Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to measure receptive vocabulary for American English. It is swift and simple to carry out, saving precious time so that focus can be put on implementing intelligent strategies.

The PPVT-4 test material covers a broad array of vocabulary comprehension grades, spanning from pre-kindergarten through adult age. The evaluation problems extensively sample words that represent 20 content domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and educational vocabulary.

The assessment gives two equal forms which hold distinct vocabulary items, making sure that the person has not "learned" the evaluation. One edition can be utilized before intervention to assess test-takers' vocabulary comprehension and the second version can be employed for re-testing to evaluate and record improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is responsive to slight changes with time.
