The Athenian Agora Homer

A. Thompson 1990-12-01

In 2006 it will be 75 years since excavations by the American School of Classical Studies at Athens started in the ancient Agora. Almost every year since 1931 new areas of the ancient civic center have been cleared and exciting discoveries made, and this book presents the latest, detailed, account of the monuments and artifacts that can be seen on a visit to the site. After a short introduction to the history of the Agora, each monument is described in turn.

Famous buildings like

the Tholos or Stoa of Attalos are discussed in detail, but also lesser-known areas, passed over by other books, are revealed. Plans and color illustrations help locate the reader, while a large fold-out map at the back of the book distinguishes the different chronological phases of the Agora. For the first time this map also shows discoveries made in the last few years at the northern edge of the site. A final section presents a guide to the museum, substantially reorganized in preparation for the 2004 Olympic Games. Written by the director of the

The Delhi Sultanate

Peter Jackson 2003-10-16

The Delhi Sultanate was the first Islamic state to be established in India. In a broad-ranging, accessible narrative, Peter Jackson traces the history of the Sultanate from its foundation in 1210 to its demise in 1400 at the sack of Delhi by the Central Asian conqueror, Tamerlane. During the thirteenth and fourteenth centuries, the Sultanate was the principal bastion of Islam in the subcontinent. While the book focuses on military and political affairs, tracing the Sultanate's resistance to formidable Mongol invasions from the north-west and the administrative developments that underpinned these exploits, it also explores the Sultans' relations with their

In addition to critical surveys on developments in comparative phonology, morphology, the subgrouping of the languages, and on the contact and convergence between Indo-Aryan and Dravidian, there are chapters on types of sound change and phonological and morphological issues in Dravidian, as well as the methodology required to address them. Nairi Lands

Guido Guarducci 2019-12-19

This study analyses the social and symbolic value of the material culture, in particular the pottery production and the architecture, and the social structure of the local communities of a broad area encompassing Eastern Anatolia, the South Caucasus and North-western Iran during the last phase of the Late Bronze Age and the Early Iron Age. This broad area is known from the Assyrian texts as 'Nairi lands'. The second part of the study, *Downloaded from*

a reassessment of pottery production characteristics and theories, as well as of the socio-economic structure and issues, tied to the sedentary and mobile local communities of the Nairi lands. The study brings into focus the characteristics, the extension and the distribution of Grooved pottery, along with other pottery typologies, by providing an accompanying online catalogue with detailed descriptions and high-resolution images of the pots and sherds obtained from public and private institutions in Turkey and Armenia. Moreover, the socio-political organisation and subsistence economy issues are addressed in order to advance a possible reconstruction of the social structure of the Nairi lands communities. Particular

attention is devoted to the pastoral nomad component and the role played within the Nairi phenomenon. The study includes a very large corpus of text images and high-resolution color images of the pottery of the area under examination, gathered by the author in order to offer a reliable tool and compendium.

Debris from a Public Dining Place in the Athenian Agora Susan I. Rotroff 1992 In 1972 a large deposit of pottery and other finds from the mid-5th century B.C. were found in a pit just west of the Royal Stoa in the Athenian Agora. It contained many fragments of figured pottery, more than half of which were large drinking vessels. Twenty-one fragments were inscribed with a graffito known to be a mark of public ownership. The authors

conclude that the pottery is refuse from one of the public dining facilities that served the magistrates of Classical Athens. The volume examines the archaeological context and chronology of the deposit and gives a detailed analysis of all the finds. Planetary Overload Anthony J. McMichael
Downloaded from vla.ramtech.uri.edu on September 26, 2023 by Mia e Williamson

1993-10-07 The human species faces many threats to its health - perhaps to its survival. Taking an interesting perspective, Planetary Overload forcefully points out the consequences to human health of ongoing degradation of Earth's ecosystems. In a broad-based, accessible analysis, A. J. McMichael examines ecological disruptions - land degradation, ozone depletion, temperature increases, and loss of genetic diversity through the extinction of species, among others - and compellingly demonstrates their potentially disastrous results, including food shortages, new and intensified disease patterns, rising seas, mass refugee problems, and cancers, blindness, and immune suppression from increased ultraviolet radiation.

*Sharp El 1197p User

While other books on the subject analyse only the environmental impact of these problems, McMichael relates each of these insidious processes back to its ultimate impact on human health. He thoroughly considers these problems within a broad evolutionary, biological, social, and economic context, and also explores the underlying problems contributing to environmental breakdown, especially the relations between the world's rich and poor. This book will be of interest to environmentalists, public health professionals, policy makers, environmental studies and human ecology scholars, and anyone wishing a lucid, rational assessment of today's pressing ecological concerns.
