This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. Believe it or not, this technique is still being used today.

If, like me, you have quite a fear of needles and injections, then acupuncture, that practice of sticking needles onto different parts of your body to cure sicknesses might seem scary at first.

However, if you've been long been suffering from some problems like headaches or chronic pains and your regular visits to the doctor dont seem to be helping you, then why not consider a trip to an acupuncture specialist? After all, who hasnt heard of somebodys aunt somewhere suffering from arthritis and trying out everything that the doctors recommended all to no avail, only to finally be cured by a really good acupuncturist?

Perhaps you were wondering if it could actually work for you. You might feel a bit skeptical since traditional Chinese medicine doesnt immediately coincide with theories in modern Western medicine. In fact, the use of needles to cure people was discovered thousands of years ago in China long before microscopes or x-ray machines were invented or before bacteria and germs were discovered.

example hp photosmart 3210 user guide pdf pdf~**Acupuncture in the Western World**

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

Acupuncture Closely Revealed

The foundation of acupuncture rests on the relevance of an individual's chi in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

How It Stops the Addiction

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient’s cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation. Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

example hp photosmart 3210 user guide pdf pdf.Like other strategies used in treating health conditions, acupuncture may have some side effects. Medications have side effects and allergic reactions, surgeries have risk of infection and complications. For needle puncture, there is a risk of injury, rare infections, minor bleeding, small bruises, and some dizziness.

You can minimize the possible side effects by choosing a licensed acupuncturist. Most countries either have government licensing in place or have professional organizations with very strict rules and regulations.

How do treatments go?

An acupuncturist will do an initial evaluation of your medical history and your body’s current state. Multiple pressure points are palpated, and a regimen of treatment is formulated. Most courses involve a series of 10 to 20 treatment sessions, each lasting 30 to 90 minutes. Needles will be carefully placed at the required points and kept in place for some time. Most patients report a feeling of mild sensation at the site of the puncture, but no real pain.

Anemia in Adolescents

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn’t stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs i.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.

Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one’s health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

The earliest account of this is found in the book called Nei Jing which in English means the Yellow Emperor’s Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company’s net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner’s equity.

Why owner’s equity? Well, after deducting all the liabilities, what’s left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, youd typically have less of an ability to deal with stress. Youd get more irritable and find it really to difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the bodys wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.
