The Lived Experiences of African International Students in the UK 2022-01-11 James Marson International student migration makes a significant contribution to higher education in the United Kingdom, with Southern Africa, and Nigeria in particular, positioned joint sixth in the top ten of sending countries. Many of these student-migrants, in supplementing their finances to fund their studies in the United Kingdom, undertake employment. Temporary and/or part-time employment is integral to the student-migrant experience, despite the express purpose of their admission into the United Kingdom designated for study purposes and not work. This explicit object is reflected in restrictions affixed to international students' employment rights whilst studying; they are generally restricted to a maximum of 20 hours of work per week during term time and proscribed from working full time or as independent contractors. Given the scant regard this topic has received in the existing literature, this study offers an examination of students' lived employment experiences under these rules. The study aims to offer a contribution, first in respect of the employment experiences of student-migrants through the analytical framework of 'precarity' by examining the various manifestations of insecurity in the students' lived realities, nuanced by structures of migration control and labour market temporalities. Secondly, by adopting the socio-legal schema of legal consciousness, the study considers the student-migrants' relationship with the law by way of the legal restrictions on their employment and examines their agency as evidenced through efforts to derogate from these rules.

The Futures of Legal Education and the Legal Profession 2015-03-26 Hilary Sommerlad We are currently witnessing an unprecedented transformation in the legal profession and legal education. The Legal Services Act 2007 and the Legal Aid, Sentencing and Punishment of Offenders Act 2012 have both enabled and necessitated dramatic structural changes to the profession, as well as impacting on its ethos and ethicality. The recent Legal Education and Training Review (LETR) promises similarly dramatic change to the provision of legal education, reflecting the shifting landscape of both the legal professional market and Higher Education in general. These transformative changes bring both exciting opportunities and challenges with which everyone involved in the law - from University lecturers, to Senior Partners in leading law firms, to the judiciary - must grapple. This edited collection comprises a selection of papers presented at the 2nd conference of CEPLER, Birmingham Law School's Centre for Professional Legal Education and Research. The aim of the Conference, and thus this collection, was to bring together leading academic scholars, senior figures from professional practice, policy-makers, and representatives of the regulatory authorities, to reflect on the key issues arising from this transformative moment. As such, this volume of essays covers diverse ground, from curriculum development to professional theory, enriched and enhanced by the range of backgrounds and perspectives of its contributors.

Introduction to International Law 2013-06-29 Marek St. Korowicz This book in its entirety as well as in each of its parts is an outline of the problems under discussion. The subject matter of some eighty sections of the book is extensive; it could, indeed, be presented by experts in as many volumes. This study offers an attempt to formulate a synthesis, however difficult, of the vast amount of available material. Unlike the well-known standard Introductions to International Law which deal with all the major fields of international law, this book treats exclusively the present conceptions of that law as expressed in legal literature, international treaties and other agreements, inter national judgements and awards, governmental and diplomatic state ments and the like. Special attention is devoted, in several chapters of the book, to the "teachings of the most highly qualified publicists of the various nations" which are considered by Article 38 paragraph 1 (d) of the Statute of the International Court of Justice as "subsidiary means for the determination of rules of law." An endeavor is made to ascertain whether in certain fields of the theory of international law a "Communis opinio doctorum" has either been reached or is in the process of achievement. Some readers may consider that there are too many quotations from writings of publicists; others will certainly feel - as does this writer - that too many outstanding international lawyers have not been included.

The Handbook of International Higher Education 2023-07-03 Darla K. Deardorff Co-published with AIEA International higher education has evolved, in some respects dramatically, in the decade since publication of the first edition of this handbook. The new issues, trends, practices and priorities of research that evolved over this time have in some instances been transformed by one of the most dynamic and tumultuous periods in the history of international higher education, brought on by the pandemic, a re-emergence of nationalism, and the recognition of the power imbalances between the developed economies and the global south, and racial inequities within and across borders. This new edition addresses the myriad changes across all aspects of international education, each chapter addressing to the extent possible the reality of the present in which they were written and offering some insights for the future. While updating a number of chapters from the first edition, it also includes a preponderance of new chapters written by contributors representing wider and more diverse backgrounds. In keeping with the first edition, the overall message is that the internationalization of higher education has a vital role to play in a world that is more interconnected than ever before. Recognizing changing economic, geopolitical, climatic, and public health issues, as well as the importance of international and cross-cultural collaboration to address global problems, this handbook offers a comprehensive range of models, data and ideas to stimulate new directions in the conception and practice of international education. This edition reflects today's concerns around inclusion, diversity and equity, and how international education is being changed by issues such as decolonization, the focus on learning outcomes, the impact of digital tools to enhance access and learning and collaboration such a virtual exchange, competition for resources, risk, new patterns of mobility, and new models such as joint programs and qualifications. As with the first edition, the chapters often intentionally pair scholars and practitioners from different parts of the world, and include text boxes that highlight concrete institutional, national, or regional experiences, providing diverse voices and perspectives from around the world. This comprehensive new edition provides ideas, concepts, theories and practical ideas from around the world for those seeking to enhance the quality of the three core functions of higher education: teaching, research and service to society. It constitutes an essential resource for everyone involved in the delivery of international education and in determining its future direction. Summary of Contents Maintaining a similar structure of the first edition, this revised Handbook is comprised of four sections. The first section includes five chapters that address national, regional and international frameworks and contexts. The second addresses key aspects of internationalization at the strategy level, covering leadership, institutional strategies, outcomes assessment, resources and financing, risk management, and institutional linkages and partnerships. The third describes core functions of internationalization, addressing intercultural competence development, the internationalization of the curriculum, teaching and learning, virtual exchange, international perspectives on the work of student affairs professionals, student engagement, engaging staff and faculty, the internationalization of research and finally, and a chapter on serving communities.

Multilateral Environmental Agreements and Compliance 2017-11-27 Anna Huggins The adoption of administrative procedures in global governance has the potential to foster proper consideration of marginalized actors' interests, yet risks entrenching the dominance of the well-resourced and powerful. Accordingly, this book proposes a new framework for evaluating the extent to which administrative procedures in the compliance systems of multilateral environmental agreements constrain power and promote regard for the interests of affected states, which are frequently developing and transition countries. This framework is applied to the compliance systems under the Montreal Protocol, the Kyoto Protocol and CITES, which address critical global environmental issues of ozone-layer depletion, climate change and trade in endangered species, respectively. The analysis shows that, under certain conditions, administrative procedures limit the influence of states' asymmetric power on compliance deliberations. Furthermore, systematic adoption of these procedures increases the opportunities for affected states' interests to be voiced and considered in compliance decision-making processes.

Global Challenges in the Arctic Region 2016-08-05 Elena Conde Bringing together interconnected discussions to make explicit the complexity of the Arctic region, this book offers a legal discussion of the ongoing territorial disputes and challenges in order to frame their impact into the viability of different governance strategies that are available at the national, regional and international level. One of the intrinsic features of the region is the difficulty in the determination of boundaries, responsibilities and interests. Against this background, sovereignty issues are intertwined with environmental and geopolitical issues that ultimately affect global strategic balances and international trade and, at the same time, influence national approaches to basic rights and organizational schemes regarding the protection of indigenous peoples and inhabitants of the region. This perspective lays the ground for further discussion, revolving around the main clusters of governance (focusing on the Arctic Council and the European Union, with the particular roles and interest of Arctic and non-Arctic states, and the impact on indigenous populations), environment (including the relevance of national regulatory schemes, and the intertwinement with concerns related to energy, or migration), strategy (concentrating in geopolitical realities and challenges analysed from different perspectives and focusing on different actors, and covering security and climate change related challenges). This collection provides an avenue for parallel and converging research of complex realities from different disciplines, through the expertise of scholars from different latitudes.

Legal Aspects of Ethnic Data Collection and Positive Action 2019-09-05 Jozefien Van Caenegem This book addresses the legal feasibility of ethnic data collection and positive action for equality and anti-discrimination purposes, and considers how they could be used to promote the Roma minority's inclusion in Europe. The book's central aim is to research how a societal problem can be improved upon from a legal perspective. The controversy surrounding ethnic data collection and positive action severely limits their use at the national level. Accordingly, legal and political concerns are analysed and addressed in order to demonstrate that it is possible to collect such data and to implement such measures while fully respecting international and European human rights norms, provided that certain conditions are met. Part I focuses on ethnic data collection and explores the key rules and principles that govern it, the ways in which this equality tool could be used, and how potential obstacles might be overcome. It also identifies and addresses the specific challenges that arise when collecting ethnic data on the Roma minority in Europe. In turn, Part II explores positive action and the broad range of measures covered by the concept, before analysing the applicable international and European framework. It reviews the benefits and challenges of implementing positive action for Roma, identifies best practices, and gives special consideration to inter-cultural mediation in the advancement of Roma inclusion. The book

concludes with an overview of the main findings on both topics and by identifying three essential elements that must be in place, in addition to full respect for the applicable legal rules, in order to combat discrimination and achieve the inclusion of Roma in Europe by complementing existing anti-discrimination frameworks with the collection of ethnic data and the implementation of positive action schemes.

African Security in the Anthropocene 2023-03-11 Hussein Solomon Much has been written on security in Africa—its democratic deficit, poor civil–military relations, and myriad conflicts—but these are often treated in isolation from one another. This book takes a different approach, as it links all of these issues to the dynamics of the Anthropocene. Penned by African scholars on the continent and in the diaspora, it examines the different challenges not as separate entities but as outcomes of the Anthropocene Age. In this geological epoch, humans have become a global force—unfortunately, not necessarily for good. The interaction between humans and the climate, the effects of waste, the impact of pollution on marine and terrestrial ecosystems, the loss of biodiversity, and the change in the chemical composition of the soil, oceans and atmosphere are key identifiers of the age of the Anthropocene. This has fueled conflict and instability from the vast swathes of the Sahel to Somalia. Responding to these issues of insecurity without understanding their inter-connectedness and how this relates to the environment can only result in failure. From this perspective, the current structures in place are inadequate for the task of confronting insecurity at the state and continental levels, as represented by the African Union. What is needed is a radical reevaluation of Africa's security architecture and approach to security. This necessitates pooling sovereignty on a continental and global level. It necessitates less state-centric responses that include civil society and the business community as equal partners of states in order to collectively confront insecurity in the age of the Anthropocene. • The authors are academics, policy makers and military veterans who have worked in building capacity on the African continent• The book is comprehensive in scope, strong on theory, pragmatic in policy and reflects experience from the field. • The authors approach makes the book easy, interesting and intriguing.

Legal Issues in Global Contexts 2016-12-05 Kirk St. Amant Today, it has been said, the world is "flat," as online media allow information to move easily from point to point across the earth. International legal differences, however, are increasingly affecting the ease with which data and ideas can be shared across nations. Copyright law, for example, affects the international flow of materials by stipulating who has the right to replicate or to share certain kinds of content. Similarly, perspectives on privacy rights can differ from nation to nation and affect how personal information is shared globally. Moreover, national laws can affect the exchange of ideas by stipulating the language in which information must be presented in different geopolitical regions. Today's technical communicators need to understand how legal factors can affect communication practices if they wish to work effectively in global contexts. This collection provides an overview of different legal aspects that technical communicators might encounter when creating materials or sharing information in international environments. Through addressing topics ranging from privacy rights and information exchange to the legalities of business practices in virtual worlds and perspectives on authorship and ownership, the contributors to this volume examine a variety of communication-based legal issues that can cause problems or miscommunication in international interactions. Reviewing such topics from different perspectives, the authors collectively provide ideas that could serve as a foundation for creating best practices on or for engaging in future research in the area of legal issues in international settings.

Unintended Consequences 2016-08-23 Marianne Dickie This book arose from an inaugural conference on Migration Law and Policy at the ANU College of Law. The conference brought together academics and practitioners from a diverse range of disciplines and practice. The book is based on a selection of the papers and presentations given during that conference. Each explores the unexpected, unwanted and sometimes tragic outcomes of migration law and policy, identifying ambiguities, uncertainties, and omissions affecting both temporary and permanent migrants. Together, the papers present a myriad of perspectives, providing a sense of urgency that focuses on the immediate and political consequences of an Australian migration milieu created without due consideration and exposing the daily reality under the migration program for individuals and for society as a whole.

Legal Education in the Global Context 2017-05-15 Christopher Gane This book discusses the opportunities and challenges facing legal education in the era of globalization. It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow, and explores pedagogical shifts legal education needs to make inside and outside of the classroom. With contributions from leading experts on legal education from various jurisdictions across the globe, the work combines theoretical depth with practical insights. Seeking to understand the changing landscape of legal education in the era of globalization, the contributors find that law schools can, and must, adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about. They find that law schools need to offer their students choices, a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms. Bridging the gap between theory and practice, this book makes a significant contribution to the impact of globalization on legal education, and how students and law schools need to adapt for the future. It will be of great interest to academics and students of comparative legal studies and legal education, as well as policy-makers and practitioners.

The Diversification and Fragmentation of International Criminal Law 2012-10-23 Larissa van den Herik This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'.

Outward and Upward Mobilities 2019-02-22 Ann H. Kim People move out to move up. As in the case with other migrant groups, the mobility experienced by international students is a form of social mobility, and one that requires access from a host state. But there are multiple institutions with which students interact and that influence the processes of social mobility. Outward and Upward Mobilities investigates the connection between student and institution. This edited collection features work by key scholars in the field and considers international students across Canada regardless of legal status. Exploring how international students and their families fare in local ethnic communities, educational and professional institutions, and the labour market, this volume demonstrates the need to ask more critical questions about the short- and long-term effects of temporary legal status; how student and family experiences differ by education level and region of settlement, the barriers to and facilitators of adaptation and integration, and ultimately, to what extent individual, familial, institutional, and state goals function in harmony and in discord.

Migration and Health 2022-11-25 Sandro Galea A new introduction to a timeless dynamic: how the movement of humans affects health everywhere. International migrants compose more than three percent of the world's population, and internal migrants—those migrating within countries—are more than triple that number. Population migration has long been, and remains today, one of the central demographic shifts shaping the world around us. The world's history—and its health—is shaped and colored by stories of migration patterns, the policies and political events that drive these movements, and narratives of individual migrants. Migration and Health offers the most expansive framework to date for understanding and reckoning with human migration's implications for public health and its determinants. It interrogates this complex relationship by considering not only the welfare of migrants, but also that of the source, destination, and ensuing-generation populations. The result is an elevated, interdisciplinary resource for understanding what is known—and the considerable territory of what is not known—at an intersection that promises to grow in importance and influence as the century unfolds.

Reconceptualising the Rule of Law in Global Governance, Resources, Investment and Trade 2016–06–30 Photini Pazartzis The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Levels's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Globalization, Environmental Law, and Sustainable Development in the Global South 2021–11–29 Kirk W. Junker This volume examines the impact of globalization on international environmental law and the implementation of sustainable development in the Global South. Comprising contributions from lawyers from the Global South or who have experience in the Global South, this volume is organized into three parts, with a thematic inquiry woven through every chapter to ask how law can enable economies that can be sustained, given the limited carrying capacity of the earth. Part I describes and characterizes the status quo of environmental and economic problems in the Global South during the process of globalization. Some of those problems include redistribution of environmental burden on the public through over-reliance on the state in emerging economies and the transition to public-private partnerships, as well as extreme uncontrolled economic expansion. Building on Part I, Part II takes an international perspective by presenting some tools that are in place during the process of globalization that lead to friction and interfaces between developed and developing economies in environmental law. Recognizing the impossibility of a globalized Northern economy, the authors in Part III present some alternatives through framework ideas of human and civil rights, environmental rights, and indigenous persons' rights, as well as concrete and specific legal tools to strengthen justice and rule of law institutions. The book gives new perspectives to familiar approaches through concrete examples by professional practitioners and theoretical discourse by academic researchers, and can thereby form the basis for changes in practices, as well as further discussions and comparisons. This book will be of great interest to students and scholars of environmental law, sustainable development, and globalization and international relations, as well as legal professionals and practitioners.

Ongoing Mobility Trajectories 2019–01–01 Rosie Roberts This book explores the complex category of the 'skilled migrant,' drawing on multi-sited narrative interviews with migrants who have all lived in Australia at some point in their lives (as an origin and/or destination). Developing the more nuanced concept of the 'mobile settler', it shows how becoming a skilled migrant is not just a political and economic determination of knowledge and human capital but a complex negotiation of contexts - immigration contexts, social locations, qualifications and skills, as well as personal ties. Belying the simple binaries of official visa categories, these diverse contexts of migrant experience are central to the ways migrants construct their personal histories and negotiate their shifting attachments to home and belonging over time and space. By highlighting how migrants imagine their own complex social, cultural, national, professional and linguistic identities and pathways, this book extends the agent-centred approaches to global mobility and transnationalism that have emerged in cultural studies and social and cultural geography in recent years, according greater recognition to the individualised, local and lived experiences of global migration and thus engaging more deeply with global concerns about increased mobility and the challenges it represents.

Regulating international students' wellbeing 2013–06–19 Ramia, Gaby Cross-border education is a fast growing and diverse global market, but little is known about how international students actually live. Using international and cross-country comparative analysis, this book explores how governments influence international student welfare, and how students shape their own opportunities. As well as formal regulation by government, 'informal regulation' through students' family, friendship and co-student networks proves vital to the overseas experience. Two case study countries - Australia and New Zealand - are presented and compared in detail. These are placed in the global regulatory and market contexts, with lessons for similar exporter countries drawn. Regulating international students' wellbeing will be of interest to international students, student representative bodies, education policy makers and administrators, as well as civil servants and policy makers in international organisations. Students and researchers of international and comparative social policy will be drawn into its focus on a little understood but vulnerable global population.

Considering the current geopolitical developments and tensions, increased competition for global talent, health and sustainability concerns, growing nationalism, and other factors, non-Anglophone countries are likely to increase their recruitment efforts moving forward. This book highlights the initiatives and instruments of these countries to attract international students and build long-term internationalization strategies. With case studies from Africa, Asia, Europe, the Middle East, and Latin America, International Student Recruitment and Mobility in Non-Anglophone Countries is a must-read text for international education policy advisors at the national and institutional levels and in the international higher education industry around the globe.

School Level Leadership in Post-conflict Societies 2013–07–18 Simon R. P. Clarke How do different contexts influence the nature and character of school leadership? This book is predicated on the simple, yet profound, observation that school leadership can only be understood within the context in which it is exercised. The observation is particularly valid in relation to post-conflict societies especially when they have eventuated from new-wars. Schools in these contexts face highly complex circumstances and a level of environmental turbulence requiring different kinds of leadership from those operating in less complicated and relatively stable situations. By assembling an impressive array of international experts, this book investigates a much neglected area of research. Each chapter highlights the importance of context for understanding the realities of school leadership, and reveals the challenges and influences that school leaders face as well as the strategies they adopt to deal with the complexities of their work. In particular, valuable insights are provided into how intractable problems faced by schools can affect student, professional and organizational learning agendas. There are also important glimpses of the progression that can be made in schools by: -Enhancing the curriculum -Energizing teaching capacity; and -Optimising leadership capacity. Depictions of post-new war environments include Angola, Ghana, Sri Lanka, Rwanda, Kenya, Solomon Islands, Lebanon, Kosovo, Timor-Leste and Northern Ireland. The book will be key reading for undergraduate and postgraduate students studying educational leadership, comparative education and education policy.

LAW OF COPYRIGHT 2021–02–01 DAS, JATINDRA KUMAR The book attempts to critically analyse the cases on the law of copyright as well as statutory provisions of law of copyright. When the first edition of the book was published in 2015, there was no readable and dependable book for the general reader interested to be acquainted with the changing features of the law of copyright immediate after the enactment of the Copyright (Amendment) Act 2012. Since the publication of this book, the Finance Act 2017 has introduced Appellate Board in place of Copyright Board as well as the Supreme Court and High Courts in India have also delivered a large number of judicial decisions on the law of copyright. In this edition the author has surveyed all such Courts decisions and analysed them and inserted them in appropriate places of the book and also examined the impact of the Appellate Board. It presents not only the provisions of the Copyright Act 1957 in the form of a normative, but points out the changes made thereon by formal amendments as well as conflicts of law which have been settled by judicial interpretations. The book is divided into ten chapters. Chapter 1 is introductory, while Chapters 2 and 3 discuss the origin and development of law of copyright at international as well as national level. The most important debatable issue in copyright law is "works in which copyright subsists", and the Chapter 4 is devoted to this aspect. Chapter 5 explores various issues relating to author of work, owner of copyright and recognised rights of copyright owner. The terms of copyright, licensing of copyright, international copyright and registration of copyright are the subject matter of Chapter 6, while rights of broadcasting organisation and of performers (neighbouring rights) are the subject matter of Chapter 7. Internet is the greatest communication medium of the contemporary era, and there is an inherent link between law of copyright and internet. Therefore, Chapter 8 is devoted to discuss various issues relating to "protection of copyright in internet." While Chapter 9 demonstrates the law relating to infringement of copyright and defences of copyright liability. Chapter 10, the concluding chapter, discusses the enforcement of copyright in India in detail. Though the book is designed for the undergraduate and postgraduate students of Law, it will be equally beneficial for the researchers, academicians, jurists, lawyers, judges as well as members of civil society. TARGET AUDIENCE • Undergraduate and postgraduate students of Law. • Researchers, Academicians, Jurists, Lawyers, Judges as well as members of Civil Society.

The Global Water System in the Anthropocene 2014–08–11 Anik Bhaduri The Global Water System in the Anthropocene provides the platform to present global and regional perspectives of world-wide experiences on the responses of water management to global change in order to address issues such as variability in supply, increasing demands for water, environmental flows and land use change. It helps to build links between science and policy and practice in the area of water resources management and governance, relates institutional and technological innovations and identifies in which ways research can assist policy and practice in the field of sustainable freshwater management. Until the industrial revolution, human beings and their activities played an insignificant role influencing the dynamics of the Earth system, the sum of our planet's interacting physical, chemical, and biological processes. Today, humankind even exceeds nature in terms of changing the biosphere and affecting all other facets of Earth

system functioning. A growing number of scientists argue that humanity has entered a new geological epoch that needs a corresponding name: the Anthropocene. Human activities impact the global water system as part of the Earth system and change the way water moves around the globe like never before. Thus, managing freshwater use wisely in the planetary water cycle has become a key challenge to reach global environmental sustainability.
