Firearm Safety Certificate - Manual for California Firearms Dealers and DOJ Certified Instructors 2016-12 California Department of Justice The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms

dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

Key Concepts in Health Studies 2010-02-18 Chris Yuill Key Concepts in Health Studies provides a much needed guide to the central concepts used across the subject, and offers the reader a comprehensive

overview of the core topics, theories and debates. Drawing together the fundamentals within the disciplines of health, nursing, and social policy this book is an ideal text both for students studying health in a range of academic fields, and for health and social care practitioners. From ageism to public health, and gender to obesity, the book offers an exciting guide to the multidisciplinary field. Each entry features: -A snapshot definition of the concept -A wider discussion of the main issues -Case studies illustrating the application of theory to practice -Examples of further reading Highly readable, with clear indexing, and cross-referencing between entries, this is not only a student-friendly textbook that will enable the reader to dip into and update their knowledge of a particular key concept, but a valuable resource to anyone practicing in the health care field.

Imperialism 1939 Vladimir Lenin The pamphlet here presented to the reader was written in the spring of 1916, in Zurich. In the conditions in which I was obliged to work there I naturally suffered somewhat from a shortage of French and English literature and from a serious dearth of Russian literature. However, I made use of the principal English work on imperialism, the book by J. A. Hobson, with all the care that, in my opinion, work deserves. This pamphlet was written with an eye to the tsarist censorship. Hence, I was not only forced to confine myself strictly to an exclusively theoretical, specifically economic analysis of facts, but to formulate the few necessary observations on politics with extreme caution, by hints, in an allegorical language—in that accursed Aesopian language—to which tsarism compelled all revolutionaries to have recourse whenever they took up the pen to

write a “legal” work. It is painful, in these days of liberty, to re-read the passages of the pamphlet which have been distorted, cramped, compressed in an iron vice on account of the censor. That the period of imperialism is the eve of the socialist revolution; that social-chauvinism (socialism in words, chauvinism in deeds) is the utter betrayal of socialism, complete desertion to the side of the bourgeoisie; that this split in the working-class movement is bound up with the objective conditions of imperialism, etc.—on these matters I had to speak in a “slavish” tongue, and I must refer the reader who is interested in the subject to the articles I wrote abroad in 1914-17, a new edition of which is soon to appear. In order to show the reader, in a guise acceptable to the censors, how shamelessly untruthful the capitalists and the social-chauvinists who have deserted to their side (and whom

Kautsky opposes so inconsistently) are on the question of annexations; in order to show how shamelessly they screen the annexations of their capitalists, I was forced to quote as an example—Japan! The careful reader will easily substitute Russia for Japan, and Finland, Poland, Courland, the Ukraine, Khiva, Bokhara, Estonia or other regions peopled by non-Great Russians, for Korea. I trust that this pamphlet will help the reader to understand the fundamental economic question, that of the economic essence of imperialism, for unless this is studied, it will be impossible to understand and appraise modern war and modern politics.

Effective People 2015-12-15 T V Rao Is Shah Rukh Khan an effective actor? Is Naresh Trehan an effective doctor? Was A.P.J. Abdul Kalam an effective nation builder? Are you an effective person? In this

book, bestselling author T.V. Rao studies and analyses effective doctors, actors, civil servants, social workers, educationists, nation builders and entrepreneurs. Some of them seem to go beyond the tenets of effectiveness and shine out as what the author calls Very Effective People and Super Effective People. His diverse examples and cases range from A.P.J. Abdul Kalam, Devi Shetty, Anil Gupta to Kangana Ranaut, Sachin Tendulkar, Anupam Kher—to ordinary people whose lives are no less effective. Hugely readable, with self-assessment tools at the end of each chapter, Effective People will propel you to leap forward and discover the best in you.

De-Professionalism and Austerity
2020-02-05 Malin, Nigel Austerity's impacts

on the healthcare, social care and education professions are under the spotlight in this important book. From scarcer resources to greater stresses, and falling training budgets to rising risks, it charts how policies and cuts have compromised workers' ability to undertake their professional roles. It combines research and practice experience to assess the extent of de-professionalisation in recent years and how workers have responded. This book is a vital review of how austerity has resculpted our notions of professionalism.

The Business of Human Rights 2011-01-13
Aurora Voiculescu In a time when multinational corporations have become truly globalised, demands for global standards on their behaviour are increasingly difficult to dismiss. Work conditions in sweatshops, widespread

destruction of the environment, and pharmaceutical trials in third world countries are only the tip of the iceberg. This timely collection of essays addresses the interface between the calls for corporate social responsibility (CSR) and the demands for an extension of international human rights standards. Scholars from a vast variety of backgrounds provide expert yet accessible accounts of questions of law, politics, economics and international relations and how they relate to one another, while also encouraging non-legal perspectives on how businesses operate within and around human rights. The result is an essential incursion for a wide range of scholars, practitioners and students in law, development, business studies and international studies, in this emerging area of human rights.

Making Employment Rights Effective 2012-10-02 Linda Dickens There has been an enormous expansion of individual employment rights in Britain but their practical impact in terms of delivering fairer workplaces can be questioned. Taking as its starting point the widespread acknowledgement of problems with the major enforcement mechanism, the Employment Tribunals, this collection brings together experts from law, sociology and employment relations to explore a range of alternative regulatory and non-regulatory approaches to enforcement and to securing compliance and to consider factors affecting variation in the extent to which legal rights have meaning and impact at the workplace. Thus this book addresses

issues key to contemporary policy and academic debate. Chapters discuss the growth in employment rights and their enforcement mechanisms (Gillian Morris), problems with the employment tribunal system and the current and potential role of alternative dispute resolution (Linda Dickens); reflect on the long experience of enforcement of equality rights (Bob Hepple) and agency enforcement of health and safety legislation under the 'better regulation' agenda (Steve Tombs and David Whyte); evaluate the potential of various 'reflexive law' mechanisms, including corporate governance (Simon Deakin, Colm McLaughlin and Dominic Chai), and of procurement (Christopher McCrudden) as strategies for delivering fairness at the workplace. Factors influencing how statutory rights shape workplace practice are illuminated further in chapters on trade unions and individual legal rights (Trevor

Colling), the management of employment rights (John Purcell) and regulation and small firms (Paul Edwards). The opening chapter (Dickens) makes the case for addressing issues of enforcement and compliance in terms of adverse treatment at work, while the final chapter (Dickens) considers why successive governments have been reluctant to act and outlines steps which might be taken - were there sufficient political will to do so - to help make employment rights effective in promoting fairer workplaces.

Disease Control Priorities, Third Edition (Volume 9) 2017-12-06 Dean T. Jamison As the culminating volume in the DCP3 series,

volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a

highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

The Rejuvenation of Political Economy
2016-04-14 Nobuharu Yokokawa This book provides the basic knowledge of Japanese contributions in political economy and the ongoing research agenda, such as the pursuit of theoretical consistency in Marxian economics by Uno School; the concept of 'civil society' as a criterion of existing socio-economic structure; a mathematical reconstruction of Marxian theory; and an analysis of environmental pollution. The new generation of Japanese political economists in collaboration with their overseas counterparts has produced new insights into political economy and into the newly emerging structure of the world economy. The book provides useful insights

into international capitalism and how past patterns of uneven development are now changing; the role of international finance in affecting both national and international growth and employment patterns; an analysis of recent growth patterns in Asia; and the specific issue emerging within the Asian region and the implications for economics, social change and geopolitics.

Universities and Indian Country 2015-05-07
Dennis K. Norman The book describes the “nation-building” strategy by which an increasing number of Native communities

have set about reclaiming powers of self-determination, strengthening their cultures, and developing their economies. A piece of this movement has been the establishment of new models for tribally-driven and requested relations between universities and American Indian/Alaskan Native communities and organizations. Building on the Harvard Project on American Indian Economic Development’s experience with more than 120 nation-building projects over two decades, Universities and Indian Country posits that the tenets of nation building can provide a strategy for expanding and diversifying universities’ perspectives of knowledge in a multicultural world, while also producing results that are requested by and useful to Native communities. This groundbreaking volume extends the dialogue begun by the Harvard project, providing another venue for the sharing of knowledge and

information. The projects presented address a wide range of topics, including the regulation of genetic research, human resource development, tribal fund-raising, development of tribal museums, and freedom of the press in Indian Country. Universities and Indian Country's focus on the concerns and questions of Native communities themselves, provides insight not only into how projects came together, but also into what significance they have to the tribal partners. This compilation is a valuable resource for any student, professional, or community member concerned with issues of nation building and self-determination.
