Global Trends 2040

2021-03 National Intelligence Council "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Information Security and Privacy in Network Environments

1994 The use of information networks for business and government is expanding enormously. Government use of networks features prominently in plans to make government more efficient, effective, and responsive. But the transformation brought about by the networking also raises new concerns for the security and privacy of networked information. This Office of Technology Assessment (OTA) report was requested by the Senate Committee on Governmental Affairs and the House Subcommittee on Telecommunications and Finance. The report begins with background information and an overview of the current situation, a statement of the problems involved in safeguarding unclassified networked information, and a summary of policy issues and options. The major part of the report is then devoted to detailed discussions of policy issues in three areas: (1) cryptography policy, including federal information processing standards and export controls; (2) guidance on safeguarding unclassified information in federal agencies; and (3) legal issues and information security, including electronic commerce, privacy, and intellectual property. Appendices include Congressional letters of request; the Computer Security Act and related documents; evolution of the digital signature standard; and lists of workshop participants, reviews, and other contributors. An index is provided. A separately published eight-page OTA Report Summary is included. (JLB).

Autonomous Horizons

2019-04-05 Greg Zacharias Dr. Greg Zacharias, former Chief Scientist of the United States Air Force (2015-18), explores next steps in autonomous systems (AS) development, fielding, and training. Rapid advances in AS development and artificial intelligence (AI) research will change how we think about machines, whether they are individual vehicle platforms or networked enterprises. The payoff will be considerable, affording the US military significant protection for aviators, greater effectiveness in employment, and unlimited opportunities for novel and disruptive concepts of operations. Created by Lloyd M. Dunn and Douglas M. Dunn, the assessment is designed to evaluate vocabulary comprehension for Standard American English. It is quick and easy to administer, saving precious time so that attention can be placed on executing effective approaches.

The PPVT-4 test material includes a broad scope of vocabulary comprehension ranks, spanning from pre-kindergarten through adulthood. The assessment items widely include words that represent 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The evaluation offers two identical editions which contain different vocabulary words, guaranteeing that the person has not "memorized" the assessment. One version can be used ahead of intervention implementation to measure individuals' vocabulary knowledge and the second edition can be employed for re-testing to assess and document improvement. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is reactive to slight changes over time.
