination of medical knowledge, from the "Corpus Hippocraticum" of antiquity until the "Aphorismi de cognoscendis et curandis morbis" (1715) by Herman Boerhaave. In addition, the subject of illness and its impact on mankind was explored by great numbers of poetic scholars and scholarly poets. This collection offers fourteen articles which all highlight the relation between disease and literature. It entails a first-ever overview of Dutch-language research in this field, whereby the literary and cultural functions of medical knowledge and the poetics of medical and literary writing are in the focus.

## *Wij zijn ons brein*

2010-11-17 Dick Swaab 'Wij zijn ons brein' is een van de meest invloedrijke boeken over onze hersenen. Na lezing van dit boek zul je beter begrijpen waarom je bent wie je bent. Het verhaal van je leven is het verhaal van je brein. Dat begint in de baarmoeder, waar de hersenen gevormd worden op een manier die bepalend is voor de rest van je leven. Dick Swaab volgt in Wij zijn ons brein de mens vanaf de conceptie tot en met de dood. Wat zijn de bedreigingen voor het kind in de baarmoeder? Hoe zit het met de hersenen van pubers, wat gebeurt er als je verliefd bent, hoe zijn homo- en heteroseksualiteit te verklaren en wat gebeurt er wanneer alzheimer toeslaat? De zin en onzin van therapieën, antidepressiva en alternatieve geneeswijzen, agressie, moreel gedrag en geloof, meditatie, hersenbeschadiging, psychische problemen en bijna-dood-ervaringen: alles wordt beschreven in Wij zijn ons brein. Na lezing van dit boek zul je beter begrijpen waarom je bent wie je bent. '

Scentwork is a new discipline in the field for horse and handler, and expert author Rachaël Draaisma arms the reader with a palette of information to enable them to put this technique into action. As well as theoretical background information on the nose of the horse and biomechanics, Draaisma discusses how scentwork improves horses' learning abilities, development, socialisation, and their bond with the handler. Readers will learn how to have their horses explore their environment, participate in scentwork games and follow a footprint track to find a missing person or food bag. Easily accessible for anybody working with horses at any level, scentwork can be done in small areas as well as in larger spaces on various surfaces. Whether veterinarian, behaviourist, trainer, animal-assisted therapist, equine physiotherapist, osteopath, or interested horse owner, this book promises to bring both you and the horse enormous benefits, strengthening the human-animal bond. Rachaël Draaisma has always lived with and had a passion for dogs and horses. In 2002, she decided to make it her profession. Achieving several diplomas, she started to work full time as a trainer and behavioural consultant, first with dogs, later with horses. Her best-selling book Language Signs and Calming Signals of Horses, published by CRC Press in 2017, has been translated into several languages. Another pillar of Draaisma's working life with horses revolves around equine mental stimulation and scentwork, and she has developed an extensive method to undertake scent tracking with horses, a new tool in enriching the human-equine relationship. Draaisma travels throughout Europe and the globe to provide workshops and lectures on calming signals of horses, equine mental stimulation, and scentwork. You can

## **We Are Our Brains**

2014-01-07 D. F. Swaab A vivid account of what makes us human. Based on groundbreaking new research, We Are Our Brains is a sweeping biography of the human brain, from infancy to adulthood to old age. Renowned neuroscientist D. F. Swaab takes us on a guided tour of the intricate inner workings that determine our potential, our limitations, and our desires, with each chapter serving as an eye-opening window on a different stage of brain development: the gender differences that develop in the embryonic brain, what goes on in the heads of adolescents, how parenthood permanently changes the brain. Moving beyond pure biological understanding, Swaab presents a controversial and multilayered ethical argument surrounding the brain. Far from possessing true free will, Swaab argues, we have very little control over our everyday decisions, or who we will become, because our brains predetermine everything about us, long before we are born, from our moral character to our religious leanings to whom we fall in love with. And he challenges many of our prevailing assumptions about what makes us human, decoding the intricate "moral networks" that allow us to experience emotion, revealing maternal instinct to be the result of hormonal changes in the pregnant brain, and exploring the way that religious "imprinting" shapes the brain during childhood. Rife with memorable case studies, We Are Our Brains is already a bestselling international phenomenon. It aims to demystify the chemical and genetic workings of our most mysterious organ, in the process helping us to see who we are through an entirely new lens. Did you know? • The father's brain is affected in pregnancy as well as the mother's. • The withdrawal symptoms we experience at the end of a love affair mirror chemical addiction. • Growing up bilingual reduces the likelihood of Alzheimer's. • Parental religion is imprinted on our brains during early development, much as our native language is. Praise for We Are Our Brains "Swaab's 'neurobiography' is witty, opinionated, passionate, and, above all, cerebral."—Booklist (starred review) "A fascinating survey . . . Swaab employs both personal and scientific observation in near-equal measure."—Publishers Weekly (starred review) "A cogent, provocative account of how twenty-first-century 'neuroculture' has the potential to effect profound medical and social change."—Kirkus Reviews

## **Vision and Visual Perception**

2014-12-03 Duco A. Schreuder Vision is about insight, and visual perception is about cognition - and they form the foundation of how we see the world. Duco A. Schreuder, a physicist and psychologist, explores the finer details of each in this groundbreaking book that explores human consciousness and perception. Sharing virtually everything he's learned over a varied career spanning more than sixty years, he examines a wide array of topics, including how we understand what we visually process, how we store and retrieve information, the role that neurons play in how what we see, and much more. While Schreuder isn't afraid to disagree with other leading thinkers, he relies on science and focuses on the facts behind it so you can understand lighting, visual

perception, engineering design, and applied and experimental physics. Looking is about insight, whereas seeing is about knowledge, and you need to know how each one works to truly understand how humanity views the world. Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline, you'll be well served by taking a closer look at Vision and Visual Perception.

## Be Renewed

2014-02-19 Willem van Vlastuin Personal renewal or sanctification belongs to the heart of the Christian life and is becoming more important in our present-day culture. Listening to Scripture and in conversation with a variety of theologians from the protestant tradition, the author presents an up-to-date concept for a theology of personal renewal. In this concept the spiritual union with Christ (unio mystica cum Christo) is taken as the starting point in order to consider the way in which renewal obtains form in relation to God, our neighbour, ourselves and the world. To place this concept into a historical perspective, van Vlastuin begins his study with an investigation of Luther and Calvin's theology concerning the relationship between the union with Christ and personal renewal. The concept is developed within the current theological debate, with particular reference to the eschatological character of the Christian life. An important issue concerns the measure of renewal, especially in relation to the sinful heart of the believer. In this context the author also deals with the question of sanctification as a position or a process, and the relation between the two. In addition the relationship between the Holy Spirit and the human soul in the process of renewal is discussed. Another important issue concerns the abiding significance of the law and the way in which it functions in the Christian life. The exploration of several theological positions leads to a modern concept by which to understand law. The study concludes with an investigation of the relationship between the eschatological Christian life in this present life and the complete revelation of the eschaton.

## The Insanity Defence

2022-12-01 Ronnie Mackay More than any other defence in the criminal law, the insanity defence has, and continues to be, the subject of heated

debate. Yet too little is known about how the insanity defence operates in different jurisdictions, including in the United Kingdom and Ireland. In this book, Mackay and Brookbanks, and their team of expert contributors, explore the theory and practice around the insanity defence and analyse its diverse influence and manifestations across a wide range of common law and civil law jurisdictions. Typically, the insanity defence, as exemplified in the M'Naghten Rules, represents a foundational aspect of criminal responsibility, although in some jurisdictions it serves only to define degrees of mental capacity. However, what all jurisdictions have in common is the high and increasing incidence of mental illness and impairment challenging existing constructions of an exculpatory rule. This book explores in detail the origins and operation of the M'Naghten Rules as well as the eclectic nature of the insanity defence, its highly variable linguistic expression, and the diverse social policy mandates it seeks to embrace. The Insanity Defence will reinvigorate the debate about the defence by discussing both its theoretical basis and exploring how different jurisdictions approach the insanity plea, not only in relation to an appropriate test and how it operates, but also from the perspective of disposal and how those who use the insanity defence successfully are dealt with. This book will be of interest to researchers, academics, and advanced students with an interest in criminal law internationally, as well as to those involved in the development of policy and legislation.
