The Racial Contract
2022-04-15 Charles W. Mills The Racial Contract puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The Racial Contract argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelbie and a new preface by the author—makes clear, the still-urgent The Racial Contract continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy.

Anti-Intellectualism in American Life
2012-01-04 Richard Hofstadter Winner of the 1964 Pulitzer Prize in Nonfiction Anti-Intellectualism in American Life is a book which throws light on many features of the American character. Its concern is not merely to portray the scorners of intellect in American life, but to say something about what the intellectual is, and can be, as a force in a democratic society. "As Mr. Hofstadter unfolds the fascinating story, it is no crude battle of egghheads and fatheads. It is a rich, complex, shifting picture of the life of the mind in a society dominated by the ideal of practical success." —Robert Peel in the Christian Science Monitor

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.
