Routledge Handbook of Asian Regionalism

2012-03-15 Mark Beeson The Routledge Handbook of Asian Regionalism is a definitive introduction to, and analysis of, the development of regionalism in Asia, including coverage of East Asia, Southeast Asia and South Asia. The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world. Significantly, this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of: conceptualizing the region economic issues political issues strategic issues regional organizations As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism.

The Energy Security Paradox

2018-03-30 Jonna Nyman The decisions we make about energy shape our present and our future. From geopolitical tension to environmental degradation and an increasingly unstable climate, these choices infiltrate the very air we breathe. Energy security politics has direct impact on the continued survival of human life as we know it, and the earth cannot survive if we continue consuming fossil energy at current rates. The low carbon transition is simply not happening fast enough, and change is unlikely without a radical change in how we approach energy security. But thinking on energy security has failed to keep up with these changing realities. Energy security is primarily considered to be about the availability of reliable and affordable energy supplies - having enough energy - and it remains closely linked to national security. The Energy Security Paradox looks at contemporary energy security politics in the United States and China: the top two energy consumers and producers. Based on in-depth empirical analysis, it demonstrates that current energy security practices actually lead to a security paradox: they produce insecurity. To illustrate this, it develops the 'energy security paradox' as a framework for understanding the interconnected insecurities produced by current practices. However, it also goes beyond this, examining resistance to current practices to highlight that we not only can do energy security differently: this is already happening. In the process, the volume demonstrates that the value of security depends on the context. Based on this, The Energy Security Paradox proposes a radical reconsideration of how we approach and practice energy security.

Institutions and Economic Growth in Asia

2018-03-20 Flora Huang This book explores the role of institutions in economic growth, looking in particular at specific Asian countries and at particular cities within those countries. It considers a wide range of factors besides institutions, including the law, cultural factors and overall government arrangements. The differences between the countries studied are highlighted, and the impact of these differences assessed: the impact of English common law on arrangements in Hong Kong, Singapore and Malaysia; sharia law in Malaysia; the differing lengths of time of colonial rule; the extent to which Chinese family businesses control an economy. Also studied are the degree to which the law is effectively applied, and a range of other social, economic and cultural factors. The book's conclusions as to which factors have the greatest impact will be of considerable interest to economists of Asia and those interested in economic growth more widely.

Regionalism and the State

2017-11-30 Gordon Mace Empirically rich with highly detailed case studies on the North American Free Trade Agreement (NAFTA), this comprehensive volume studies the relationship between regionalism and state behavior. The traditional pattern of past studies of regionalism and regional integration has been to understand how state strategies molded the dynamics of an integration process. This study examines the impact of regionalism on the policy preferences of member states. This volume offers three theoretical contributions: an empirical test of the convergence hypothesis studies of institutions and their impact on domestic politics an examination of foreign policy preferences and the neo-functionalist concept of 'spill-over' Recommended reading for students of regionalism, international political economy, international trade, foreign policy and North American studies.

All for Beauty

2022-07-15 Adrienne L. McLean Ever wonder why so many stars and featured players, male or female, in movies of Hollywood's "Golden Age" look like they just stepped out of a beauty parlor even if the story places them in a jungle, a hospital bed, or the ancient past? All for Beauty examines how and why makeup and hairdressing evolved as crafts designed partly to maintain the white flawlessness of men and women as a value in the studio era. The book pays particular attention to the labor force, exploring the power and influence of cosmetics inventor and manufacturer Max Factor and the Westmore dynasty of makeup artists but also the contributions of others, many of them women, whose names are far less known. At the end of the complex, exciting, and at times dismaying chronicle, it is likely that readers will never again watch Hollywood films without thinking about the roles of makeup and hairdressing in creating both fictional characters and stars as emblems of an idealized and undeniably mesmerizing visual perfection.
