Competitive Arms Control 2022-06-28 John D. Maurer The essential history of the Strategic Arms Limitation Talks (SALT) during the Nixon Administration How did Richard Nixon, a president so determined to compete for strategic nuclear advantage over the Soviet Union, become one of the most successful arms controllers of the Cold War? Drawing on newly opened Cold War archives, John D. Maurer argues that a central purpose of arms control talks for American leaders was to channel nuclear competition toward areas of American advantage and not just international cooperation. While previous accounts of the Strategic Arms Limitation Talks (SALT) have emphasized American cooperative motives, Maurer highlights how Nixon, National Security Advisor Henry Kissinger, and Secretary of Defense Melvin Laird shaped negotiations, balancing their own competitive interests with proponents of cooperation while still providing a coherent rationale to Congress. Within the arms control agreements, American leaders intended to continue deploying new weapons, and the arms control restrictions, as negotiated, allowed the United States to sustain its global power, contain communism, and ultimately prevail in the Cold War.

Psychological Operations 1996 Frank L. Goldstein This anthology serves as a fundamental guide to PSYOP philosophy, concepts, principles, issues, and thought for both those new to, and those experienced in, the PSYOP field and PSYOP applications. It clarifies the value of PSYOP as a cost-effective weapon and incorporates it as a psychological instrument of U.S. military and political power, especially given our present budgetary constraints. Presents diverse articles that portray the value of the planned use of human actions to influence perceptions, public opinion, attitudes, and behaviors so that PSYOP victories can be achieved in war and in peace.

Space Capstone Publication Spacepower 2020-08-11 Us Government United States Space Force This book, Space Capstone Publication Spacepower: Doctrine for Space Forces, is capstone doctrine for the United States Space Force and represents our Service's first articulation of an independent theory of spacepower. This publication answers why spacepower is vital for our Nation, how military spacepower is employed, who military space forces are, and what military space forces value. In short, this capstone document is the foundation of our professional body of knowledge as we forge an independent military Service committed to space operations. Like all doctrine, the SCP remains subject to the policies and strategies that govern its employment. Military spacepower has deterrent and coercive capacities - it provides independent options for National and Joint leadership but achieves its greatest potential when integrated with other forms of military power. As we grow spacepower theory and doctrine, we must do so in a way that fosters greater integration with the Air Force, Army, Navy, Marine Corps, and Coast Guard. It is only by achieving true integration and interdependence that we can hope to unlock spacepower's full potential.

The Vital Era 2021 Hugh Johnston Knerr "In the past century, few have done more to establish the Air Force and its logistics enterprise as we know it today than Maj Gen Hugh J. Knerr; fewer still are as unique. An early aviator, Knerr established the first airlift mission and led the procurement effort for the B-17 with Gen Frank Andrews before WWII. After which he led a campaign for the autonomous air force that put him at odds with the War Dept and the White House. During WWII, Knerr led logistics planning efforts to mobilize the Eighth Air Force in European Theatre of Operations (ETO) and later amassed theatre-wide authority of logistics, aligning the entire logistics effort of the Army Air Forces (AAF) in the ETO. Amongst many career accomplishments, Knerr ended his career as the USAF's first Inspector General establishing the Office of Special Investigations (OSI) and is accredited with designing the USAF's dress blue uniform. Little known fact, Knerr began aviation interests as a child at the mouth of the wellspring, building kites and scrubbing toilets for the Wright Brothers at their bicycle shop. His memoirs penned in the months preceding his death in 1971, now published, give a personal insight into this formative period of the Air Force and offer the perspective only one of its architects could tell. Further, his pursuit of innovation, disruption of barriers, and challenges to the status quo are exceptionally relevant to present day Air Force as it seeks to accelerate change"--

The Air Force Integrates 1945-1964 2002-02 Alan L. Gropman Documenting the racial integration of the Air Force from the end of World War II to the passage of the Civil Rights Act of 1964, retired Air Force colonel Alan L. Gropman contends that the service desegregated itself not for moral or political reasons but to improve military effectiveness. First published in 1977, this second edition charts policy changes to date. 31 photos.

Sharing Success - Owning Failure: Preparing to Command in the Twenty-First Century Air Force 2012-08-17 Colonel Usaf David L. Goldfein Command is the ultimate service. It is a time when we have the singular responsibility to create and lead strong Air Force units. A time when our passion for our Air Force and our vision for its future must be overwhelmingly clear. Early in the "Developing Aerospace Leaders" initiative, we began to focus on the way in which the institution teaches leadership and prepares airmen for command. What we found was a wide range of practices and a wide range of expectations - a complicating factor in today's Expeditionary Aerospace Force. We realize that preparing our officers to command effectively, mission-oriented units must be a deliberate process. It must develop our unique airman perspective, creating commanders who are able to communicate the vision, have credibility in the mission area, and can lead our people with inspiration and heart. The foundation of our institution's effectiveness has always been its leaders. Colonel Goldfein's work provides valuable lessons learned and serves as a worthwhile tool to optimize your effectiveness as a squadron commander. This book is a must-read, not only for those selected to command a squadron but for all our young officers, helping them understand what the requirements of squadron command will be. Remember, command is a unique privilege - a demanding and crucial position in our Air Force. "Sharing Success - Owning Failure" takes you a step closer to successfully meeting that challenge.

Commanding an Air Force Squadron 2012-08-07 Col Usaf Timmons, Timothy The privilege of commanding an Air Force squadron, despite its heavy responsibilities and unrelenting challenges, represents for many Air Force officers the high point of their careers. It is service as a squadron commander that accords true command authority for the first time. The authority, used consistently and wisely, provides a foundation for command. As with the officer's commission itself, command authority is granted to those who have earned it, both by performance and a revealed capacity for the demands of total responsibility. But once granted, it much be revalidated every day. So as one assumes squadron command, bringing years of experience and proven record to join with this new authority, one might still need a little practical help to success with the tasks of command. This book offers such help. "Commanding an Air Force Squadron" brings unique and welcome material to a subject other books have addressed. It is rich in practical, useful, down-to-earth advice from officers who have recently experienced squadron command. The author does not quote regulations, parrot doctrine, or paraphrase the abstractions that lace the pages of so many books about leadership. Nor does he puff throughout the manuscript about how he did it. Rather, he presents a digest of practical wisdom based on real-world experience drawn from the reflection of many former commanders from any different types of units. He addresses all Air Force squadron commanders, rated and nonrated, in all sorts of missions worldwide. Please also see a follow up to this book entitled "Commanding an Air Force Squadron in the Twenty-First Century (2003)" by Jeffrey F. Smith, Lieutenant Colonel, USAF.

Defending Air Bases in an Age of Insurgency 2014-08 Shannon Caudill This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

Bleeding Talent 2017-07-01 T. Kane Shaping the debate on how to save the military from itself. The first part recognizes what the military has done well in attracting and developing leadership talent. The book then examines the causes and consequences of the modern military's stifling personnel system and offers solutions for attracting and retaining top talent.

Airpower against an Army: Challenge and Response in CENTAF's Duel with the Republican Guard 1995 In January and February 1991, Central Command Air Forces (CENTAF) conducted an air-to-ground onslaught against Iraq's Republican Guard. The requirements of this operation conflicted with several aspects of the U.S. Air Force's preparations for a European battleground. The low-altitude tactics CENTAF crews had practiced for the previous decade and a half were unsuitable for the task at hand. This study examines how effectively CENTAF adjusted air operations against the Republican Guards to the changing realities of combat. The extent to which existing USAF doctrine prepared CENTAF for this operation provides a baseline for the amount of adaptation required. The subsequent narrative identifies tactical innovations developed during the operation, the main elements of adaptive process, those factors that helped and hindered the process, and the sources of CENTAF's innovations. Initial F-16 and B-52 attacks on the Republican Guard registered little success. In response, CENTAF launched six significant tactical innovations in one week: A-10 deep interdiction, A-10 reconnaissance, F-16 Killer Scout operations, F-16 forward basing, F-111 and F-15E "Tank Plinking," and the use of cockpit videotape as a bomb damage assessment (BDA) source. These innovations required CENTAF aviators to create new tactics as they conducted operations. CENTAF's effectiveness against the Guard divisions improved, resulting in greater destruction of Iraqi forces. Critically weakened by air attack, the two Guard divisions that stood and fought were annihilated during the campaign's ground phase. CENTAF's adaptation to the realities of war in the Gull, accomplished with impressive speed, was facilitated by four conditions.

Naval Air War: The Rolling Thunder Campaign 2016-01-05 Norman Polmar This is the sixth monograph in the series The U.S. Navy and the Vietnam War. It covers aircraft carrier activity during Operation Rolling Thunder in the war. Operation Rolling Thunder was one of the longest sustained aerial bombing campaigns in history. And it would be a failure. The U.S. Navy proved essential to the conduct of Rolling Thunder. Exploiting the inherent flexibility and mobility of naval forces, the Seventh Fleet operated with impunity for three years off the coast of North Vietnam. The success with which the Navy executed the later Operation Linebacker campaign against North Vietnam in 1972 revealed how much the service had learned from and exploited the Rolling Thunder experience of 1965-1968. The book includes several photographs with backgrounds of key aircraft used as part of Operation Rolling Thunder during the Vietnam War. The Mind of War 2012-01-11 Grant Hammond The ideas of US Air Force Colonel John Boyd have transformed American military policy and practice. A first-rate fighter pilot and a self-taught scholar, he wrote the first manual on jet aerial combat; spearheaded the design of both of the Air Force's premier fighters, the F-15 and the F-16; and shaped the tactics that saved lives during the Vietnam War, and the strategies that won the Gulf War. Many of America's best-known military and political leaders consulted Boyd on matters of technology, strategy, and theory. In The Mind of War, Grant T. Hammond offers the first complete portrait of John Boyd, his groundbreaking ideas, and his enduring legacy. Based on extensive interviews with Boyd and those who knew him as well as on a close analysis of Boyd's briefings, this intellectual biography brings the work of an extraordinary thinker to a broader public.

Airpower in Small Wars 2003 James S. Corum The use of airpower in wartime calls to mind the massive bombings of World War II, but airplanes have long been instrumental in small wars as well. Ever since its use by the French to put down rebellious Moroccan tribes in 1913, airpower has been employed to fight in limited but often lengthy small conflicts around the globe. This is the first comprehensive history of airpower in small wars--conflicts pitting states against non-state groups such as insurgents, bandits, factions, and terrorists--tracing it from the early years of the twentieth century to the present day. It examines dozens of conflicts with strikingly different scenarios: the Greek Civil War, the Philippine Anti-Huk campaign, French and British colonial wars, the war in South Vietnam before the American escalation, counterinsurgency in southern Africa, Latin American counter guerrilla operations, and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades. For each war, the authors describe the strategies employed on both sides of the conflict, the air forces engaged, and the specific airpower tactics employed. They discuss the ground campaigns and provide the political background necessary to understand the air campaigns, and in each case they judge the utility of airpower in its broadest sense. In their historic sweep, they show how forms of airpower evolved from planes to police helicopters, aircraft of the civilian air reserve, and today's unmanned aircraft. They also disclose how small wars after World War II required new strategies, operational solutions, and tactics. By taking this broad view of small-war airpower, the authors are able to make assessments about the most effective and least effective means of employing airpower. They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small-wars training programs. Airpower in Small Wars will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty-first century.

The Armed Forces Officer 2017 Richard Moody Swain In 1950, when he commissioned the first edition of The Armed Forces Officer, Secretary of Defense George C. Marshall told its author, S.L.A. Marshall, that "American military officers, of whatever service, should share common ground ethically and morally." In this new edition, the authors methodically explore that common ground, reflecting on the basics of the Profession of Arms, and the officer's special place and distinctive obligations within that profession and especially to the Constitution.

The Strategic Air War Against Germany and Japan: a Memoir 2012-06-22 Gen Haywood S Hansell Jr This book seeks to recount air experience and development before World War II, to describe the objectives, plans and effects of air warfare in Europe and in the Pacific, and to offer criticism, opinion, and lessons of that great conflict. The observations in this book constitute a memoir. This book is part of a series of historical volumes published by the United States Air Force, Office of Air Force History.

The Things They Carried 2009-10-13 Tim O'Brien Look for O'Brien's new book, American Fantastica, on sale October 24th A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, The Things They Carried is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. The Things They Carried depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. The Things They Carried won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Commanding an Air Force Squadron in the Twenty-first Century 2003 Jeffrey F. Smith "Jeffrey Smith updates the earlier release of Col Timothy T. Timmon's Commanding an Air Force Squadron (1993). In this book, which includes a foreword by Gen John P. Jumper and an introduction by Colonel Timmons, USAF, retired, Colonel Smith relies on the vast "insights, experiences, and recommendations" of former and current commanders to identify the attributes of a successful commander at multiple levels. He identifies some issues commanders face regardless of the level of command, including counseling personnel, dorm inspections, commanders' calls, money management, and the roles of spouses and families. According to Colonel Smith, the conduct of individuals in times of crises is the truest barometer of a good commander."--Publisher website.

John Warden and the Renaissance of American Air Power 2011 John Andreas Olsen Dr. John Andreas Olsen has written an insightful, compelling biography of retired U.S. Air Force colonel John A. Warden III, the brilliant but controversial air warfare theorist and architect of Operation Desert Storm's air campaign. Warden's radical ideas about air power's purposes and applications, promulgated at the expense of his own career, sparked the ongoing revolution in military affairs. Legendary in defense circles, Warden is also the author of The Air Campaign: Planning for Combat (republished by Brassey's, Inc. in 1989). Presenting both the positives and negatives of Warden's personality and impact in this objective portrait, Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments.

The Limits of Air Power 2006-01-01 Mark Clodfelter Tracing the use of air power in World War II and the Korean War, Mark Clodfelter explains how U. S. Air Force doctrine evolved through the American experience in these conventional wars only to be thwarted in the context of a limited guerrilla struggle in Vietnam. Although a faith in bombing's sheer destructive power led air commanders to believe that extensive air assaults could win the war at any time, the Vietnam experience instead showed how even intense aerial attacks may not achieve military or political objectives in a limited war. Based on findings from previously classified documents in presidential libraries and air force archives as well as on interviews with civilian and military decision makers, The Limits of Air Power argues that reliance on air campaigns as a primary instrument of warfare could not have produced lasting victory in Vietnam. This Bison Books edition includes a new chapter that provides a framework for evaluating air power effectiveness in future conflicts.

Associated Press Stylebook And Libel Manual 2000 Ed 2000-07-05 Norm Goldstein The style of the Associated Press defines clear news writing. In fact, more people write for the AP news service than for any single newspaper or broadcaster in the world. The AP Stylebook is therefore "the journalist's bible," an essential handbook for all writers, editors, students, and public-relations specialists. The AP Stylebook contains over 5,000 entries laying out the AP's rules on grammar, spelling, punctuation, and usage. It gives journalists the references they need to write about the world today: correct names of countries and organizations, language to avoid, common trademarks. Special sections cover business and sports reporting. This edition, published in the Associated Press's 150th year, also includes crucial advice on how writers can guard against libel and copyright infringement.An up-to-date AP Stylebook belongs on the desk of every working writer.

Ten Propositions Regarding Space Power 2020-11-17 M. V. Smith This public domain reproduction in durable hardcover matte rides the coattails of Colonel Philip S. Meininger's book, Ten Propositions Regarding Air Power. As the United States ponders its future regarding space operations, the time has come to frame similar propositions regarding spacepower. Specifically, this study seeks to answer the question, "What is the nature of spacepower?" It also test the aerospace integration school's hypothesis that spacepower is simply a continuation or extension of airpower. Two points come immediately to the forefront of this work. First, spacepower is different from airpower even though both share the vertical dimension of warfare. Second, space operations have matured to a point where valid and unique propositions regarding spacepower are identifiable. The ten propositions presented here do not represent a complete list. The method used to derive these propositions involved literary research that result in a long list. The list evolved over three years during numerous brainstorming with several space experts--most of them space weapons officers with theater and often combat experience--until the list was carefully refined into the ten most salient propositions. There were many ways to present the Ten Propositions Regarding Spacepower, but the author deferred to Meininger's approach of citing each proposition as a thesis statement with supporting material immediately following. The objective of this work is to stimulate discussions and help those who do not yet understand or appreciate the nature of spacepower in modern warfare.

The Journey of a Thousand Miles

He was exhausted of his existence. He was dull, unhappy, and discontented. He had a job he hated, a supervisor he despised, and a girlfriend he didn't love. He had no passion, no purpose, no significance. He believed like he was wasting his time, his possibility, his being. He desired to modify, he wanted to run away, he desired to survive. He decided to leave his work, to end things with his partner, to sell his belongings, and to buy a single pass to the far end of the world. He didn't know where he was proceeding, he didn't understand what he was performing, he didn't realize what he was seeking. He only understood that he had to leave, that he had to investigate, that he had to discover. He embarked on a trip of a thousand miles, a journey of excitement, of challenge, of education, of growth, of alteration.
