The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary evaluation that has been in use for close to 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to evaluate vocabulary comprehension for Standard American English. It is swift and easy to conduct, conserving valuable time so that focus can be set on executing successful approaches. The PPVT-4 assessment material includes a broad array of receptive vocabulary grades, extending from preschool through adulthood. The evaluation questions widely sample words that represent 20 subject domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The test provides two identical forms which hold different vocabulary terms, making sure that the individual has not "mastered" the test. One version can be utilized prior to intervention implementation to measure individuals' vocabulary comprehension and the alternative form can be used for re-assessment to assess and record progress. The PPVT-4 also contains a special Growth Scale Value (GSV) which is responsive to minor changes with time.
