### **Johannes Kepler and the Three Laws of Planetary Motion**

Fred Bortz 2013-12-15

Johannes Kepler is a fascinating man who would revolutionize humanity's conception of the cosmos and their place within it. He would replace the Ptolemaic system with his three laws that described the orbital motion of the planets around the Sun. This scientist's work continues to inform and facilitate modern advances in technology, astronomy, and astrophysics. In addition to being an enthralling life and times account of a great thinker, this biography also supports Common Core standards for the reading of biographies, historical and scientific accounts, the analyzing of the relationship between primary and secondary sources, and citing evidence to support that analysis.

*Handbook of Research on K-12 Online and Blended Learning* Richard E. Ferdig 2014 "The Handbook of Research on K-12 Online and Blended Learning is an edited collection of chapters that sets out to present the current state of research in K-12 online and blended learning. The beginning chapters lay the groundwork of the historical, international, and political landscape as well as present the scope of research methodologies used. Subsequent sections share a synthesis of theoretical and empirical work describing where we have been, what we currently know, and where we hope to

go with research in the areas of learning and learners, content domains, teaching, the role of the other, and technological innovations."--Book home page.

*Understanding and Using English Grammar, Workbook Split B* Betty S. Azar 2016-06-15

Understanding and Using English Grammar is a classic developmental skills text for intermediate to advanced English learners. It combines a grammar-based approach with carefully sequenced practice to promote the development of all language skills. This Workbook consists of self-study exercises, with the answer key included, providing students with the opportunity to explore and practice grammar independently. It is keyed to the explanatory grammar charts in both the Student Book and the Chartbook.

**Sondheim on Music** Mark Eden Horowitz 2019-03-13 In this collection of interviews conducted by Mark Horowitz of the Library of Congress, musical theatre legend Stephen Sondheim discusses the art of musical composition, lyric writing, the collaborative process of musical theater, and how he thinks about his own work. A postlude features a more recent conversation with Sondheim.

**Disrupting Class, Expanded Edition: How Disruptive Innovation Will Change the Way the World Learns** Clayton Christensen

2010-09-17 Clay Christensen's groundbreaking bestselling work in education now updated and

Downloaded from [vla.ramtech.uri.edu](http://vla.ramtech.uri.edu) on September 21, 2023 by Donald m Williamson

expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education. "Provocatively titled, *Disrupting Class* is just what America's K-12 education system needs--a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." —Joel Klein, Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." —Jim Collins, bestselling author of *Good to Great* "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. *Disrupting Class* is a must-read, as it shows us how we can blaze that trail toward transformation." —Jeb Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically-we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time-education-and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every student Disruptive innovation can circumvent roadblocks

that have prevented other attempts at school reform We can compete in the global classroom-and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, *Disrupting Class* will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

**The Student Leadership Challenge** James M. Kouzes 2014-02-27 The Student Leadership Challenge Activities Book includes more than 50 activities that give educators a bridge between teaching The Five Practices of Exemplary Leadership model and helping students learn to apply the practices to their lives. The activities map to each of The Five Practices and are designed to be flexible, appropriate for high school and college students, and greatly improve students' understanding of The Five Practices model through action. The activities include facilitator tips for use in a variety of settings and with various age groups.

The Future of Thinking Cathy N. Davidson 2010-01-15 How traditional learning institutions can become as innovative, flexible, robust, and collaborative as the best social networking sites. Over the past two decades, the way we learn has changed dramatically. We have new sources of information and new ways to exchange and to interact with information. But our schools and the

way we teach have remained largely the same for years, even centuries. What happens to traditional educational institutions when learning also takes place on a vast range of Internet sites, from Pokemon Web pages to Wikipedia? This report investigates how traditional learning institutions can become as innovative, flexible, robust, and collaborative as the best social networking sites. The authors propose an alternative definition of "institution" as a "mobilizing network"—emphasizing its flexibility, the permeability of its boundaries, its interactive productivity, and its potential as a catalyst for change—and explore the implications for higher education. The Future of Thinking reports on innovative, virtual institutions. It also uses the idea of a virtual institution both as part of its subject matter and as part of its process: the first draft of the book was hosted on a Web site for collaborative feedback and writing. The authors use this experiment in participatory writing as a test case for virtual institutions, learning institutions, and a new form of collaborative authorship. The finished version is still posted and open for comment. This book is the full-length report of the project, which was summarized in an earlier MacArthur volume, *The Future of Learning Institutions in a Digital Age*. The Future of Learning Institutions in a Digital Age Cathy N. Davidson 2009-06-05 In this report, Cathy Davidson and David Theo Goldberg focus on the potential for shared and interactive learning made possible by the Internet. They argue that the single most important characteristic of the Internet is its capacity for world-wide community and the limitless exchange of ideas. The Internet brings about a way of learning that is not new or revolutionary but is now the norm for today's graduating high school and college classes. It is for this reason that Davidson and Goldberg call on us to examine potential new models of digital learning and rethink our virtually enabled and enhanced learning institutions. This report is available in a free digital edition on the MIT Press website at <http://mitpress.mit.edu/9780262513593>. John D. and Catherine T. the credibility of online information. How well do children navigate the ocean of information that is available online? The enormous variety of Web-based resources represents both opportunities and challenges for Internet-savvy kids, offering extraordinary potential for learning and social connection but little guidance on assessing the reliability of online information. This book reports on the first large-scale survey to examine children's online information-seeking strategies and their beliefs about the credibility of that information. This Web-based survey of 2,747 children, ages 11 to 18 (and their parents), confirms children's heavy reliance on the Internet. They are concerned about the credibility of online information, but 89 percent believe that "some" to "a lot" of it is believable; and, choosing among several options, they rate the Internet as the most believable information source for entertainment, commercial products, and schoolwork (more credible than books for papers or projects). Most have more faith information found on Wikipedia more than they say others should; and they consider an article on the Web site of Encyclopedia Britannica more believable than the identical article found on Wikipedia. Other findings show that children are appropriately skeptical of trusting strangers they meet online, but not skeptical enough about entertainment and health information found online. Older kids are more rigorous in their assessment of online information than younger ones; younger children are less analytical and more likely to be fooled.

How To Watch Television Ethan Thompson 2013-09-16 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing

about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.

Educating the Student Body Committee on Physical Activity and Physical Education in the School Environment 2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and

development of children and adolescents. *Educating the Student Body* makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

An Introduction to Constitutional Law Randy E. Barnett 2023-02-28 An Introduction to Constitutional Law teaches the narrative of constitutional law as it has developed historically and provides the essential background to understand how this foundational body of law has come to be what it is today. This multimedia experience combines a book and video series to engage students more directly in the study of constitutional law. All students—even those unfamiliar with American history—will garner a firm understanding of how constitutional law has evolved. An eleven-hour online video library brings the Supreme Court's most important decisions to life. Videos are enriched by photographs, maps, and audio from the Supreme Court. The book and videos are accessible for all levels: law school, college, high school, home school, and independent study. Students can read and watch these materials before class to prepare for lectures or study after class to fill in any gaps in their notes. And, come exam time, students can binge-watch the entire canon of constitutional law in about twelve hours.

*Multiple Elementary* Hannah Jickling 2018-01-30 *Multiple Elementary* explores the elementary school classroom as a site of invention and reception of contemporary art practices. Part exhibition catalogue, part artists' book and part corner store advertisement, the book reflects on the making of an artwork by Hannah Jickling and Helen Reed, in collaboration with a class of grade six students in Toronto. Begun as a riff on the Ontario social studies curriculum "Canada and It's Trading Partners", the engagement with students evolved as a series of field trips, extended research and finally, the making of 28 chocolates, each as an edition of ten.

Explorations of trade, exchange and labour took shape as exercises in public engagement, curatorial experimentation and institutional translation. Beyond socially engaged practices and expressions of art-as-pedagogy, this book explores aesthetic and representative possibilities for process-based and publicly oriented artworks, especially amidst the complications and contradictions inherent to collaborations with children.

notoriously difficult style must be understood in relation to his ambivalence towards language itself as an artistic medium — the tension between the potential of language to mirror emotional experience and the recognition of its inevitable limitations. Through an exposition of Shelley's idea of language, as reflected in his theoretical writings and individual poems, this book makes a strong case for his artistic worth. A definitive introduction to Shelley, useful for both scholars and newcomers, this book will be interest to students of literature.

*Entrepreneurship* Michael Laverty 2020 This textbook is intended for use in introductory Entrepreneurship classes at the undergraduate level. Due to the wide range of audiences and course approaches, the book is designed to be as flexible as possible. Theoretical and practical aspects are presented in a balanced manner, and specific components such as the business plan are provided in multiple formats.

Entrepreneurship aims to drive students toward active participation in entrepreneurial roles, and exposes them to a wide range of companies and scenarios.

*Social Marketing in Action* Debra Z. Basil 2019-05-24 This textbook provides students with real-world social marketing case studies from different countries and regions around the world, taking learners from classroom theory to practice. The primary objective is to clearly portray to students distinct, identifiable steps that are essential for successful social marketing campaigns. Core social marketing practices are applied to each case to help students master social marketing principles and apply them to their own real world social marketing activities in order to affect positive social change. This textbook first provides the tools necessary to understand the effective applica- tion of social marketing, and then offers 24 case studies exemplifying effective social marketing efforts from all around the world. Specifically, Part I clearly and concisely explains the principles of social marketing in five chapters: • Upstream vs. downstream social marketing, SWOT, competition • Fundamentals of social marketing, ethics • Formative and Evaluative Research • Theories applied in social marketing • A historical perspective on social marketing Part II features 24 social marketing case studies that

demonstrate the application of social marketing principles. All 24 cases follow a consistent structure that includes: • Background • Positioning • SWOT • Research • Objectives • The 4 P's • Target audience • Evaluation • Barriers and benefits • Discussion • Competition This format allows for students and professors to easily and effectively select individual cases and compare between cases. This textbook also allows instructors to encourage critical thinking by having students compare and contrast not only the cases themselves, but the applications used. In addition, teaching guides with answers to discussion questions, suggestions for activities inside and outside of the classroom and further readings are available to assist professors in teaching from this book.

*The Hero with a Thousand Faces* Joseph Campbell 1988 In this compelling and influential work, Joseph Campbell scours the myths of the world to reveal the characteristics common to heroes from all cultures and periods.

**Social Presence and Identity in Online Learning** Patrick R. Lowenthal 2020-06-30 This book is an investigation into the role which social presence and identity play in online learning environments. Scholars across disciplines have grappled with the questions of what it means for a person to be and to interact online. In the context of online learning, these questions reflect specific concerns related to how well people can learn in a setting limited to mediated interactions and lacking various communication cues. For example, how can a teacher and students come to know each other if they cannot see each other? How can they effectively understand and communicate with each other if they are separated by space and, in many instances, time? These concerns are related to social presence and identity, both of which are complex, multi-faceted, and closely interrelated constructs. The chapters in this book consider how online learning has developed and changed over time in terms of technology, pedagogy, and familiarity. Collectively these chapters show the diverse ways that educational researchers have explored social presence and identity. They also highlight some of the nuanced concerns online educators might have in these areas. This book was originally published as a special issue of Distance Education.

**Serious Educational Game Assessment: Practical Methods and Models for Educational Games, Simulations and Virtual Worlds**

L.A. Annetta 2011-07-22 In an increasingly scientific and technological world the need for a knowledgeable citizenry, individuals who understand the fundamentals of technological ideas and think critically about these issues, has never been greater. There is growing appreciation across the broader education community that educational three dimensional virtual learning environments are part of the daily lives of citizens, not only regularly occurring in schools and in after-school programs, but also in informal settings like museums, science centers, zoos and aquariums, at home with family, in the workplace, during leisure time when children and adults participate in community-based activities. This blurring of the boundaries of where, when, why, how and with whom people learn, along with better understandings of learning as a personally constructed, life-long process of making meaning and shaping identity, has initiated a growing awareness in the field that the questions and frameworks guiding assessing these environments should be reconsidered in light of these new realities. The audience for this book will be researchers working in the Serious Games arena along with distance education instructors and administrators and students on the cutting edge of assessment in computer generated environments.

**The Best Intentions** Institute of Medicine 1995-07-02 Experts estimate that nearly 60 percent of all U.S. pregnancies are unintended. Yet the topic of preventing these unintended pregnancies has long been treated gingerly because of personal sensitivities and public controversies, especially the angry debate over abortion. Additionally, child welfare advocates long have overlooked the connection between pregnancy planning and the improved well-being of families and communities that results when children are wanted. Now, current issues—health care and welfare reform, and the new international focus on population—are drawing attention to the consequences of unintended pregnancy. In this climate *The Best Intentions* offers a timely exploration of family planning issues from a distinguished panel of experts. This committee sheds much-needed light on the questions and controversies surrounding unintended pregnancy. The book offers specific recommendations to put the United States on par with other developed nations in terms of contraceptive attitudes and policies, and it considers the effectiveness of over 20 pregnancy prevention programs. *The Best Intentions* explores problematic definitions—"unintended" versus "unwanted" versus "mistimed"—and presents data on pregnancy rates and trends. The book also summarizes the health and social consequences of unintended pregnancies, for both men and women, and for the children they bear. Why does unintended pregnancy occur? In discussions of "reasons behind the rates," the book examines Americans' ambivalence about sexuality and the many other social, cultural, religious, and economic factors that affect our approach to contraception. The committee explores the complicated web of peer pressure, life

aspirations, and notions of romance that shape an individual's decisions about sex, contraception, and pregnancy. And the book looks at such practical issues as the attitudes of doctors toward birth control and the place of contraception in both health insurance and "managed care." *The Best Intentions* offers frank discussion, synthesis of data, and policy recommendations on one of today's most sensitive social topics. This book will be important to policymakers, health and social service personnel, foundation executives, opinion leaders, researchers, and concerned individuals.

*Semiconductor Device Fundamentals* Robert F. Pierret 1996 Introduces and explains the basic terminology, models, properties, and concepts associated with semiconductors and semiconductor devices; provides detailed insight into the internal workings of the "building-block" device structures such as the pn junction diode, Schottky diode, BJT, and MOSFET; presents information about a wide variety of additional devices, including solar cells, LEDs, HBTs and modern field effect devices; systematically develops the analytical tools needed to solve practical device problems.

**The Talented Tenth** W E B Du Bois 2020-10-13 Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of

hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

*COVID-19 in Southeast Asia* Hyun Bang Shin 2022-01-06 COVID-19 has presented huge challenges to governments, businesses, civil societies, and people from all walks of life, but its impact has been highly variegated, affecting society in multiple negative ways, with uneven geographical and socioeconomic patterns. The crisis revealed existing contradictions and inequalities in society, compelling us to question what it means to return to "normal" and what insights can be gleaned from Southeast Asia for thinking about a post-pandemic world. In this regard, this edited volume collects the informed views of an ensemble of social scientists - area studies, development studies, and legal scholars; anthropologists, architects, economists, geographers, planners, sociologists, and urbanists; representing academic institutions, activist and charitable organisations, policy and research institutes, and areas of professional practice - who recognise the necessity of critical commentary and engaged scholarship. These contributions represent a wide-ranging set of views, collectively producing a compilation of reflections on the following three themes in particular: (1) Urbanisation, digital infrastructures, economies, and the environment; (2) Migrants, (im)mobilities, and borders; and (3) Collective action, communities, and mutual action. Overall, this edited volume first aims to speak from a situated position in relevant debates to challenge knowledge about the pandemic that has assigned selective and inequitable visibility to issues, people, or places, or which through its inferential or interpretive capacity has worked to set social expectations or assign validity to certain interventions with a bearing on the pandemic's course and the future it has foretold. Second, it aims to advance or renew understandings of social challenges, risks, or inequities that were already in place, and which, without further or better action, are to be features of our "post-pandemic world" as well. This volume also contributes to the ongoing efforts to de-centre and decolonise knowledge production. It endeavours to help secure a place within these debates for a region that was among the first outside of East Asia to be forced to

contend with COVID-19 in a substantial way and

which has evinced a marked and instructive diversity and dynamism in its fortunes.
