### The Moral Responsibilities of Companies

2014-10-06 C. Chapple The Moral Responsibilities of Companies is a philosophical analysis of the question of whether companies can be held morally responsible for the harms they create, and what implications such a view has on the moral position of employees and shareholders in these companies.

### Televised Presidential Debates in a Changing Media Environment [2 volumes]

2018-11-26 Edward A. Hinck This two-volume set examines recent presidential and vice presidential debates, addresses how citizens make sense of these events in new media, and considers whether the evolution of these forms of consumption is healthy for future presidential campaigns—and for democracy. The presidential debates of 2016 underscored how television highlights candidates' and campaigns' messages, which provide fodder for citizens' widespread use of new media to "talk back" to campaigns and other citizens. Social media will continue to affect the way that campaign events like presidential debates are consumed by audiences and how they shape campaign outcomes. This two-volume study is one of the first to examine the relationship between debates as televised events and events consumed by citizens through social media. It also assesses the town hall debate format from 1992 to 2016, uses the lens of civil dialogue to consider how citizens watch the debates, and considers the growing impact of new media commentary on candidate images that emerge in presidential and vice presidential debates. Televised Presidential Debates in a Changing Media Environment features contributions from leading political communication scholars that illuminate how presidential debates are transforming from events that are privately contemplated by citizens, to events that are increasingly viewed and discussed by citizens through social media. The first volume focuses on traditional studies of debates as televised campaign events, and the second volume examines the changing audiences for debates as they become consumed and discussed by viewers outside the traditional channels of newspapers, cable news channels, and campaign messaging. Readers will contemplate questions of new forms, problems, and possibilities of political engagement that are resulting from citizens producing and consuming political messages in new media.

### Mapping Agency

2016-05-13 Ulrike Lorenz-Carl Despite regionalism having developed into a global phenomenon, the European Union (EU) is still more often than not presented as the 'role-model of regionalism' whose institutional designs and norms are adopted by other regional actors and organizations as part of a rather passive 'downloading process'. Reaching beyond such a Eurocentric perception, Mapping Agency provides an empirically rich 'African perspective' on regionalisms in Sub-Saharan Africa. It adopts an actor-centred approach but departs from a rather simplified understanding of agency as exerting power and instead scrutinizes to what extent actors actually participate in or are excluded from processes of regionalism. The value of this volume derives from the inclusion of historical dimensions, its open multi-actor approach to both formal and informal processes and its comparative perspective within but also beyond Sub-Saharan Africa. The chapters offer a multifaceted picture of agency beyond disciplinary divides where the EU is one actor amongst many and where local, national, regional and global state and non-state actors shape - and sometimes break - processes of regionalisms in Sub-Saharan Africa.

### Global Competition

2012-01-26 David Gerber Global competition now shapes economies and societies in ways unimaginable only a few years ago, and competition (or 'antitrust') law is a key component of the legal framework for global competition. These laws are intended to protect competition from distortion and restraint, and on the national level they reflect the relationships between markets, their participants, and those affected by them. The current legal framework for the global economy is provided, however, by national laws and institutions. This means that those few governments that have sufficient 'power' to apply their laws to conduct outside their own territory provide the norms of global competition. This has long meant that the US (and, more recently, the EU) structure global competition, but China and other countries are increasingly using their economic and political leverage to apply their own competition laws to global markets. The result is increasing uncertainty, costs, and conflicts that burden global economic development. This book examines competition law on the global level and reveals its often complex and little-understood dynamics. It focuses on the interactions between national and international legal regimes that are central to these dynamics and a key to understanding them. Part I examines the evolution of the current global system, the factors that have shaped it, how it operates today, and recent efforts to alter that system-e.g., by including competition law in the WTO. Part II focuses on national competition law systems, revealing how national laws and experiences shape global competition law dynamics and how global factors, in turn, shape national laws and

experiences. It examines the central roles of US and European law and experience, and it also pays close attention to countries such as China that are playing increasingly important roles in the global competition law arena. Part III analyzes current strategies for improving the legal framework for global competition and identifies the factors that may contribute to a system that more effectively supports global economic and political development. This analysis also suggests a pathway for moving toward that goal.

### The Development of Jury Service in Japan

2016-08-19 Anna Dobrovol'skaia This book presents a comprehensive account of past and present efforts to introduce the jury system in Japan. Four legal reforms are documented and assessed: the implementation of the bureaucratic and all-judge special jury systems in the 1870s, the introduction of the all-layperson jury in the late 1920s, the transplantation of the Anglo-American-style jury system to Okinawa under the U.S. Occupation, and the implementation of the mixed-court lay judge (saiban'in) system in 2009. While being primarily interested in the related case studies, the book also discusses the instances when the idea of introducing trial by jury was rejected at different times in Japan's history. Why does legal reform happen? What are the determinants of success and failure of a reform effort? What are the prospects of the saiban'in system to function effectively in Japan? This book offers important insights on the questions that lie at the core of the law and society debate and are highly relevant for understanding contemporary Japan and its recent and distant past.
