Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to measure receptive vocabulary for Standard American English. It is quick and easy to administer, saving precious time so that focus can be set on applying effective interventions.

The PPVT-4 assessment content includes a broad array of receptive vocabulary levels, ranging from pre-kindergarten through adult age. The evaluation items broadly include words that represent 20 subject fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The test gives two equivalent editions which contain different vocabulary words, making sure that the test-taker has not "mastered" the assessment. One form can be employed prior to intervention implementation to assess individuals' vocabulary understanding and the alternative edition can be utilized for re-assessment to assess and record improvement. The PPVT-4 also features a unique Growth Scale Value (GSV) which is sensitive to slight changes with time.
