The needles used in acupuncture are very small and you will probably feel a slight twitch when the needle goes in. They will be inserted carefully to ¼ or an inch in depth and will stay there from 45 minutes to an hour depending on the condition of the patient.

If inserted properly, you should feel some cramping, distention, electric sensation or tingling which means that the treatment is working.

Needles used for acupuncture especially in the US are clean because they are required to be disposable. This prevents any chance that those who go for treatment will be contaminated by a communicable disease like hepatitis or HIV.

Self motivation is extremely necessary in loosing weight. Because obesity is more a family problem and not an individual problem, the whole family can switch to eating healthy food and exercising regularly. This can make the weight control program a success. Parents can play a major role by boosting the self esteem of their children by concentrating on their strengths and encouraging them, instead of targeting the weight problem. The whole family should eat meals together, instead of eating individually while watching a movie. This helps all the members to focus on the food and the quantity being eaten. If the teenager isn't getting support from his family members, he/she can join support groups which can help towards the goals.

After the adolescent has lost weight, it is very important that he/she maintains it. In majority of the cases, people shift back to their old eating habits after loosing weight. That is the reason why obesity is more of a lifetime issue. So the main aim of any weight loss program must be make the adolescent like healthy food. He/she must also be made to exercise regularly, irrespective of the weight.

Usually a person gets obese when he/she consumes more calories than the body burns. Also there are fifty percent chances of becoming obese when both one of the parent is obese and when obesity has affected both the parents, the chances increases to eighty percent. One percent of obese people can have that fat because of health reasons, as obesity can be caused due to few medical disorders. The causes of obesity in adolescence are overeating, family history, bad eating habits, little or no exercise, medical illness, low self esteem, medications, depression, emotional problems, stressful life, and family problem.

Obesity can cause many major problems. Some of them are diabetes, sleeping disorders, high blood pressure, breathing problems, emotional problems and increase in heart disease risk. Teenagers are more prone to get emotional problems. Because of the weight, they develop low self esteem. They get into depression, obsessive compulsion disorder and anxiety.

Adolescents who want to tackle the obesity problem should approach a pediatrician who will thoroughly evaluate the cause. If no physical disorder is to be blamed, the weight is reduced by limiting the calorie intake and increasing physical activity. The doctor can advice a weight management program and change the eating habits of the teenager, slowly. The patient must avoid oily, fatty, fast and junk food. The potions must be reduced in order to decrease the calorie intake. If the adolescent has developed emotional problems because of obesity, an adolescent psychiatrist can collaborate with the pediatrician in order to make a comprehensive plan for treatment. The plan includes reasonable goals, behavior modification, family participation, and management of physical activity.

Acupuncture Can Help Treat Migraines

Acupuncture can help treat migraines. This was discovered after a comparative study was done with conventional medical care. In some cases, it even prevents it from happening which helps improve the quality of life for the patient.

To understand how acupuncture helps migraine sufferers, you have to understand that in traditional Chinese medicine, it is believed that an imbalance in the flow of blood and energy causes this to happen.

In order to treat it, the specialist must relieve the tension by inserting needles into the body to improve the blood flow to the brain thus reducing the pain experienced during an attack.

History kyocera user guide owner manual pdf pdf–Eight Myths About Acupuncture

There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

Project kyocera user guide owner manual pdf pdf.Acupuncture in the Western World

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.
