Understanding the European Union's External Relations

2003-09-02 Michèle Knodt The European Union is one of the world's biggest economies. However, its role as an international actor is ambiguous and it's not always able to transform its political power into effective external policies. The development of an 'assertive' European Union challenges the image of an internal project aimed at economic integration and international relations theories based on unitary state actors. This book systematically links the EU's external relations to existing political theories, showing how existing theories need to be modified in order to deal with specific characteristics of the EU as an international actor.

Child Rights and International Discrimination Law

2019-02-22 Marit Skivenes Societies and states are at a crossroad in how children are treated and how their rights are respected and protected. Children's new position and their strong rights create tensions and challenge the traditional relationships between family and the state. The United Nations Convention on the Rights of the Child was adopted unanimously by the General Assembly of the United Nations in 1989 and came into force in 1990. Article 2 places states under an obligation to accord primacy to the best interests of the child in all actions concerning children and to ensure and regulate child protection. This book offers a comparative and critical analysis of the implementation of Article 2 of the United Nations Convention on the Rights of the Child. In order to examine how Article 2 is being implemented, it is essential to have a sound understanding of the obligations it imposes. The opening chapters will explore the precise content of these obligations in terms of the legislative history of the text, its underlying philosophy, its amplification by the United Nations Committee on the Rights of the Child, and subsequent authoritative interpretations of it by courts around the world. The book will then drill down into the conceptual and theoretical challenges posed by the very nature of the obligations and will offer in-depth exploration of the long-running 'rights v welfare' debate that has always presented something of a challenge in giving effect to children's rights. Contributors are leading academics in the children's rights field drawn from a wide range of countries and jurisdictions worldwide, including those with common law, civilian and mixed traditions. Disciplines represented in the book include law, psychology, political science, childhood studies, social

work and anthropology. By drawing together the various facets of Article 2 and analysing it from a range of perspectives, the volume provides a coherent and comprehensive inter-disciplinary analysis on discrimination and the rights of the child.

Reforming the Common Fisheries Policy

2016-06-24 Jill Wakefield This book takes a critical view of the policy and law governing EU marine fisheries and the effect of the 2013 reform of the Common Fisheries Policy (CFP). Reforms to the CFP are impeded by Treaty-guaranteed concessions, exemptions from general environmental legislation and the Court of Justice's creation of principles unique to the sector. The author discusses how damaging effects of fishing could be ameliorated if the Court were to align fisheries principles with general principles of law, and considers the institutional and regulatory frameworks needed to encourage prudent resource use.

Roadmap to an ASEAN Economic Community

2005 Denis Hew Wei-Yen At the Ninth ASEAN Summit in Bali on 7 October 2003, the leaders of the Association of Southeast Asian Nations agreed to establish an ASEAN Economic Community (AEC) by 2020. It is envisaged that the AEC would be a single market and production base, with a free flow of goods and services, investments, capital and skilled labour. An integrated ASEAN with a sizeable market of over 500 million people could become an alternative to China as a regional production base for MNCs. Altho...

Disunited Nations

2021-10-06 Sean Byrnes Disunited Nations explores American reactions to hostile world opinion, as voiced in the United Nations by representatives of the Global South from 1970 to 1984. Sean T. Byrnes suggests this challenge had a significant impact on US policy and politics, shaping the rise of the New Right and neoliberal visions of the world economy. Integrating developments in American political and diplomatic history with the international history of decolonization and the "Third World," Disunited Nations adds to our understanding of major transitions in foreign policy as the US moved away from the expansive internationalist global commitments of the immediate postwar era toward a more nationalist and neoliberal understanding of international affairs.

Advances in Taxation

2008-06-16 Suzanne M. Luttman Addresses various aspects of taxation,

including tax policy issues at the federal, state, local, and international levels.

The Politics of State Expansion

2005-09-27 James Cronin The expansion of the British state was neither automatic nor accidental. Rather, it was the outcome of recurring battles over the proper boundaries of the state and its role in economy and society. The Politics of State Expansion focuses on the interests arrayed on either side of this struggle; providing a new and critical perspective on the growth of the 'Keynsian welfare state' and on the more recent retreat from Keynes and from collective provision.

Political Economy for Human Rights

2019-06-05 Manuel Couret Branco Over time there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism. This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights-based political economy can be built. Considering a variety of recognized human rights, such as the right to water and sanitation, the right to social security, the right to work, cultural freedom and democracy, this book describes how mainstream economics theory conflicts with these rights and explores alternative modes of thinking that incorporate human rights concerns into economics. Moreover, the book also reflects on the teaching of political economy for human rights. It sets out that a political economy favourable to human rights must be pluralist, interdisciplinary, participatory, de-commodified, non-utilitarian and non-consequentialist. The author proposes that it must not only assume the performative character of

economics but also, and especially, its transformative purpose. Political Economy for Human Rights will offer students, academics, activists and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world. It will also be of great interest to the general public concerned with human rights and economic issues.

The Contribution of International Fisheries Law to Human Development

2012-11-01 Nienke van der Burgt The Contribution of International Fisheries Law to Human Development: An Analysis of Multilateral and ACP-EU Fisheries Instruments examines whether and how legal fisheries instruments encompass a normative consensus on human development, reflected by the indicators of equity, poverty eradication and participation.
