Grassland Walter F. Wedin 2009 Grassland: Quietness and Strength for a New American Agriculture takes on the task of increasing our awareness of the vital role grass and grassland plants have in ensuring a sustainable future for America. Geared toward agriculturists, students, the public, and policymakers, Grassland aims to inspire and provide the reader the foundation needed

to move into the future. Three main sections * track the history of grassland farming, highlighting the voices of grassland advocates * examine the current roles that grassland plays throughout the United States * look at the benefits grass-based agriculture can provide when grass is treated as an essential resource As Wendell Berry so eloquently argues in the foreword to Grassland, True farmers have minds that are complex and

responsible...They understand and honor their debts to nature. They understand and honor their obligations to neighbors and consumers...In the time that is coming, we are going to need many more such farmers than we have, and we will need them much sooner than we can expect to get them. We will get them only to the extent that young people come along who are willing to fit their farming to the nature of their farms and their home landscapes, and who recognize the paramount importance of grass and grazing animals to good farming everywhere. This book will help that happen.

Principles and Practices for a Federal Statistical Agency National Research Council 2013-06-22 Publicly available statistics from government agencies that are credible, relevant, accurate, and timely are essential for policy makers, individuals, households, businesses, academic institutions, and other organizations to make informed decisions. Even more, the effective operation of a democratic system of government depends on the unhindered flow of statistical information to its citizens. In the United States, federal statistical agencies in cabinet departments and independent agencies are the governmental units whose principal function is to compile, analyze, and disseminate information for such statistical purposes as describing population characteristics and trends, planning and monitoring programs, and conducting research and evaluation. The work of these agencies is coordinated by the U.S. Office of Management and Budget. Statistical agencies may acquire information not only from surveys or censuses of people and organizations, but also from such sources as government administrative records, private-sector datasets, and Internet sources that are judged of suitable quality and relevance for statistical use. They may conduct analyses, but they do not advocate policies or take partisan positions. Statistical purposes for which they provide information relate to descriptions of groups and exclude any interest in or identification of an individual person, institution, or economic unit. Four principles are fundamental for a federal statistical agency: relevance to policy issues, credibility among data users, trust among data providers, and independence from political and other undue external influence. Principles and Practices for a Federal Statistical Agency: Fifth Edition explains these four principles in detail.

Ecological Risk Assessment, Second Edition Glenn W. Suter II 2016-04-19 The definitive reference in its field, *Ecological Risk Assessment, Second Edition* details the latest advances in science and practice. In the fourteen years since the publication of the best-selling first edition, ecological risk assessment (ERA) has moved from the margins into the spotlight. It is now commonly applied to the regulation of chemicals, the remediation of contaminated sites, the monitoring of importation of exotic organisms, the management of watersheds, and other environmental management issues. Delineating the processes for performing an ERA, the book begins by defining the field, then goes on to describe its relationship to other environmental assessment practices and its organizational framework. The book also includes a chapter on ecological epidemiology, which has previously been treated as a type of ERA, but is now recognized as a distinct practice in itself. It explores important concepts in the ERA process including probability, uncertainty, scale, mode of action and multiple causes. Reflecting changes in the field, the book's scope has been

broadened to include discussions of the application of ERA to agents other than chemical contaminants. The multitude of illustrative figures provides a flavor for the diverse practice of ERA. The author has re-organized the material, presenting a unitary process of ERA that is applicable to various problems, scales, and mandates. He keeps the emphasis squarely on providing clear, scientifically sound, and unbiased technical advice on the risks from chemicals and chemical mixtures.

Climate and Land Degradation Mannava V.K. Sivakumar 2007-08-28 In many parts of the world, climatic variations are recognized as one of the major factors contributing to land degradation impacting on agricultural systems performance and management. To accurately assess sustainable land management practices, the climate resources and the risk of climate-related or induced natural disasters in a region must be known. Only when climate resources are paired with management or development practices can the land degradation potential be assessed and appropriate mitigation technologies be developed. This book is based on an International Workshop held in Arusha, Tanzania and should be of interest to all organizations and agencies interested in sustainable land management to arrest land degradation.

Management of Agricultural, Forestry, Fisheries and Rural Enterprise - Volume I Robert J. Hudson 2009-12-10

Management of Agricultural, Forestry and Fisheries Enterprises theme is a component of Encyclopedia of Food and Agricultural Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Growing populations and expectations have placed extreme pressure on agricultural, forestry and fisheries resources. Sustainability of resources and resource industries will be achieved only with commitment, ingenuity and cooperation at unprecedented scale. The theme on Management of Agricultural, Forestry and Fisheries Enterprises begins with an assessment of the organization of agricultural, forestry, fisheries and rural enterprises introducing community-based management, traditional small farms, cooperatives and marketing boards, collective and state enterprises, and integrated global corporate systems. This is followed by thorough assessments of management systems for plants, livestock, forests and fisheries. Plant management systems are based on genetic resources, water management, nutrient management and agronomic systems. Livestock production systems are considered from the standpoints of genetic resources, range and pasture-based systems, landless systems, and options for diversification. Trends in the forest industry are revealed in terms of demand for a variety of products from forests, evolving policy regimens and silvicultural developments. The final topic addresses the complex issues surrounding sustainability of the world's fisheries. This theme assess the evolving state of the main resource industries interpreting trends and identifying challenges and opportunities. Contributors have attempted to project these developments and raise questions about their impact and role in a changing world. Clearly, they are part of an unfolding story of adaptation of the resource industries in an increasingly global society. These two volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

Grass Joe C. Truett 2009-11-03 Part autobiography, part philosophical rumination, this evocative conservation odyssey explores the deep affinities between humans and our original habitat: grasslands. In a richly drawn, anecdotally driven narrative, Joe C. Truett, a grasslands ecologist who writes with a flair for language, traces the evolutionary, historical, and cultural forces that have reshaped North American rangelands over the past two centuries. He introduces an intriguing cast of characters—wildlife and grasslands biologists, archaeologists, ranchers, and petroleum geologists—to illuminate a wide range of related topics: our love affair with turf and how it manifests in lawns and sports, the ecological and economic dimensions of ranching, the glory of cowboy culture, grasslands and restoration ecology, and more. His book ultimately provides the background against which we can envision a new paradigm for restoring rangeland ecosystems—and a new paradigm for envisioning a more sustainable future.

Pertumbuhan, Produksi, Dan Kualitas Rumput Gajah

(Pennisetum purpureum Schum) Prof. Dr. Ir. Budiman

Nohong, M.P. 2023-08-22 Buku tentang ilmu

tumbuhan/botani yang berjudul Pertumbuhan, Produksi, Dan Kualitas Rumput Gajah (Pennisetum purpureum Schum)

merupakan buku karya Budiman Nohong. Rumput gajah (Pennisetum purpureum) adalah rumput perennial, terkenal di seluruh daerah tropik basah karena mempunyai kemampuan berproduksi tinggi dan digunakan sebagai hijauan untuk ternak. Berdasarkan potensi yang dimiliki, maka rumput gajah dapat dikembangkan untuk memenuhi penyediaan pakan hijauan baik untuk rumput potongan atau penggembalaan. Tanaman yang tumbuh lebih cepat memungkinkan perubahan morfologi seperti pembentukan buku dan pemanjangan batang lebih cepat menyebabkan perbedaan produktivitas dan kualitas dibandingkan dengan kultivar yang pertumbuhannya lambat. Penggunaan tiga kultivar rumput gajah dengan perlakuan defoliiasi untuk memperoleh data tentang karakteristik pertumbuhan, produksi, dan kualitas rumput gajah kultivar Taiwan, King, dan Mott akan dibahas pada buku ini. Adanya buku

ini diharapkan dapat memberikan informasi ilmiah untuk menentukan perkembangan morfologi, produksi, kualitas, dan kelangsungan hidup tanaman rumput gajah setelah defoliiasi.
