Rescate Urbano en Altura Delfin Delgado Beneyto 2002-01-01 Esta nueva edición de Rescate urbano en altura no solo revisa y amplía las ediciones anteriores, sino que además intenta ser más clara y, sobre todo, insistir en la seguridad del bombero. La sección teórica está totalmente actualizada, especialmente lo referente a los nuevos materiales. También proporciona detalles importantes acerca de herramientas de las cuales no es fácil encontrar mucha información como son los trípodes y las camillas. En el capítulo de técnica encontraremos nueva información sobre técnicas complejas de ascenso a descenso remontando cargas, anclajes de socorristas a camillas, trabajo en taludes, trabajo con picas de anclaje, uso de trípodes y precauciones, etc. La sección práctica repasa desde las maniobras de rescate de operarios suspendidos en antenas y grúas hasta llegar a realizar un exhaustivo estudio de las cubiertas en edificios. Por último, la sección específica incluye una profunda revisión de las normativas americana (NFPA) y europea sobre rescate vertical, insistiendo especialmente en los materiales que utilizan los bomberos en España. Por último también se incluyen consejos sobre mantenimiento de material y explicación de nuevas maniobras. En resumen esta edición, además de ser una herramienta clave para la formación del bombero, también quiere responder más específicamente a las expectativas de los profesionales del rescate y a sus problemas de trabajo en altura.

Life on a Line Dave Merchant 2007-06-20 Underground rescue from caves and mines is the most extreme form of technical rescue in the world, and demands the highest levels of skill in caving, engineering, excavation, geology, trauma medicine and of course ropework. Life On A Line was the first specialist rope rescue book written for and by cave and mine rescuers, and has become the standard text for hundreds of rescue teams. The Second Edition is entirely new, with over 200 pages of expanded information and updated techniques for all aspects of ropework, from equipment selection and basic rigging to the complex mathematics of friction and traverses. Entirely new chapters cover casualty care, stretcher selection and rigging, large animal and expedition rescue, plus in-depth explanations of the standards and legal frameworks affecting today’s teams. It remains an international textbook, with techniques and explanations aimed at both European EN/CE, American ASTM/NFPA and international ISO/UIAA standards.

Ulysses James Joyce 2022-11-13 Ulysses is a novel by the Irish writer James Joyce. It is considered to be one of the most important works of Modernist literature, it has been called "a demonstration and summation of the entire movement". "Before Joyce, no writer of fiction had so foregrounded the process of thinking."However, even proponents of Ulysses such as Anthony Burgess have described the book as "inimitable, and also possibly mad". There have been at least 18 different "Ulysses" editions (Joyce's handwritten manuscripts were typed by a number of amateur typists). This eBook is a faithful reproduction of the the notable first book edition published in Paris on 2 February 1922 by Sylvia Beach at Shakespeare and Company (only 1000 copies were printed). James Augustine Aloysius Joyce (2 February 1882 – 13 January 1941) was an Irish novelist and poet, considered to be one of the most influential writers in the modernist avant-garde of the early 20th century. Joyce is best known for Ulysses (1922), a landmark work in which the episodes of Homer's Odyssey are paralleled in an array of contrasting literary styles, perhaps most prominent among these the stream of consciousness technique he perfected. Other major works are the short-story collection Dubliners (1914), and the novels A Portrait of the Artist as a Young Man (1916) and Finnegans Wake (1939). His complete oeuvre also includes three books of poetry, a play, occasional journalism, and his published letters.

Bohemia Sentimental Enrique Gomez Carrillo 2017-09-06 Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world.The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work.We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Water-Blue Eyes Domingo Villar 2013-07-01 Amid the aroma of the sea and the Galician pines, a young saxophonist is found dead in his swanky flat overlooking the beach. The murder seems to have taken place after a sexual encounter with a lover: there are two glasses filled with gin in the living room, and the dead man, Luis Reigosa, is tied by the wrists to the headboard of the bed. But the way he was killed makes it impossible to obtain any more clues about his activities that night: his stomach, groin and thighs are horribly burned, and his genitals look hideously like a toasted cashew. The unusually cold-blooded and cruel murder is assigned to Leo Caldas, a disheartened police inspector still searching for his place in the world. The case unfolds between inviting nights at the jazz clubs and the tense, affected atmosphere of affluent Vigo.

Iml-Engineer Rope Rescue Systm Michael G. Brown 2001-02 A comprehensive look at a wide variety of rope rescue systems is presented in this text. Written by an experienced rope rescue professional, it's a practical and entertaining resource for rope rescuers from basic through advanced levels. Exciting stories recreate real situations for the student, who then applies problem-solving principles described in the text. Team issues - integrity, development, and efficiency - are featured and build a superior survival profile for students who adopt these modern training philosophies. Highlighted notes emphasize interesting, current, and sometimes controversial topics within the rope rescue community.

Climbing Free Lynn Hill 2003-04-29 Hill describes her famous climb and meditates on how she harnesses the strength and courage to push herself to such extremes.

The Crisis Of Global Capitalism George Soros 1998-12-11 The global economy, on which the world now depends more than ever, is in crisis. The Russian economy has collapsed, leading to punishing inflation and economic hardship. Scores of Japanese banks are in ruin while the Japanese government muddles along, the nation falling deeper and deeper into recession. The once-booming economies of Thailand, Malaysia, and Indonesia have imploded. Brazil and the rest of Latin America has begun to edge toward the precipice, and even in Europe and America the markets lurch violently, wiping out gains with each passing week. No one is better positioned to explain the current global financial crisis than George Soros, the man Morgan Stanley head Barton Biggs calls "the finest analyst of the world in our time." In The Crisis of Global Capitalism, Soros, chairman of Soros Fund Management (whose Quantum Fund is considered to have been the best performing investment fund in the world over the past thirty years), dissects the current crisis and economic theory in general, revealing how theoretical assumptions have combined with human behavior to lead to today's mess. He shows how unquestioning faith in market forces blinds us to crucial instabilities, and how those instabilities have chain-reacted to cause the current crisis—a crisis that has the potential to get much, much worse. Offering brilliant solutions to the global meltdown, based on years of Soros's own experience as a financier and philanthropist, this is essential reading for anyone involved with the new economy—that is, all of us.

The Civilizing Process Norbert Elias 2000-07-13 The Civilizing Process stands out as Norbert Elias' greatest work, tracing the "civilizing" of manners and personality in Western Europe since the late Middle Ages by demonstrating how the formation of states and the monopolization of power within them changed Western society forever.

The Chosen Species Juan Luis Arsuaga 2006 Is modern man the logical conclusion of a long evolutionary journey? Or are humans merely an evolutionary accident? The Chosen Species answers these and many other questions about our origins. Authors Juan Luis Arsuaga and Ignacio Martínez are world-renowned paleoanthropologists and co-directors of the excavations at Atapuerca—a World Heritage Site and Europe's oldest known burial site---where their team discovered a new human species, homo antecessor. Their work has changed the way we see human evolution. Here, the authors draw on their rich experience to provide a fascinating account of our origins. They reconstruct the sequence of events, give an account of how, when, and why man evolved, and draw conclusions based on verifiable facts and well-founded argument. The Chosen Species combines scientific rigor with a spellbinding style that will grip readers as they follow the tale to its end.

The Natural Science of Stupidity Paul Tabori 2012-05-01

The Ecology, Exploitation and Conservation of River Turtles Don Moll 2004-04-08 The underlying theme of this book is that a widespread, taxonomically diverse group of animals, important both from ecological and human resource perspectives, remains poorly understood and in delcine, while receiving scant attention from the ecological and conservation community. This volume proposes a comprehensive overview of the world's river turtles' ecology, conservation, and management. It begins with a categorization of taxa which inhabit flowing water habitats followed by information on their evolutionary and physical diversity and biogeography. Within the framework of ecology, the authors discuss the composition of river turtle communities in different types of lotic habitats and regions, population dynamics, movements, reproductive characteristics and behavior, predators, and feeding relationships. In a conservation and management section, the authors identify and evaluate the nature and intensity of factors which threaten river turtle survival--almost all of which involve direct human exploitation or indirect effects of human induced habitat alteration and degradation. They then list and evaluate the various schemes which have been proposed or employed to halt declines and restore populations, and make recommendations for future management plans for specific species and regions. In closing, they state their viewpoint concerning future research directions and priorities, and an evaluation of future prospects for survival of the world's river turtle species.

Law and Government in Medieval England and Normandy George Garnett 1994-04-28 An important set of historical essays on England and Normandy from the tenth to the thirteenth century.

Rescate urbano en altura Delfin Delgado Beneyto 2009-06

The Ecological Basis of Conservation Professor of Ecology Moshe Shachak 1997-01-31 From its inception, the U.S. Department of the Interior has been charged with a conflicting mission. One set of statutes demands that the department must develop America's lands, that it get our trees, water, oil, and minerals out into the marketplace. Yet an opposing set of laws orders us to conserve these same resources, to preserve them for the long term and to consider the noncommodity values of our public landscape. That dichotomy, between rapid exploitation and long-term protection, demands what I see as the most significant policy departure of my tenure in office: the use of science-interdisciplinary science-as the primary basis for land management decisions. For more than a century, that has not been the case. Instead, we have managed this dichotomy by compartmentalizing the American landscape. Congress and my predecessors handled resource conflicts by drawing enclosures: "We'll create a national park here," they said, "and we'll put a wildlife refuge over there." Simple enough, as far as protection goes. And outside those protected areas, the message was equally simplistic: "Y'all come and get it. Have at it." The nature and the pace of the resource extraction was not at issue; if you could find it, it was yours.

Manual básico de seguridad y rescate urbano Fernando Caballero Colmenero 2000

Vox Super-Mini Spanish and English Dictionary, 3rd Edition Vox 2012-05-25 The bestselling Spanish-English dictionary perfect for home, school, and work The Vox Super-Mini Spanish and English Dictionary has helped Spanish-language learners read, write, and understand this popular language more successfully than any other portable dictionary on the market. This new edition of this bestselling Vox title has been expanded with 32 additional pages and has been revised and updated from front to back. Reset to provide maximum legibility and redesigned for a clearer and more contemporary layout, this handy A-to-Z reference contains all the essential Spanish words required for quick communication and comprehension. Inside you'll find: 15,000 headwords and more than 24,500 translations Clearer typography for improved readability Updated coverage of contemporary Spanish language and life

Current Index to Journals in Education 2000

Op Oloop Juan Filloy 2009 His life runs according to a methodical and rigid schedule, with everything--from his meals down to his regular visits to the city brothels--timed to the minute. But when an insignificant traffic delay upsets this sacred schedule, and on the day of Oloop's engagement party, the clock begins ticking down towards a catastrophe that no amount of planning will avert. A playful and unpredictable masterpiece of Argentinean literature, raising comparisons to Ulysses and serving as a primary inspiration to authors such as Julio Cort'zar and Alfonso Reyes, "Op Oloopis" the first novel by lawyer, Hellenist, boxing referee, and decagenarian Juan Filloy (1894-2000) to be translated into English.

Tristes Tropiques Claude Levi-Strauss 2012-01-31 "A magical masterpiece."—Robert Ardrey. A chronicle of the author's search for a civilization "reduced to its most basic expression."

The Changing Mile James Rodney Hastings 2016-10-11 Dramatically presents the changes man, climate, cattle, fire, and other factors have wrought upon the natural landscape within a vertical mile over a large region--the northern Sonoran Desert and the highlands within it and to the east.

Cecilia Valdés or El Angel Hill Cirilo Villaverde 2005-09-29 Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances; she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba.

Self-Rescue David Fasulo 2011-06-01 This must-have handbook on rescue techniques for serious climbers fully describes and illustrates a variety of techniques that every climber should know for safety and self-reliance.

Ecology and Conservation of Tropical Ungulates in Latin America Sonia Gallina-Tessaro 2019-11-20 This book brings together the latest information on tropical ungulates in different Latin American countries. These animals are not only important from the point of view of their role in different ecosystems, but also have cultural value for people. The book also discusses topics such as habitat transformation and hunting as these species are an important source of food in many places. Addressing ungulate natural communities in diverse ecosystems and countries, the book provides information on specific aspects of each of the most representative species, and highlights topics to help readers better understand these species and develop effective management and conservation strategies. The information presented also reveals the need for more knowledge and will hopefully provide the incentive for continued studies on this important group of animals. This publication serves as a reference for academic research on ungulate ecology, behavior and dynamics, as well as the basis for conservation strategies.

History of Spanish and Portuguese Literature Friedrich Bouterwek 1823

Climbing Anchors John Long 2013-07-02 This completely revised and updated edition with all new color photos brings together in a single volume the anchoring systems most popular among climbers. Most climbers today learn their craft on artificial climbing walls and on sport routes with fixed protection. Their first efforts to lead on trad routes often come as a rude shock--they find that they haven't the skills and training to safeguard the climb or to set up solid belays. This new edition of Climbing Anchors is the climber's complete and authoritative source of information on protection, from fundamental knots to sophisticated rigging and equalizing skills.

What is the Name of this Book? Raymond M. Smullyan 2011 A celebrated mathematician presents more than 200 increasingly complex problems that delve into Gödel's undecidability theorem and other examples of the deepest paradoxes of logic and set theory. Solutions.

Tierra Del Fuego Sylvia Iparraguirre 2000 This novel explores Captain Robert Fitzroy's abduction of Jemmy Button from his home in Cape Horn and Fitzroy's attempt to "civilize" Button in England in order to return him to his country as a bearer of "enlightened society." The experiment leads to tragic consequences. Tierra del Fuego deals with European arrogance and exploitation without resorting to the cliché of the "Noble Savage."

Defending the Land of the Jaguar Lane Simonian 2010-07-05 Mexican conservationists have sometimes observed that it is difficult to find a country less interested in the conservation of its natural resources than is Mexico. Yet, despite a long history dedicated to the pursuit of development regardless of its environmental consequences, Mexico has an equally long, though much less developed and appreciated, tradition of environmental conservation. Lane Simonian here offers the first panoramic history of conservation in Mexico from pre-contact times to the current Mexican environmental movement. He explores the origins of conservation and environmental concerns in Mexico, the philosophies and endeavors of Mexican conservationists, and the enactment of important conservation laws and programs. This heretofore untold story, drawn from interviews with leading Mexican conservationists as well as archival research, will be important reading throughout the international community of activists, researchers, and concerned citizens interested in the intertwined issues of conservation and development.

The Historical Archaeology of Buenos Aires Daniel Schávelzon 1999-12-31 A discussion of the historical archaeology of one of the largest cities in the world following four centuries of marginal positioning in regard to empires, trade routes, and the production and accumulation of wealth. The author describes how Buenos Aires came to achieve its current status as a major urban metropolis through an analysis of settlement patterns, architecture, the lifestyle of its residents, and the access to commodities of different social groups.

Against Postmodernism Alex Callinicos 1991-01-08 It has become an intellectual commonplace to claim that we have entered the era of 'post-modernity'. Three themes are embraced in this claim - the poststructuralist critique by Foucault,

Derrida and others of the philosophical heritage of the Enlightenment, the supposed impasse of the High Modern art and its replacement by new artistic forms, and the alleged emergence of 'post-industrial' societies whose structures are beyond the ken of Marx and other theorists of industrial capitalism. Against Postmodernism takes issue with all these themes. It challenges the idealist irrationalism of poststructuralism. It questions the existence of any radical break separating Post-modern from Modern art. And it denies that recent socio-economic developments represent any fundamental shift from classical patterns of capital accumulation. Drawing on philosophy and cultural history, Against Postmodernism takes issue with some of the most forthright critics of post-modernism - Jurgen Habermas and Frederic Jameson, for example. But it is most distinctive in that it offers a historical reading of these theories. Post-modernism, Alex Callinicos argues, reflects the disappointed revolutionary generation of '68, and the incorporation of many of its members into the professional and managerial 'new middle class'. It is best read as a symptom of political frustration and social mobility rather than as a significant intellectual or cultural phenomenon in its own right.

The Harp and the Shadow Alejo Carpentier 2007-10

Daniel Kahneman 2011-10-25 Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's The Undoing Project: A Friendship That Changed Our Minds In the international bestseller, Thinking, Fast and Slow, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, Thinking, Fast and Slow is destined to be a classic.

The Rights of Nature David R. Boyd 17-09-05 An important and timely recipe for hope for humans and all forms of life Palila v Hawaii. New ZealandŌs Te Urewera Act. Sierra Club v Disney. These legal phrases hardly sound like the makings of a revolution, but beyond the headlines portending environmental catastrophes, a movement of immense import has been building Ñ in courtrooms, legislatures, and communities across the globe. Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it. Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales, and lawmakers are ending the era of keeping these intelligent animals in captivity. In Hawaii and India, judges have recognized that endangered species Ñ from birds to lions Ñ have the legal right to exist. Around the world, more and more laws are being passed recognizing that ecosystems Ñ rivers, forests, mountains, and more Ñ have legally enforceable rights. And if nature has rights, then humans have responsibilities. In The Rights of Nature, noted environmental lawyer David Boyd tells this remarkable story, which is, at its heart, one of humans as a species finally growing up. Read this book and your world view will be altered forever.

Thinking, Fast and Slow
