Creating Characters with Personality

2016-02-16 Tom Bancroft From Snow White to Shrek, from Fred Flintstone to SpongeBob SquarePants, the design of a character conveys personality before a single word of dialogue is spoken. Designing Characters with Personality shows artists how to create a distinctive character, then place that character in context within a script, establish hierarchy, and maximize the impact of pose and expression. Practical exercises help readers put everything together to make their new characters sparkle. Lessons from the author, who designed the dragon Mushu (voiced by Eddie Murphy) in Disney's Mulan—plus big-name experts in film, TV, video games, and graphic novels—make a complex subject accessible to every artist.

Microbiome in Plant Health and Disease

2019-08-10 Vivek Kumar The book discusses the complex interactions between plants and their associated microbial communities. It also elucidates the ways in which these microbiomes are connected with the plant system, and how they affect plant health. The different chapters describe how microbiomes affect plants with regard to immunity, disease conditions, stress management and productivity. In addition, the book describes how an 'additional plant genome' functions as a whole organ system of the host, and how it presents both challenges and opportunities for the plant system. Moreover, the book includes a dedicated section on using omics tools to understand these interactions, and on exploiting them to their full potential.

Banana Ripening

2019-09-04 Anthony Keith Thompson The technology used to ripen bananas is affected by a wide range of factors, including the cultivar, growing conditions, harvesting method, and maturity at which the fruit are harvested and handled. Various post harvest treatments applied to fruit can also impact ripening. While many textbooks have been dedicated to Musa (bananas and plantains), none have focused exclusively on the ripening process. The commercial ripening of bananas and the chemical changes that occur thereby are considered here in detail. In developed, temperate countries where bananas are imported, successful ripening technologies have evolved. Most bananas, however, are marketed locally in the country where they are grown, and often the ripening technologies used have economic and health implications. This brief offers an in-depth discussion of not only the implications of these technologies, but also of alternative ripening methods and their commercial applications. For an understanding of both the chemical basis by which bananas ripen and the technologies used to control the process, look no further than this essential text.

Dogen's Manuals of Zen Meditation

1990-08-16 Carl Bielefeldt Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of "nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.

NAKO

2016-10-10 Gabriela Krist The Nako temple complex from the 12th century is an extraordinary testimony of early Tibetan Buddhism not anymore preserved in today's Tibet. Endangered by the rough environment, improper treatment and frequent earthquakes, the outstanding monuments were re-discovered by scholars from Austrian universities in the 1980s. The transdisciplinary research project carried out over more than 20 years led to in-depth studies, preservation and model-like conservation of the temples and their artworks.

Painting Women

2020-03-03 Patricia Phillippy This original analysis of the representation and self-representation of women in literature and visual arts revolves around multiple early modern senses of "painting": the creation of visual art in the form of paint on canvas and the use of cosmetics to paint women's bodies. Situating her study in sixteenth- and seventeenth-century Italy, France, and England, Patricia Phillippy brings together three distinct actors: women who paint themselves with cosmetics, women who paint on canvas, and women and men who paint women—either with pigment or with words. Phillippy asserts that early modern attitudes toward painting, cosmetics, and poetry emerge from and respond to a common cultural history. Materially, she connects those who created images of women with pigment to those who applied cosmetics to their own bodies through similar mediums, tools, techniques, and exposure to toxic materials. Discursively, she illuminates historical and social issues such as gender and morality with the nexus of painting, painted women, and women painters. Teasing out the intricate relationships between these activities as carried out by women and their visual and literary representation by women and by men, Phillippy aims to reveal the delineation and transgression of women's creative roles, both artistic and biological. In Painting Women, Phillippy provides a cross-disciplinary study of women as objects and agents of painting.

The Musical Shape of the Liturgy

2012 William Peter Maht "Professor William Maht of Santford Univeristy and the Church Music Association of America has written a sweeping book—one that it is at once scholarly and practical—on that most controversial topic of music and the liturgy. He provides an over-whelming argument that every parish must have high standrads for liturgical music and he makes the full case for Gregorian chant as the model and the ideal of that liturgical music." - back cover
