Chivalry and Violence in Medieval Europe 2001

Richard W. Kaeuper Medieval Europe was a rapidly developing society with a problem of violent disorder. Professor Kaeuper's original and authoritative study reveals that chivalry was just as much a part of this problem as it was its solution. Chivalry praised heroic violence by knights, and fused such displays of prowess with honour, piety, high-status, and attractiveness to women. Though the vast body of chivalric literature praised chivalry as necessary to civilization, most texts also worried over knightly violence, criticized the ideals and practices of chivalry, and often proposed reforms. The knights themselves joined the debate, absorbing some reforms, ignoring others, sometimes proposing their own. The interaction of chivalry with major governing institutions ("church" and "state") emerging at that time was similarly complex: kings and clerics both needed and feared the force of the knighthood. This fascinating book lays bare these conflicts and paradoxes which surrounded the concept of chivalry in medieval Europe.

Ghost Brothers 2005-05-12 Rony Blum Devastating losses caused by diseases such as smallpox led to an epidemic of bereavement among the Natives. This loss resonated with the French, who had dealt with smaller epidemics in France and were also mourning their absent communities through a nostalgia for home. Blum traces how ghosts provided transgenerational and transcultural links that guided understanding rather than

encouraging violence. Ghost Brothers insightfully examines the process of this colonial interdependent alliance between Native and European worlds.

Stages of Evil 2005-01-01 Robert Lima "The evil that men do" has been chronicled for thousands of years on the European stage, and perhaps nowhere else is human fear of our own evil more detailed than in its personifications in theater. In Stages of Evil, Robert Lima explores the sociohistorical implications of Christian and pagan representations of evil and the theatrical creativity that occultism has engendered. By examining examples of alchemy, astronomy, demonology, exorcism, fairies, vampires, witchcraft, hauntings, and voodoo in prominent plays, Stages of Evil explores American and European perceptions of occultism from medieval times to the modern age.

The absurd in literature 2013-07-19 Neil Cornwell Neil Cornwell's study, while endeavouring to present an historical survey of absurdist literature and its forbears, does not aspire to being an exhaustive history of absurdism. Rather, it pauses on certain historical moments, artistic movements, literary figures and selected works, before moving on to discuss four key writers: Daniil Kharms, Franz Kafka, Samuel Beckett and Flann O'Brien. The absurd in literature will be of compelling interest to a considerable range of students of comparative, European (including Russian and Central European) and English literatures (British Isles and American) – as well as those more concerned with theatre studies, the avant-garde and the history of ideas

such as the Poetic Edda and The Deeds of the Danes by Saxo Grammaticus • Examines folktales, myths, and magical beliefs from Germany, Austria, Switzerland, Denmark, Finland, Sweden, Norway, Iceland, and England The legends of the Norse and Germanic regions of Europe--spanning from Germany and Austria across Scandinavia to Iceland and England--include a broad range of mythical characters and places, from Odin and Thor, to berserkers and Valhalla, to the Valkyries and Krampus. In this encyclopedia, Claude Lecouteux explores the origins, connections, and tales behind many gods, goddesses, magical beings, rituals, folk customs, and mythical places of Norse and Germanic tradition. More than a reference to the Aesir and the Vanir pantheons, this encyclopedia draws upon a wealth of well-known and rare sources, such as the Poetic Edda, the Saga of Ynglingar by Snorri Sturluson, and The Deeds of the Danes by Saxo Grammaticus. Beyond the famous and infamous Norse gods and goddesses, Lecouteux also provides information on lesser-known figures from ancient Germanic pagan tradition such as the Elf King, the Lorelei, the Perchten, land spirits, fairies, dwarves, trolls, goblins, bogeymen, giants, and many other beings who roam the wild, as well as lengthy articles on well-known figures and events such as Siegfried (Sigurd in Norse) and Ragnarök. The author describes the worship of the elements and trees, details many magical rituals, and shares wild folktales from ancient Europe, such as the strange adventure of Peter Schlemihl and the tale of the Cursed Huntsman. He also dispels the false beliefs that have arisen from the Nazi hijacking of Germanic mythology and from its longtime suppression by Christianity. Complete with rare illustrations and information from obscure sources appearing for the first time in English, this detailed reference work represents an excellent resource for scholars and those seeking to reconnect to their pagan pasts and restore the old religion.

Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize

the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. Behind the infamous reign a hellequin novella the hellequin When adolescents wear braces they have to take certain precautions in order to avoid any more oral health complications. The most important precautionary measure is to brush the teeth regularly after every meal. Since the food can be easily lodged in braces, it is a good idea to brush carefully with soft bristles toothbrush and fluoride toothpaste. In the morning, the adolescent must floss between the braces and teeth. Food stuffs which are sticky or hard must be avoided as they are very difficult to remove. Foods like caramel, chew candy, popcorn, and nuts must be avoided. Cleaning must be done by the orthodontist or general dentist, every five to six months.

The wisdom teeth or third molars can grow in people of the age fifteen to twenty five. These teeth cause problem, because most of the mouths are too small to adjust new teeth and hence they need to be removed. If the wisdom tooth has place to grow, without affecting other teeth, they can be left to themselves. But if the adolescent experiences pain, facial swelling, mouth infection and gum-line swelling, then they should be extracted immediately. They can also destroy the second molars and impact other tooth. Various gum and jaw diseases can be caused. There can be a tumor development; cysts development and plaque build up. Hence, a surgery is performed to remove the tooth or teeth. The gum tissue covering the wisdom tooth is removed and the connective tissue connecting the tooth to the bone is detached. The tooth is then removed and the opening is sutured. A general dentist can perform wisdom tooth surgery in the local office using anesthesia.

Five times common than asthma is tooth cavities. The tooth above the gum line is made up of enamel, the hardest tissue within the human body. The tooth below the gum-line comprise of nerves, roots and dentin. Dentin is another type of tissue and isn't as hard as the enamel. The acid which leads to tooth decay is produced by bacteria. These acids, along with dietary sugar, attach the enamel and eat away the minerals within the enamel, until a cavity is formed. This is known as tooth cavity. The biggest prevention against dental cavities is brushing teeth twice a day

and even better, after every meal with fluoride toothpaste and soft bristle toothbrush. Carbonated drinks must be avoided strictly and must be replaced with fruit juices and sugary food must be avoided. Intake of fluoridated water also helps a lot or fluoride supplements can be used as replacement.

There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony. When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start. There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

Periodontal disease can be diagnosed by a dentist or a periodontist after reviewing the complete medical history and also physical examination of the teenager's mouth. Usually x-ray of the teeth is taken to evaluate the disease.

Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as "gingivitis" in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist's treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis.

Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periodontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth.

There are various treatments available for periodontal disease which is decided by the dentist depending on teenager's age, medical history and health in general. The method of treatment also depends on the extent to which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration. Expectations and opinion of the parents or teenager is also the criteria in deciding the type of treatment. The treatment usually involves plaque removal, medication and in worse cases a surgery.
