Measuring the Real Size of the World Economy

World Bank 2013-04-25 This volume provides a

Ib Exam Paper 2010 Pdf Pdf upload Mia p Boyle

comprehensive review of the statistical theory and methods underlying the estimation of purchasing power parities (PPPs) and real expenditures, the

choices made for the 2005 International Comparison Program (ICP) round, and the lessons learned that led to improvements in the 2011 ICP.

Educational Reform and International

Baccalaureate in the Asia-Pacific Coulson, David

Gregory 2021-02-19 The need to reform

secondary-level education to prepare young

people for new economic realities has emerged.

In an age of constant career changing, cognitive

flexibility is a top-priority skill to develop in today's

students. This shift requires methodological

innovation that enhances children's natural

abilities as well as updated, focused teacher education in order to prepare them adequately.

Educational Reform and International

Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the

development and implementation of IB curricula.

Highlighting a wide range of topics including

critical thinking, student evaluation, and teacher

training, this book is ideally designed for

educators, curriculum developers, instructional

designers, administrative officials, policymakers,

researchers, academicians, and students.

Guidelines for Integrating Alternative Jet Fuel Into

the Airport Setting Bruno Miller 2012 ACRP Report 60: Guidelines for Integrating Alternative Jet Fuel into the Airport Setting is a handbook for airport operators and others associated with drop in alternative jet fuel production and delivery that summarizes issues and opportunities associated with locating (on or off airport) an alternative jet fuel production facility, and its fuel storage and distribution requirements. The handbook identifies the types and characteristics of alternative fuels; summarizes potential benefits; addresses legal, financial, environmental, and logistical considerations and opportunities; and aids in

evaluating the feasibility of alternative jet fuel production facilities.

The Future, Declassified Mathew Burrows

2014-09-09 Twenty-five years ago when Mathew Burrows went to work for the CIA as an intelligence analyst, the world seemed frozen. Then came the fall of the Berlin Wall and the implosion of the Soviet Union; suddenly, unpredictability became a universal theme and foresight was critical. For the past decade, Burrows has overseen the creation of the Global Trends report—the key futurist guide for the White House, Departments of State and Defense, and

Homeland Security. Global Trends has a history of making bold predictions and being right: * In 2004, it argued that al-Qaeda's centralized operations would dissolve and be replaced by groups, cells, and individuals—the very model of the 2012 Boston bombings. * In 2008, it included a scenario dubbed October Surprise, imagining a devastating late-season hurricane hitting an unprepared New York City. In *The Future, Declassified*, Burrows—for the first time—has expanded the most recent Global Trends report into a full-length narrative, forecasting the tectonic shifts that will drive us to 2030. A staggering

amount of wholesale change is happening—from unprecedented and widespread aging to rampant urbanization and growth in a global middle class to an eastward shift in economic power and a growing number of disruptive technologies. Even our physical geography is changing as sea levels rise and faster commercial shipping routes open up through a warming Arctic region. The book concludes with its most provocative section: four fictional paths to 2030 with imagined storylines and characters based on analysis by the most authoritative figures in the intelligence community. As Burrows argues, we are living through some of

the greatest and most momentous developments in history. Either we take charge and direct those or we are at their mercy. The stakes are particularly high for America's standing in the world and for ordinary Americans who want to maintain their quality of life. Running the gamut from scary to reassuring, this riveting book is essential reading.

Social Policy and Migration in China Lida Fan
2011-05-11 This book explores the interactions between social policy and migration in China. Using a theoretical framework of institutional economics, Lida Fan's discussion examines

migration regulations, household registration, social welfare and insurance, employment, education, housing, medical care and industrial strategies with a view to answering the following questions: What was/is the role of social policy in migration before and after the reform period? What are the impacts of migration on the regional redistribution of human capital as a major source of regional development? What are the determinants of interprovincial migration? How can we better understand migration related policies using a social justice perspective? What migration policy options are available to achieve

desired social consequences such as mitigating inequality and improving the well-being of the most disadvantaged peoples? In posing and answering these questions the book traces the vicissitude of the formation of the household registration system (hukou) and other policies accompanying the hukou system since the beginning of the People's Republic of China. The author concludes with proposals for institutional change in China's migration policy, advocating the desirability of social justice perspectives and its feasibility in the current socio-economic structure.

Transboundary Water Resources in Afghanistan

John F. Shroder 2016-06-13 Transboundary Water from Afghanistan: Climate Change, and Land-Use Implications brings together diverse factual material on the physical geography and political, cultural, and economic implications of Southwest Asian transboundary water resources. It is the outgrowth of long-term deep knowledge and experience gained by the authors, as well as the material developed from a series of new workshops funded by the Lounsbery Foundation and other granting agencies. Afghanistan and Pakistan have high altitude mountains providing

vital water supplies that are highly contentious necessities much threatened by climate change, human land-use variation, and political manipulation, which can be managed in new ways that are in need of comprehensive discussions and negotiations between all the riparian nations of the Indus watershed (Afghanistan, China, India, and Pakistan). This book provides a description of the basic topographic configuration of the Kabul River tributary to the Indus river, together with all its tributaries that flow back and forth across the border between Afghanistan and Pakistan, and

the basic elements that are involved with the hydrological cycle and its derivatives in the high mountains of the Hindu Kush and Himalaya. Synthesizes information on the physical geography and political, cultural, and economic implications of Southwest Asian transboundary water resources Offers a basic topographic description of the Indus River watershed Provides local water management information not easily available for remote and contentious border areas Delivers access to the newest thinking from chief personnel on both sides of the contentious border Features material developed from a series of new

workshops funded by the Lounsbery Foundation and other granting agencies

Open Access to Knowledge in Nigeria Kunle Ola
2018-10-17 This book provides an analysis of the legal and policy dimensions of open access to research, education and public sector information with a focus on Nigeria. Kunle shows how open access has evolved across the world and how such initiatives could be implemented in Nigeria and other countries in the developing world. The author argues for a platform where Nigerians are able to freely connect to the ‘global library’, through the open access dual platforms of self-

archiving and open access publishing, thereby providing access to knowledge. The importance of connecting local works to the ‘global library’ to increase visibility and impact of such works is also underscored. This book furthers our understanding of open educational resources as alternative avenues to accessing education and seeks to foster citizenry participation, good governance, accountability, democratic values and spur creativity and innovation through open governance and access to public sector information. Providing a framework for open access in developing countries, *Open Access to*

Knowledge in Nigeria is an important read for scholars interested in knowledge production in Africa, development of the knowledge economy and the open access and Access to Knowledge movements.

Non-Traditional Security in Asia Mely Caballero-Anthony 2013 Non-Traditional Security in Asia examines the critical security challenges faced by states and societies in Asia including health, food, water, natural disasters, internal conflict, forced migration, energy, transnational crime, and cyber security. Through the development of a comprehensive analytical framework that

establishes the key ingredients to policy evaluation, the editors draw on a wide variety of experts to collaborate in investigating these crucial issues. This inclusive framework ...

The Evil Axis of Finance Richard Westra

2012-02-20 Why, despite the existence of raft of potential international investment outlets, is a major share of global wealth and savings mpelled toward a United States (US) Wall Street centered casino ? Why has an increasingly gapping chasm crystallized between ever bloating global financial activities and the “real” world economy of production and trade? How is it that wealthy

governments injecting trillions of dollars into stumbling financial sectors across the globe is failing to create new decent jobs? The present volume clearly answers these questions and more as it connects the dots linking the 2008 meltdown and over a decade of dress rehearsals for it to a rigged global financial game that cemented US international dominance under conditions where the US simultaneously attained the status of world's principal debtor economy. It traces out the complicity of Japan in the game beholden as it was to US anti-communist largesse for its meteoric post-war rise. It examines how China,

the former communist Cold War nemesis, paradoxically became the next major underwriter of US debt and exporter of global deflation as it sets low wage rates for the world. The present volume clearly answers these questions and more as it connects the dots linking the 2008 meltdown and over a decade of dress rehearsals for it to a rigged global financial game that cemented US international dominance under conditions where the US simultaneously attained the status of world's principal debtor economy. It traces out the complicity of Japan in the game beholden as it was to US anti-communist largesse for its

meteoric post-war rise. It examines how China, the former communist Cold War nemesis, paradoxically became the next major underwriter of US debt and exporter of global deflation as it sets low wage rates for the world.

Iraqi Kurdistan, the PKK and International Relations Hannes  Jerny 2017-07-28 Due to its primacy in explaining issues of war and peace in the international arena, the discipline of International Relations (IR) looms large in analyses of and responses to ethnic conflict in academia, politics and popular media – in particular with respect to contemporary conflicts in

the Middle East. Grounded in constitutive theory, this book challenges how ethnic/ethno-nationalist conflict is represented in explanatory IR by deconstructing its most prominent state-centric models, frameworks and analytical concepts. As much a critique of contemporary scholarship on Kurdish ethno-nationalism as a detailed analysis of the most prominent Kurdish ethno-nationalist actors, the book provides the first in-depth investigation into the relations between the PKK and the main Iraqi Kurdish political parties from the 1980s to the present. It situates this inquiry within the wider context of the ambiguous political

status of the Kurdistan Region of Iraq, its relations with Turkey, and the role Kurdish parties and insurgencies play in the war against ISIS in Iraq and Syria. Appreciating these complex dynamics and how they are portrayed in Western scholarship is essential for understanding current developments in the Iraqi and Syrian theatres of war, and for making sense of discussions about a potential independent Kurdish state to emerge in Iraq. Iraqi Kurdistan provides a comprehensive and critical discussion of the state-centric and essentialising epistemologies, ontologies, and methodologies of the three main paradigms of

explanatory IR, as well as their analytical models and frameworks on ethnic identity and conflict in the Middle East and beyond. It will therefore be a valuable resource for anyone studying ethnicity and nationalism, International Relations or Middle East Politics.

Agricultural Innovation Systems The World Bank
2012-02-21 Managing the ability of agriculture to meet rising global demand and to respond to the changes and opportunities will require good policy, sustained investments, and innovation - not business as usual. Investments in public Research and Development, extension,

education, and their links with one another have elicited high returns and pro-poor growth, but these investments alone will not elicit innovation at the pace or on the scale required by the intensifying and proliferating challenges confronting agriculture. Experience indicates that aside from a strong capacity in Research and Development, the ability to innovate is often related to collective action, coordination, the exchange of knowledge among diverse actors, the incentives and resources available to form partnerships and develop businesses, and conditions that make it possible for farmers or

entrepreneurs to use the innovations. While consensus is developing about what is meant by 'innovation' and 'innovation system', no detailed blueprint exists for making agricultural innovation happen at a given time, in a given place, for a given result. The AIS approach that looks at these multiple conditions and relationships that promote innovation in agriculture, has however moved from a concept to a sub-discipline with principles of analysis and action. AIS investments must be specific to the context, responding to the stage of development in a particular country and agricultural sector, especially the AIS. This

sourcebook contributes to identifying, designing, and implementing the investments, approaches, and complementary interventions that appear most likely to strengthen AIS and to promote agricultural innovation and equitable growth. It emphasizes the lessons learned, benefits and impacts, implementation issues, and prospects for replicating or expanding successful practices. The information in this sourcebook derives from approaches that have been tested at different scales in different contexts. It reflects the experiences and evolving understanding of numerous individuals and organizations

concerned with agricultural innovation, including the World Bank. This information is targeted to the key operational staff in international and regional development agencies and national governments who design and implement lending projects and to the practitioners who design thematic programs and technical assistance packages. The sourcebook can also be an important resource for the research community and nongovernmental organizations (NGOs).

Infusing IB Philosophy and Pedagogy into Chinese Language Teaching Mark S. K. Shum 2015-10-30

This book not only examines what IB philosophy

is, it also explores the relationship between IB philosophy and Chinese language and culture and introduces a lot of useful and creative teaching pedagogies and methodologies. Most importantly, this book fills the gap of implementing IB philosophy and pedagogy into Chinese language teaching.

Ageing in the Mediterranean Joseph Troisi 2013
In almost all of the world's nations, improved life expectancy and decreasing birth rates have made people older than sixty the fastest-growing demographic group. *Ageing in the Mediterranean* fills a gap in the literature on our aging societies,

providing a detailed portrait of the diverse factors responsible for shaping aging policies across the region. Analyzing rich data from countries including Israel, Italy, Lebanon, Malta, Portugal, Tunisia, and Turkey, this volume's global cast of contributors highlight the idiosyncratic ways in which these nations approach such issues as migration, caregiving, employment, health care, and many others.

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun 2016-01-29

Under pressure and support from the federal government, states have increasingly turned to

indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district.

Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of

student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform

research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license

Pension Reform in India H. Sadhak 2013-06-30

Changing population dynamics have challenged the socio-economic stability of nations globally.

This has brought into focus pension reform as

one of the most critical socio-economic-political agendas. Against this background, this book gives a comprehensive account of the Indian pension system and the ongoing reforms.

Pension Reform in India discusses the current National Pension System (NPS) structure and architecture extensively and also throws light on the alternative old-age financial-security schemes available in the country. To enable a better understanding of the critical issues of the hour, the author provides insights into pension reforms in many emerging-economy countries. Drawing upon his years of experience in this field and also

from exhaustive research of data and publications of international agencies and eminent scholars, the author proposes methods for designing a pension system that is both viable and robust.

India Infrastructure Report 2012 Idfc Foundation 2016-04-08 Today, India's education sector remains a victim of poor policies, restrictive regulations and orthodoxy. Despite being enrolled in schools, children are not learning adequately. Increasingly, parents are seeking alternatives through private inputs in school and tuition. Students are dropping out from secondary school in spite of high financial returns of secondary

education, and those who do complete it have inferior conceptual knowledge. Higher education is over-regulated and under-governed, keeping away serious private providers and reputed global institutes. Graduates from high schools, colleges and universities are not readily employable, and few are willing to pay for skill development. Ironically, the Right to Education Act, if strictly enforced, will result in closure of thousands of non-state schools, and millions of poor children will be left without access to education. Eleventh in the series, India Infrastructure Report 2012 discusses challenges in the education sector —

elementary, secondary, higher, and vocational — and explores strategies for constructive change and opportunities for the private sector. It suggests that immediate steps are required to reform the sector to reap the benefits from India's 'demographic dividend' due to a rise in the working age population. Result of a collective effort led by the IDFC Foundation, this Report brings together a range of perspectives from academics, researchers and practitioners committed to enhancing educational practices. It will be an invaluable resource for policymakers, researchers and corporates.

ECEG2011-Proceedings of the 11th European Conference on EGovernment Maja Klun

2011-01-01

International Education and Schools Richard

Pearce 2013-10-24 Over the last forty years, the estimated number of international schools worldwide has increased from fewer than 300 to 6400 in 2012. This explosion is a response to the needs of a world in which borders are being traversed with ever greater ease and children increasingly need to be prepared for the global opportunities that await them. In this book, international school specialists reflect on where

the movement has come from, how it stands and where developments are heading, offering insightful observations on these unique institutions. This is a comprehensive resource for students, researchers and professionals with an interest in the future of education in a globalized world.

Innovation Systems and Capabilities in

Developing Regions Willie Siyanbola 2016-05-23

In today's knowledge-driven world, innovation and innovation systems have become key policy issues. However, the extent of knowledge that is available on these concepts in less developed

countries is still relatively low. Much of what we know about innovation theory and systems has come from the developed countries and reflects their world view. This apparent knowledge deficit has major implications for less developed countries. Innovation Systems and Capabilities in Developing Regions adds to the growing body of knowledge on developing countries. The theoretical and empirical case studies presented here advance the notion that, while developing countries may not engage in frontier research, a critical knowledge base upon which these countries compete for global markets is emerging.

There is evidence that state and non-state actors are increasingly emphasising policies that sit within the framework of national innovation systems. This book illuminates this shift in policy competence at national levels. The contributions in this volume highlight the need for thorough understanding of the role of diffusion-based innovation linked to technology transfer and acquisition. They also provide empirical evidence on the drivers, dynamics and impact of such innovation in developing economies and the constraints that apply. Contributors also document the application of the innovation system approach

in developing countries as well as the build-up and diffusion of technological capabilities within innovation systems. Academics, higher level students, policy makers and practitioners involved with innovation and the economics of technical change, particularly in developing countries, will find this a valuable book.

Rankings and the Reshaping of Higher Education

Ellen Hazelkorn 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global

perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.

Handbook of Financial Data and Risk Information

/ Margarita S. Brose 2014-01-09 A

comprehensive resource for understanding the issues involved in collecting, measuring and managing data in the financial services industry.

Human Trafficking John Winterdyk 2011-12-05

Human trafficking is a crime that undermines fundamental human rights and a broader sense of global order. It is an atrocity that transcends borders—with some regions known as exporters

of trafficking victims and others recognized as destination countries. Edited by three global experts and composed of the work of an esteemed panel of contributors, *Human Trafficking: Exploring the International Nature, Concerns, and Complexities* examines techniques used to protect and support victims of trafficking as well as strategies for prosecution of offenders. Topics discussed include: How data on human trafficking should be collected and analyzed, and how data collection can be improved through proper contextualization The importance of harmonization and consistency in legal definitions

and interpretations within and among regions The need for increased exchange of information and cooperation between the various actors involved in combating human trafficking, including investigators, law enforcement and criminal justice professionals, and social workers Problems with victim identification, as well as erroneous assumptions of the scope of victimization Controversy over linking protection measures with cooperation with authorities Highlighting the issues most addressed by contemporary scholars, researchers, practitioners, and policy-makers, this volume also suggests

areas ripe for further inquiry and investigation. Supplemented by discussion questions in each chapter, the book is sure to stimulate debate on a troubling phenomenon.

Women and Austerity Maria Karamessini
2013-09-11 Austerity has become the new principle for public policy in Europe and the US as the financial crisis of 2008 has been converted into a public debt crisis. However, current austerity measures risk losing past progress towards gender equality by undermining important employment and social welfare protections and putting gender equality policy onto the back

burner. This volume constitutes the first attempt to identify how the economic crisis and the subsequent austerity policies are affecting women in Europe and the US, tracing the consequences for gender equality in employment and welfare systems in nine case studies from countries facing the most severe adjustment problems. The contributions adopt a common framework to analyse women in recession, which takes into account changes in women's position and current austerity conditions. The findings demonstrate that in the immediate aftermath of the financial crisis, employment gaps between women and

men declined – but due only to a deterioration in men's employment position rather than any improvements for women. Tables are set to be turned by the austerity policies which are already having a more negative impact on demand for female labour and on access to services which support working mothers. Women are nevertheless reinforcing their commitment to paid work, even at this time of increasing demands on their unpaid domestic labour. Future prospects are bleak. Current policy is reinforcing the same failed mechanisms that caused the crisis in the first place and is stalling or even reversing the

long term growth in social investment in support for care. This book makes the case for gender equality to be placed at the centre of any progressive plan for a route out of the crisis.

Innovative Strategies in Higher Education for Accelerated Human Resource Development in South Asia Asian Development Bank 2016-06-01

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development

strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for

South Asia).

ICT in Agriculture (Updated Edition) World Bank

2017-06-27 Information and communication

technology (ICT) has always mattered in

agriculture. Ever since people have grown crops, raised livestock, and caught fish, they have

sought information from one another. Today, ICT

represents a tremendous opportunity for rural

populations to improve productivity, to enhance

food and nutrition security, to access markets,

and to find employment opportunities in a

revitalized sector. ICT has unleashed incredible

potential to improve agriculture, and it has found

a foothold even in poor smallholder farms. ICT in

Agriculture, Updated Edition is the revised version

of the popular ICT in Agriculture e-Sourcebook,

first launched in 2011 and designed to support

practitioners, decision makers, and development

partners who work at the intersection of ICT and

agriculture. Our hope is that this updated

Sourcebook will be a practical guide to

understanding current trends, implementing

appropriate interventions, and evaluating the

impact of ICT interventions in agricultural

programs.

Evaluation of Agricultural Policy Reforms in

Turkey OECD 2011-09-21 Agricultural policies in Turkey have evolved significantly over time and the Agricultural Law of 2006 aims to align Turkey's policies with those of the European Union. Several emerging issues and challenges for Turkish agricultural policies are discussed in this publication.

Challenging the Prevailing Paradigm of Displacement and Resettlement Michael M. Cernea 2018-05-25 Development-caused forced displacement and resettlement (DFDR) is a critical problem on the international development agenda. The frequency of forced displacements is

rapidly increasing, the sheer numbers of uprooted and impoverished people reveal fast accelerating trends, whilst government reporting remains poor and misleading. Challenging the Prevailing Paradigm of Displacement and Resettlement analyzes widespread impoverishment outcomes, risks to human rights, and other adverse impacts of displacement; it documents under-compensation of expropriated people, critiques cost externalization on resettlers, and points a laser light on the absence of protective, robust, and binding legal frameworks in the overwhelming majority of developing countries. In response, this

book proposes constructive solutions to improve quality and measure the outcomes of forced resettlement, prevent the mass-manufacturing of new poverty, promote social justice, and respect human rights. It also advocates for the reparation of bad legacies left behind by failed resettlement. It brings together prominent scholars and practitioners from several countries who argue that states, development agencies, and private sector corporations which trigger displacements must adopt a "resettlement with development" paradigm. Towards this end, the book's co-authors translate cutting edge research into legal,

economic, financial, policy, and pragmatic operational recommendations. An inspiring and compelling guide to the field, *Challenging the Prevailing Paradigm of Displacement and Resettlement* will be of interest to university faculty, government officials, private corporations, researchers, and students in anthropology, economics, sociology, law, political science, human geography, and international development. **Productivity, Investment in Human Capital and the Challenge of Youth Employment** Pietro Manzella 2011-07-12 From an international and comparative perspective, young people's access

to the labour market is a complex issue with certain contradictory aspects reflecting the level of development of labour law and industrial relations in their respective countries. In the most advanced economies, there has been a steady increase in the age at which young people exit the educational system and enter the labour market, giving rise to significant economic and social problems. The increase in levels of educational attainment is associated in some cases with an alarming rate of unemployment among those with academic qualifications, while employers encounter considerable difficulty in

recruiting workers for unskilled and semi-skilled positions. The economies of developing countries, on the other hand, are characterized by different trends, reminiscent of the early stages of modern labour law, with the large-scale exploitation of young workers and children, many of whom join the flow of migrants towards the more highly developed regions of the world, with the consequent risk of impoverishing human capital in the country of origin. The ADAPT Labour Studies Book-Series has in connection been set up with a view to achieving a better understanding of these and other issues in the field of Labour and

Employment relations in a global dimension, through an interdisciplinary and comparative approach.

Handbook of Police Psychology Jack Kitaeff

2011-03-17 The Handbook of Police Psychology represents the contributions of over thirty police psychologists, all experts in their field, on the core subject matters of police psychology. Police psychology is broadly defined as the application of psychological principles and methods to law enforcement. This growing area includes topics such as screening and hiring of police officers; conducting screening for special squads (e.g.,

SWAT); fitness-for-duty evaluations; investigations, hostage negotiations; training and consultation, and stress counseling, among others. The book examines the beginnings of police psychology and early influences on the profession such as experimental investigations of psychological testing on police attitude and performance. Influential figures in the field of police psychology are discussed, including the nation's first full-time police psychologist who served on the Los Angeles Police Department, and the first full-time police officer to earn a doctorate in psychology while still in uniform with

the New York Police Department.

Broadband Strategies Handbook Tim Kelly

2012-03-16 This guide identifies issues and challenges in broadband development, analyzing potential solutions to consider, and providing practical examples from countries that have addressed broadband-related matters.

Role Theory in International Relations Sebastian Harnisch 2011-04-06 Role Theory in International Relations provides a comprehensive, up-to-date survey of recent theoretical scholarship on foreign policy roles and extensive empirical analysis of role behaviour of a variety of states in the current

era of eroding American hegemony. Taking stock of the evolution of role theory within foreign policy analysis, international relations and social science theory, the authors probe role approaches in combination with IR concepts such as socialization, learning and communicative action. They draw upon comparative case studies of foreign policy roles of states (the United States, Japan, PR China, Germany, France, UK, Poland, Sweden, and Norway) and international institutions (NATO, EU) to assess NATO's transformation, the EU as a normative power as well as the impact of China's rise on U.S.

hegemony under the Bush and Obama administrations. The chapters also offer compelling theoretical arguments about the nexus between foreign policy role change and the evolution of the international society. This important new volume advances current role theory scholarship, offering concrete theoretical suggestions of how foreign policy analysis and IR theory could benefit from a closer integration of role theory. It will be of great interest to all scholars and students of international relations, foreign policy and international politics.

Transitional Justice in South Asia Tazreena

Sajjad 2013-08-21 Offering a comparative case study of transitional justice processes in Afghanistan and Nepal, this book critically evaluates the way the "local" is consulted in post-conflict efforts toward peace and reconciliation. It argues that there is a tendency in transitional justice efforts to contain the discussion of the "local" within religious and cultural parameters, thus engaging only with a "static local," as interpreted by certain local stakeholders. Based on data collected through interviews and participant observation carried out in the civil societies of the respective countries, this book

brings attention to a "dynamic local," where societal norms evolve, and realities on the ground are shaped by shifting power dynamics, local hierarchies, and inequalities between actors. It suggests that the "local" must be understood as an inter-subjective concept, the meaning of which is not only an evolving and moving target, but also dependent on who is consulted to interpret it to external actors. This timely book engages with the divergent range of civil society voices and offers ways to move forward by including their concerns in the efforts to help impoverished war-torn societies transition from a state of war to the

conditions of peace.

Smart Fiscal Consolidation Galina Kolev

2013-05-10 PDF downloadable for free from

[http://martenscentre.eu/publications/smart-fiscal-consolidation-strategy-achieving-sustainable-public-](http://martenscentre.eu/publications/smart-fiscal-consolidation-strategy-achieving-sustainable-public-finances-and-growth)

[finances-and-growth](http://martenscentre.eu/publications/smart-fiscal-consolidation-strategy-achieving-sustainable-public-finances-and-growth) Due to high government debt levels and the dangers of self-defeating austerity,

smart fiscal consolidation measures are needed

that foster economic growth. A thorough review of

the relevant literature provides many useful

insights. To regain credibility, a clearly

communicated broad reform program (including

structural reforms) is required. Targeting mainly

public expenditures, rather than revenues, raises the chances of expansionary effects. The timing of consolidation should focus on adjustment in structural terms to leave room for automatic stabilisers. The main part of the study evaluates the impact of individual consolidation and fiscal reform measures on consolidation success, on economic growth (in the long and short term), and on social fairness.

International Tax Aspects of Sovereign Wealth

Investors Richard Snoeij 2018-04-18 An

increasing number of States have entered the market looking to invest resources in foreign

assets. This emergence of States acting as investors, managing the wealth of a nation and competing in the marketplace with private investors, has attracted growing and wide attention. This book is the first in-depth analysis of the international tax aspects of sovereign wealth investors, and serves as a comprehensive guide to designing tax policy, from a source State perspective, toward inbound sovereign wealth investment. Drawing on a wide range of relevant sources, including international instruments, domestic tax legislation, administrative practice, (international) case law and the writings of highly

qualified publicists, the author fully addresses the following aspects of the subject: – the definition, functions, legal form, governance, home State tax status, etc. of sovereign wealth investors; – tax policy considerations and objectives (i.e., neutrality, equity and international attractiveness) from a source State perspective vis-à-vis foreign sovereign wealth investors; and – the potential impact of the sovereign immunity principle, bilateral tax treaties and European (Union) law on source States’ ability to achieve these tax policy objectives in relation to foreign sovereign wealth investors. The conceptual framework developed

by the author will greatly assist source States in introducing new tax policy or in evaluating or reconsidering their existing tax policy vis-à-vis foreign sovereign wealth investors. In addition, practitioners, academics and (home States of) sovereign wealth investors will welcome this first authoritative analysis of an important but insufficiently understood subject in international tax.

Handbook on Food Raghbendra Jha 2014-01-01

'This volume is a welcome and timely contribution to a topic of enduring importance. The global consequences of recent food price crises

underscore the need to examine food security issues from diverse perspectives. This volume meets that need, featuring accessible yet cutting-edge analyses of food security by leading experts in fields as diverse as trade, nutrition, public health, production, political economy, and behavioral economics. It will be of interest to a wide range of scholars and practitioners.' -- Steven Block, Tufts University, US. 'This excellent volume offers a compact but wide-ranging survey of recent research on important changes in global food markets. Its 20 chapters accurately capture important areas of scholarly agreement as well as

on-going debates among economists studying agriculture and nutrition, with several provocative original contributions from other fields. The book draws particularly on the authors' long experience in Asia, offering widely-applicable insights for scholars and policy analysts seeking to understand the past, present and future of food around the world.' --William A. Masters, Tufts University, US. The global population is forecasted to reach 9.4 billion by 2050, with much of this increase concentrated in developing regions and cities. Ensuring adequate food and nourishment to this large population is a pressing

economic, moral and even security challenge and requires research (and action) from a multi-disciplinary perspective. This book provides the first such integrated approach to tackling this problem by addressing the multiplicity of challenges posed by rising global population, diet diversification and urbanization in developing countries and climate change. It examines key topics such as: the impact of prosperity on food demand, the role of international trade in addressing food insecurity, the challenge posed by greenhouse gas emissions from agriculture and land degradation, the implication on labor

markets of severe under-nutrition, viability of small scale farms, strategies to augment food availability. The Handbook on Food would be a welcome supplementary text for courses on development economics, particularly those concentrating on agricultural development, climate change and food availability, as well as nutrition. [Social Panorama of Latin America 2012](#) United Nations Economic Commission for Latin America and the Caribbean 2013-04-29 This annual report examines the dynamics of paid employment in care activities in Latin American countries, as well as household expenditure on such work, and

proposes normative criteria for public policymaking in this sphere. It also covers 1) poverty trends and determining factors in Latin America; 2) income distribution and social spending trends in the region; and 3) situation of disabled people in Latin American and Caribbean countries.

The Formulation of EU Foreign Policy Nicola Chelotti 2016-01-22 EU foreign and defence policy is largely formulated in the working parties and committees of the Council of the EU and the vast majority of decisions in this field are made by the national diplomats working in the around

35 groups of the CFSP/CSDP. Although the importance of these committees and their participants has been increasingly recognised, we still know relatively little about them. Using an original database of 138 questionnaires and 37 interviews, this book addresses this lack of knowledge, studying what these committees do and how they negotiate and resolve issues. It explores three key areas: the formulation of the national position; the identity of CFSP/CSDP policy-makers; negotiation practices and outputs. In doing so, it provides an innovative observation point from which EU foreign policy can be

analysed. This book will be of key interest to scholars and students of EU foreign and defence policy, external relations of the EU, European integration and politics, diplomacy and more broadly international relations.

The G20 Peter I. Hajnal 2019-01-24 This revised and updated edition presents detailed analysis of the history and current state of the G20, and the challenges it faces. The emergence of the G20 was the result of calls for full inclusion of major developing and other systemically important countries and to reflect new global economic and political realities. The growth of Chinese power,

growing significance of other major developing countries and new concerns concerning anti-globalization and rising protectionism in the West have all resulted in important changes to the dynamics of the institution. The suspension of Russia's membership in the G8 has also necessitated a change in G7/G20 dynamics and the G20's processes, agenda priorities and role in global governance. Providing a historical overview and analysis of the evolving agenda, methods of performance evaluation, relationship with structured international organizations and other external actors, Hajnal's text is an authoritative

work of history, analysis and reference on the G20 and also G7/G8/G20 reform. This book is an essential source for researchers and students focusing on the G20, international organizations and global governance, and more generally for scholars in the fields of political science, economics, and finance.

The EU as a State-builder in International Affairs

Labinot Greiçevci 2021-11-04 This book presents a systematic, in-depth, and comparative analysis of the role of the EU in the process of international state-building and is one of the first comprehensive books to do so at an international

level. Taking the case of Kosovo, it examines the EU's role in the birth of a state in comparison to other international actors from 1999 to 2008 and moves on to analyse the EU's role in norm diffusion in the post-independence period (2008–2020). Throughout the book, the author draws parallel analyses with broader debates and scholarly literature regarding the EU's role as a state-builder or norm-diffuser. Combining a liberal peace thesis framework with the normative power Europe (NPE) approach, it analyses how successful the EU and other international actors were in the diffusion of tangible and normative

impacts in the process of state-building in Kosovo (1999–2008), along with the EU's diffusion of normative impact from 2008 to 2020. Finally, it scrutinises the role of the EU and other international actors in the processes of state-building through transference tools (funding) and overt tools (political role). This book will be of key interest to scholars and students of EU foreign policy, European politics, peace and conflict studies, the Western Balkans, state-building, international organisations, and more broadly to international relations.

Law and Regulation of Mobile Payment Systems

Joy Malala 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa. In Kenya the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the

interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological

innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.
