The Law and Practice of Piracy at Sea

2014-12-01 Panos Koutrakos This collection of essays provides a comprehensive assessment of the legal and policy approaches to maritime counter-piracy adopted by the EU and other international actors over the last few years. As the financial cost of Somali piracy for the maritime industry and the world economy as a whole was estimated to have reached \$18 billion by 2010, the phenomenon of piracy at sea has steadily grown in significance and has recently attracted the attention of international policy makers. Moreover, piracy is intrinsically linked to state failure and other pathologies bred by it, such as organised crime and terrorism. This book adopts a holistic approach to the topic, examining approaches to piracy as these emerge in different geographical areas, as well as tackling the central issues which counter-piracy raises in terms of the most topical aspects of international law (international humanitarian law and armed conflict, piracy and terrorism, use of force). It also focuses on the approach of the EU, placing counter-piracy in its broader legal context. Providing a detailed doctrinal exploration of the issues which counter-piracy raises, it emphasises and draws upon the insights of the practice of counter-piracy by bringing together academic lawyers and the legal advisers of the main actors in the area (EU, US, NATO, UK). The book raises fundamental questions about the law and practice of international law: are the rules of the international law of the sea on piracy still relevant? To what extent has the shared interest of international actors in tackling piracy given rise to common practices? Do the interactions among the actors examined in the book suggest fragmentation or unity of the international legal order? Is it premature to view these interactions as signalling the gradual emergence of global law in the area? This common analytical frame of reference is underlined by the concluding part, which draws these threads together. The book will be of interest to legal scholars, political scientists and international relations theorists, as well as decision-makers and students of law, politics and international relations.

Foreign Direct Investment, Trade and Economic Growth

2014-04-17 Shahid Ahmed This volume examines the opportunities and challenges in Foreign Direct Investment (FDI) and trade, particularly service trade, for developing and emerging economies in a globalised world. Using comprehensive case studies from India, Pakistan, Bangladesh, Association of Southeast Asian Nations (ASEAN) and other South Asian Association for Regional Cooperation (SAARC) countries, it explores various channels through which trade and FDI affect the process of economic growth and development. In particular, it determines growth trajectories impelled by service trade (such as telecommunications, transport, finance and distribution), where developing countries are playing an increasingly significant role. It also discusses value chains and production networks in the backdrop of the financial crisis of 2008. Combining theoretical and empirical tools, rigorous methodology and latest data, this work will serve as an important resource for formulation of international trade and economic policies in developing countries. It will be of special interest to students, researchers and policy makers dealing with international trade and FDI, and those in economics, commerce, business & management and political science.

The Routledge Handbook of Heritage Language Education

2017-03-03 Olga E. Kagan The Routledge Handbook of Heritage Language Education provides the rapidly growing and globalizing field of heritage language (HL) education with a cohesive overview of HL programs and practices relating to language maintenance and development, setting the stage for future work in the field. Driving this effort is the belief that if research and pedagogical advances in the HL field are to have the greatest impact, HL programs need to become firmly rooted in educational systems. Against a background of cultural and linguistic diversity that characterizes the twenty-first century, the volume outlines key issues in the design and implementation of HL programs across a range of educational sectors, institutional settings, sociolinguistic conditions, and geographical locations, specifically: North and Latin America, Europe, Israel, Australia, New Zealand, Japan, and Cambodia. All levels of schooling are included as the teaching of the following languages are discussed: Albanian, Arabic, Armenian (Eastern and Western), Bengali, Brazilian Portuguese, Chinese, Czech, French, Hindi-Urdu, Japanese, Khmer, Korean, Pasifika languages, Persian, Russian, Spanish, Turkish, Vietnamese, and Yiddish. These discussions contribute to the development and establishment of HL instructional paradigms through the experiences of “actors on the ground” as they respond to local conditions, instantiate current research and pedagogical findings, and seek solutions that are workable from an organizational standpoint. The Routledge Handbook of Heritage Language Education is an ideal resource for researchers and graduate students interested in heritage language education at home or abroad.

The Politics and Practice of Occupational Health and Safety Law Enforcement

2018-10-04 Diego Canciani This book takes a critical approach to examining British and Italian occupational health and safety enforcement policies and questions the legal and political principles that underpin them. The book undertakes a comparative critical analysis of these two jurisdictions’ health and safety regulatory enforcement practices by focusing on the causes and consequences of the under-criminalisation of these crimes. It explores the fundamentals of these two jurisdictions’ criminal justice systems and political practices, policies and traditions and exposes how these translate into pragmatic social inequality and injustice for victims of occupational health and safety crimes and, more generally, citizens. Findings are drawn from qualitative interviews conducted with front line occupational health and safety enforcement officers. This book offers an account of the challenges encountered when attempting to scrutinise public institutions responsible for policing crimes of the powerful. The comparison of the political and criminal justice system practices, polices and traditions of the British and Italian legal systems offer a valuable critical contribution to the anglophone literature on the subject and, more generally, on regulatory enforcement policies and practices.
