History Textbooks American Textbook Council 1994 Based on expert review and research, this book provides an innovative standard and guide to social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)

Nationalism in the English-Speaking World Rachel Hutchins-Viroux 2009-01-23 A great deal has been written in recent years about nationalism. Yet scholars remain sharply divided as to a coherent theoretical model of this phenomenon and many have called for further empirical research. This volume pursues this line of inquiry, examining a variety of geographical contexts within the English-speaking world, including Australia, Canada, India, the United Kingdom and the United States at different historical periods. These interdisciplinary studies combine elements of sociology, political science, history, literature, and cultural studies.

Powerful Social Studies for Elementary Students Jere Brophy 2012-03-29 POWERFUL SOCIAL STUDIES FOR ELEMENTARY STUDENTS examines the nature and purpose of social studies as it outlines ways to select content and teach history, geography, and social sciences more meaningfully. These respected authors present principles and illustrative examples to help pre-service and in-service teachers plan well-organized social studies instruction that produces positive student outcomes. The Third Edition emphasizes the importance of using developmentally appropriate content and methods when helping students to develop social understanding and civic action, and includes a solid research base that is reflective of the current NCSS standards. Rather than advocating the elimination of the traditional content framework used to organize the social studies curriculum ('expanding communities framework'), the authors call for retaining the most important topics that have traditionally been emphasized and for teaching these topics in 'more coherent and powerful ways.' Social Media in Politics Bogdan Pătruț 2014-05-05 This volume sets out to analyse the relation between social media and politics by investigating the power of the internet and more specifically social media, in the political and social discourse. The volume collects original research on the use of social media in political campaigns, electoral marketing, riots and social revolutions, presenting a range of case studies from across the world as well as theoretical and methodological contributions. Examples that explore the use of social media in electoral campaigns include, for instance, studies on the use of Face book in the 2012 US presidential campaign and in the 2011 Turkish general elections. The final section of the book debates the usage of Twitter and other Web 2.0 tools in mobilizing people for riots and revolutions, presenting and analysing recent events in Istanbul and Egypt, among others.

Teaching What Really Happened James W. Loewen 2018-09-07 "Should be in the hands of every history teacher in the country."— Howard Zinn James Loewen has revised Teaching What Really Happened, the bestselling, go-to resource for social studies and history teachers wishing to break away from standard textbook retellings of the past. In addition to updating the scholarship and anecdotes throughout, the second edition features a timely new chapter entitled "Truth" that addresses how traditional and social media can distort current events and the historical record. Helping students understand what really happened in the past will empower them to use history as a tool to argue for better policies in the present. Our society needs engaged citizens now more than ever, and this book offers teachers concrete ideas for getting students excited about history while also teaching them to read critically. It will specifically help teachers and students tackle important content areas, including Eurocentrism, the American Indian experience, and slavery. Book Features: An up-to-date assessment of the potential and pitfalls of U.S. and world history education. Information to help teachers expect, and get, good performance from students of all racial, ethnic, and socioeconomic backgrounds. Strategies for incorporating project-oriented self-learning, having students conduct online historical research, and teaching historiography. Ideas from teachers across the country who are empowering students by teaching what really happened. Specific chapters dedicated to five content topics usually taught poorly in today's schools.

Teaching Non-Western Studies Stephen Guild 1972-01-01 Methods and techniques developed by teachers in the classroom and designed to involve students in a variety of learning activities to enhance their perception and understanding of a global world are the focus of this handbook. The activities described are designed to promote group discussion and to provide the stimulation for a greater variety of learning methods that place emphasis on the relationship between the content of the materials and the teaching process. The handbook is divided into four sections, each of which presents an overview of various approaches to teaching about the non-Western world. Examples of non-Western studies programs are provided, as well as a list of the major resources available for non-Western studies and a review of some of the major curriculum projects available in non-Western studies. Methods suggested for teaching non-Western studies include the use of: (1) content analysis; (2) critical incidents; (3) case studies; (4) situational exercises; (5) role plays; (5) simulations and games; (6) mixed culture groups; (7) cultural assimilators; (8) small group discussions; and (9) field experiences.
